What is a Data Protection Impact Assessment (DPIA)? A DPIA is a process which assists the Council in identifying and minimising the privacy risks of new projects, services or policies. The DPIA will help to ensure that potential problems are identified at an early stage, when addressing them will often be simpler and less costly. A DPIA enables an organisation to systematically and thoroughly analyse how a particular project or system will affect the privacy of the individuals involved.

With this in mind please begin by completing the screening questions below
