Corporate Risk Register Update

The Corporate Risk Register (CRR) shows the key risks to the Council and the actions that are being taken to respond to these risks. The CRR is reviewed on a regular basis by Corporate and Transition Board following detailed review and updating by the risk owners.

The CRR was last reviewed and updated by Transition Board as a whole at their meeting on 15 March 2017. Since the previous Audit Committee meeting in January 2017 one new risk has been added and the following changes made to the residual risk rating:

| Risk Ref | Change | Comment |
|---|----------------|--|
| 17) Loss of key staff/failure to recruit has negative impact on service delivery | High → Extreme | <p>This risk is inherent to large scale organisational change and was recognised at the programme outset. We are now at a critical stage; staff assessments and recruitment is in progress and the phased approach (tranches) inevitably leads to handover issues and potential gaps. The convergence of a number of additional issues, including uncertainties regarding the “Unitary” decision, reliance on contractors (e.g. Planning) and the implications of IR35, has exacerbated the challenges faced at the current time.</p> <p>The risks are greater in some areas, notably front line services in Customer Fulfilment, than in others and newly appointed ADs/SMs are developing service specific risk registers to reflect this.</p> <p>Action is being taken both at a programme level and operationally in service areas to address the issues. It is anticipated that the risk will reduce over the coming months as there is greater certainty about recruitment into new posts.</p> |
| 4) Partnership with AVE fails to deliver or hinders the achievement of the Council's objectives | Extreme → High | The risk has reduced in recognition of partnership agreements to greater transparency and scrutiny of decision making. |
| 20) Failure to identify and respond to current and potential changes in legislative/regulatory environment. | New - High | New risk added to reflect current limitations in capacity to “horizon scan” during time of organisational change. We recognise there is always a risk that we do not proactively plan for changes to legislation and the environment in which we operate. The risk is anticipated to reduce as senior staff roles are filled in the coming months and horizon scanning and forward planning returns to “business-as-usual”. |

Note on impact of Brexit - We have considered the risks arising following the Brexit decision. At this stage there is too much uncertainty about the specific implications on the strategic objectives and day to day operations of the Council to put anything meaningful on the CRR. Management will review as information becomes available and update the CRR accordingly.

There are **20 risks** on the corporate risk register. The residual risk rating is summarised as follows:
