

## Archaeological Services in Milton Keynes Appendix 1

SITE	EVENT	ORGANISATION	START	DESCRIPTION	PUBLICATION
Stantonbury Park	Geophysics	Albion Archaeology	2004/09	Report awaited	
13-21 Olney Road, Lavendon	Evaluation*	Albion Archaeology	2004/09	Three evaluation trenches on site of former council depot which was being redeveloped for two houses. Walls and brick floors of a demolished late 18th /19th century row of stone houses fronting onto Olney Road encountered. In addition there was a section of a substantial boundary ditch plus foundations of a stone wall cutting obliquely across the site which pre-dated the housing.	short note to be followed by longer article after excavation.
1 Wood Lane, Weston Underwood	Watching brief	Archaeologica	2004	No significant archaeology found	short note
Bletchley Park SE	Radar Survey*	Archaeologica	2004/09	Ground penetrating radar, pseudo magnetic susceptibility and electric conductivity survey were undertaken on the site shown on war time plans as a dotted line which may have indicated underground structures At the western end of the site there were two cavities noted which relate to manholes in the same area and indicate filled-in cesspits for former toilets. No evidence for tunnels was found.	short note
Bletchley Park SE	Building recording*	Archaeologica	2004/09	The foundations of three demolished huts were recorded which on a map of circa 1946 were shown as Local Defense Offices (15.8 x 5.4m), an MTC hut (17.3 x 6.4m) and a building used as stores and offices (36.3 x 6.2m). All had re-enforced concrete post construction. Parts of a WWII boiler house were also recorded..	short note
Oxley Park West, Shenley Church End	Excavation*	Archaeological Investigations Ltd	2004	2004 excavations revealed a middle Iron-Age settlement with a rectangular enclosure. Work ceased in December due to access difficulties. To re-commence in Spring 2005	

## Archaeological Services in Milton Keynes Appendix 1

16 Olney Road, Emberton	Watching brief*	Archaeological Services & Consultancy	2004	Foundation trenches for a double garage revealed a metalled pathway, wall and two pits. Probably 19 <sup>th</sup> or 20 <sup>th</sup> century.	short note
Land adjacent to Stocking Green Farm, Long Street	Watching brief*	Archaeological Services & Consultancy	2004/07	Watching brief identified foundations of a post-medieval barn	short note
28 West Street, Olney	Watching brief*	Archaeological Services & Consultancy	2004/09	Extension to the existing house revealed undisturbed orangey-red sandy clay immediately below the topsoil. The northern boundary fence was noted to be built upon the foundations of a former stone wall.	short note
35 Castle Road, Lavendon	Watching brief*	Archaeological Services & Consultancy	2004/09	Watching brief for a new house and garage. There was 250mm of topsoil, beneath which was blue clay 1.5m deep which overlay limestone. No features other than modern ground disturbance for garage foundations.	short note
Hazeley Secondary School, Shenley Church End	Watching brief*	Archaeological Services & Consultancy	2004/09	The watching brief was centred on Trench 27 of the evaluation and covered an area of approximately 54m by 28m. The work revealed modern plough furrows in a SE-NW orientation, a narrow curved ditch of containing Roman pottery and the remains of a deposited load of stone rubble containing 2nd & 3rd century pottery.	short note
50 High Street, Lavendon	Watching brief*	Archaeological Services & Consultancy	2004/10	Area stripped during leveling operations for a new house. Undisturbed orangey-red sandy clay was located below the topsoil. No archaeological deposits revealed.	short note
Stoke Road Canal Bridge, Bletchley	Evaluation*	Archaeological Services & Consultancy	2004/10	The evaluation was carried out both sides of the canal in advance of the construction of a new canal bridge, car park and footpaths. Natural varied between 0.2m & 1.0m. No features encountered other than a field drain	short note

