Corporate Risk Register Update

The Corporate Risk Register (CRR) shows the key risks to the Council and the actions that are being taken to respond to these risks. The CRR is reviewed on a regular basis by Transition Board following detailed review and updating by the risk owners.

Responsibility for updating the CRR and ensuring actions are taken to mitigate risks is a corporate responsibility but operational responsibility for ensuring this happens rests with the Directors and the Business Assurance Manager.

The CRR was reviewed by Transition Board on 31 August 2016. Since the previous review in July 2016 one new high risk has been added to the register and the residual risk assessment for two risks has increased from moderate to high.

| Risk Ref | Change | Comment |
|---|-----------------|---|
| 17) Unmanaged loss of key staff | New | Commercial AVDC consultation is underway and increasing uncertainty for staff about future positions. Need to manage service resilience and exit processes. |
| 2) Approach to commercialisation does not generate desired levels of income | Increase M→H | Increase in residual risk relates to recognition of need for greater levels of control and improved governance arrangements over identification and progression of commercial opportunities |
| 8) Health & Safety | Increase M→H | In-house H&S Officer is leaving end of September. External consultancy appointed but there is increase risk during transition period while new ways of working are embedded. |

Impact of Brexit

We have considered the risks arising following the Brexit decision. At this stage there is too much uncertainty about the specific implications on the strategic objectives and day to day operations of the Council to put anything meaningful on the CRR. Management will review as information becomes available and update the CRR accordingly.

There are 17 risks on the corporate risk register. The Residual risk rating is summarised as follows:
