### Explanatory note

1. All numbers are rounded to the nearest 100.
2. Options A to E are based on known potentially suitable capacity in the HELAA, consents, completions, windfalls and pipeline.
3. Options A and B fall short of the estimated housing requirement of 31,000 dwellings. Further land would need to be found to address this shortfall.
4. Options F to I are estimated as the capacity is unknown. We would need to identify sufficient suitable, available land to address this shortfall. The revised table should replace the one previously circulated. This takes account of recent commitments and updates to the HELAA.

The table previously circulated is included below for information.