## Archaeological Services in Milton Keynes Appendix 1

Land adjacent to Stoke Road, Water Eaton	Evaluation*	Archaeological Services & Consultancy	2004/12	An area of 3.4ha with standing ridge & furrow was evaluated using both magnetometer surveying and trial trenching. The magnetometer survey recorded the furrows but did not indicate the presence of mid-Saxon features identified in trenches 9,10,11,16 &17. The 7 mid-Saxon sherds from the features were large (50mm x 50mm) and unabridged and included 3 rim-sherds with lugs. A residual fragment of hypocaust tile was recovered from the surface fill of a ditch.	short note to be followed by longer article after excavation.
Iron Bridge Works, Tickford Street, Newport Pagnell	Watching brief*	Archaeological Services & Consultancy Ltd.	2004/09	Watching brief of 25m of new sewer to the development showed that the site had been built-up in the 19th & 20th century with imported soil and rubble. No earlier features noted. Terrace deposits noted 1.5 - 2.0m below ground level and Cornbrash Limestone at a depth of 2.8m.	short note
16 Olney Road, Emberton	watching brief*	Archaeological Services & Consultancy	2004/11	A watching brief of the foundations for a garage revealed a wall, metalled pathway and two pits. One of the pits may be the cesspit of a post medieval privy. Most of the finds were 19th & 20th century in date. Some possibility that the wall may have been earlier.	short note
Caldecote Cottage, Newport Pagnell	Watching brief*	Archaeological Services and Consultancy	2004/10	A watching brief of the foundation trenches to an existing building revealed up to 0.6m of topsoil and loam on top of River Terrace gravel comprising mid-orange sand and coarse flint gravel. No archaeological features noted.	short note
London Road Allotments, Newport Pagnell	Evaluation*	Archaeological Solutions	2004/07	The evaluation revealed some pits and gullies but these contained modern pottery	short note
Laverock, North Street, Castlethorpe	Watching brief*	Northamptonshire Archaeology	2004/06	The evaluation exposed a section of the Castle moat. Recovered finds suggests that the ditch was infilled in the late 19th or early 20th century and the ground landscaped for the construction of the present house in 1961.	short note

## Archaeological Services in Milton Keynes Appendix 1

Tattenhoe Park, Tattenhoe	Geophysics*	Northamptonshire Archaeology	2004/06	MS survey presented no immediately obvious indication of magnetic enhancement from human habitation.	short note
Tattenhoe Park	Evaluation*	Northamptonshire Archaeology	2004/08	Part of a large evaluation of 65 ha (160 acres) which had been previously evaluated using magnetometer susceptibility and gradiometer surveys (event 900). Gradiometer survey did not record any features. Twenty-one trenches were excavated and encountered Boulder Clay 0.4-0.5m below ground level. Five trenches revealed an Iron Age pit, field boundary ditches, tree disturbances and ridge & furrow.	Short note to be followed by article on completion of excavation
Denbigh Sports Ground Stadium, Bletchley	Evaluation*	Northamptonshire Archaeology	2004/11	Trial trenching did not reveal any significant archaeology	short note
Belvedere Nursery, Bow Brickhill	Evaluation*	Oxford Archaeology Unit	2004/11	Evaluation of area for a new garden center close to Magiovinium was undertaken in poor conditions .It revealed field ditches and pits of the 1 <sup>st</sup> & 2 <sup>nd</sup> centuries.	note
Back Drive, Tyringham Hall, Tyringham-cum-Filgrave	Evaluation*	Phoenix Consulting	2004/10	5 trial trenches were dug on the site of proposed new housing in order to establish whether any Bronze age features would be disturbed. No archaeological features were encountered	short note
Mercers Farm, Sherington	Watching brief*	Richard Ivens	2004/07	A limited archaeological watching brief was carried out during the excavation of foundation trenches for a new extension to Mercer's Farmhouse. No significant archaeological deposits were identified.	short note
15 High Street, Lavendon	Watching brief	Richard Ivens	2004/09	Awaiting report	short note
Journeys End, Pheasants Nest, Weston Underwood	Building Recording & watching brief	Shean Stedman	2004/08	Awaiting report	short note

## Archaeological Services in Milton Keynes Appendix 1

Kingsmead South, Tattenhoe	Excavation	Thames Valley Archaeological Services	2004	Large area excavation revealed an Iron-Age site with over 8 roundhouses and semi-circular gullies for possible outbuildings. Report awaited.	Article
Gordons Lodge, Hanslope	Evaluation	Time Team	2004/10	Excavation of a formerly identified stone building showed that it was small and not of manorial status. Large medieval enclosure found and also a possible furnace on an area of metalling. To be broadcast on the 27 <sup>th</sup> March 2005.	
Snelshall East, Site C, Tattenhoe	Strip and sample*	Wessex Archaeology	2004/11	Late Iron-age / Romano British features encountered suggesting that a settlement lay to the north of the site	note
Hungate End Farm Buildings, Hanslope	Photographic survey*	Woodfield Archaeological & Architectural Services	2004/09	The farmstead comprises a barn, 2 cow houses, pigsties and loose boxes constructed around a yard with a separate cart shed to the northwest. The buildings date from the 19th century and formed part of the Watts Estate	short note
