

# Report to Development Management Committee

## Workload and Performance Review for Quarter July to September 2019

### Introduction

This is a report to the Development Management Committee which provides a summary of performance in four key areas of work, planning applications, appeals, enforcement and informal enquiries, together with a brief commentary on each section.

### Section 1: Applications received and determined

Our application caseload comprises applications which form the basis for our performance measured against the Government performance target NI157 and other applications which are excluded from these categories and relating to proposals amongst which are applications from the County Council, Notifications for Agricultural, Telecommunications and works to trees. This is set in the context of the rolling 12 month period.

#### *Applications Received and Determined*

Major Applications Received: 21  
 Minor/Other Applications Received: 512

Major Applications Determined: 17  
 Minor/Other Applications Determined: 503

Major Applications Outstanding: 124  
 Minor/Other Applications Outstanding: 743

**Section 2: NI 157 – Speed of Determination of applications**

Introduction

This section sets out information regarding our performance in speed of decision for each of the 3 categories of applications, which are measured against the performance target – NI157 (a) major, (b) minor, and (c) other.

	Oct*	Nov*	Dec*	Jan*	Feb*	Mar*	Apr*	May*	Jun*	Jul*	Aug*	Sep*	Totals
Number of Major Applications Decided	2	5	5	5	7	3	5	5	5	5	9	3	59

Government Target	70%	70%	70%	70%	70%	70%	70%	70%	70%	70%	70%	70%	70%

From 1 April 2018 a government target of 70% has been set for minor and other applications.

For the quarter July to September we achieved

Minors: 68% within the time period against a target of 70%  
Others: 88% against a target of 70%  
Joint minors and others: 83% against a target of 70%  
Joint rolling 2 year average: 73% against a target of 70%

Appendix 1 details the Major applications determined in the quarter.

Outstanding applications beyond determination date and without or an expired PPA/extension of time in place as at 10 October 2019.

Majors: 90  
Minors and Others: 376

The first planning authorities subject to the Government's "special measures" regime for under-performing authorities were designated in October 2013, and performance data was published by the Department for Communities and Local Government (DCLG). Designations will be reviewed annually. Poorly performing authorities will be "designated" based on speed and quality:

- \* Speed: less than 60% of majors determined within 13 weeks averaged over a two year period; or within such extended period as has been agreed in writing between the applicant and the local planning authority.
- \* Quality: 10% or more of major applications that have been overturned at appeal (appeals allowed) over a two year period.

Authorities could be designated on the basis of either criteria or both. The current performance over this 2 year period exceeds the threshold for speed and is less than the threshold for quality and thus does not fall within the poorly performing designation.

### **Section 3: Appeals against refusal of planning permission**

#### **Introduction**

This section deals numerically with our performance in relation to appeals against refusal of planning permission. Whilst the government performance target is 10% or more of major applications that have been overturned at appeal (appeals allowed) over a two year period, a benchmarking measure is that we should seek to achieve success in 65% or more of appeals against planning decisions.

Determined	Dismissed	14
	Allowed	12
	Withdrawn/NPW	1
	Split	0
	Turned Away	0
	Varied	0

Costs                      Against AVDC  
                                    For AVDC  
                                    \*Split decisions are counted as an Allowed appeal

In the quarter between July and September a total of 37 appeals were determined, 27 of which were against refusals of planning permission. Of the 27 appeals against refusals of planning permission which are used for reporting purposes 44% were allowed which is above the Council's target of not more than 35% appeals allowed. The small number of appeals means that performance can fluctuate over time. There were a number of very successful major appeals affecting our smaller villages during this time including 65 dwellings at Long Crendon, 8 dwellings at Buckland both of which with neighbourhood plans and 14 dwellings at Shabbington all of which were dismissed.

Attached at Appendix 2 is a list of all of the appeal(s) which are used for reporting purposes against refusals of planning permission that were allowed. As there are a large number of appeals a summary on all has not been provided. There is a summary on some highlighted for awareness and learning points.

The government statistics published in March 2018 for quality show that the percentage of major applications that have been overturned at appeal is 4.8% and that for minor and other developments overturned at appeal is 1.1% for AVDC during the period of 24 months from July 2014 to June 2016. This is well below the governments threshold of 10% overturned for quality.

### **Section 4: Enforcement**

#### **Introduction**

This section details statistics relating to Enforcement matters and details the numbers of complaints received, cases closed together with the number of cases which have led to Enforcement action. Enforcement appeals are also dealt with separately and performance can be assessed accordingly.

Cases on hand at beginning of quarter	520	Cases on hand at end of quarter	502
Cases Opened	193	No of Cases closed	215
No. of Enforcement Notices Served	0	No. of Temporary Stop Notices Served	0

No. of Stop Notices Served	0	No. of Breach of Condition Notices Served	0
		No. of Planning Contravention Notices Served	0

**In the 3 month reporting period 215 cases were resolved as follows:**

Performance Figure	Notes
28% of complaints were resolved within 14 days	Generally more straightforward cases where a yes/no decision is required following initial evidence gathering
54% of complaints were resolved within two months.	Normally requiring more extensive evidence gathering and/or consultations involving 3 <sup>rd</sup> parties.
68% of complaints were resolved within 5 months.	On top of the actions identified above these cases normally require some formal action or an application for retrospective planning permission.
Remainder	Where formal legal action is involved it can take many years to resolve complaints and can include appeals and further judicial review.

**Enforcement Appeals**

Lodged	PI (Public Inquiry)	0	Determined	Allowed	0
	IH (Hearing)	0		Dismissed	1
	WR (Written responses)	0		W/Drawn	0
	Total	0		Varied	0
				Total	0
Costs	For AVDC			Against AVDC	

**Enforcement Summary**

The volume of planning enforcement complaints received is high and increasing and geographically reflects the areas where the delivery of development is highest. The service has seen a 27% increase in the number of complaints received over the last 3 years and the current team caseload is in the region of 450 open cases. Our response to complaints is prioritised based on the level of harm the suspected breach is causing. This means that 'low' category complaints will take longer to resolve than those that are causing a 'high' level of harm. A number of our Planning Enforcement Officers have recently moved on to other roles within the Council and elsewhere. We are currently actively recruiting new staff and have engaged additional temporary staff resources to help deal with demand during this period.

## **Section 5: Other Workload**

### **Introduction**

In addition the teams have dealt with the following:-

#### **Discharge of Conditions and non material amendments.**

Quarter – Out	176
---------------	-----

#### **Chargeable Pre-Application Advice, including commercial**

Quarter - Out	108
---------------	-----

#### **Non chargeable Informals**

Quarter - Out	37
---------------	----

### **Conclusion and Recommendation**

It is recommended that the Committee **NOTE** the report.

This report primarily intends to give details of factual information based on statistical data.

It is hoped that Members find the report's content helpful.

### Major Applications Determined: Quarter July to September 2019

**Bold** numbers denote applications determined outside the target period. Performance for this quarter is 71% which is above target; \* denotes those applications that had an extension of time request agreed. The small number of applications mean that performance is volatile and in this quarter involved applications where securing the right outcome outweighed the need to meet targets and applications where the revocation of the regional spatial strategy required a reassessment of the scheme.

### Appeal performance – Quarter July and September 2019

In the quarter between **July** and **September** a total of 37 appeals were determined, 27 of which were against refusals of planning permission. Of the 27 appeals against refusals of planning permission which are used for reporting purposes 44% were allowed which is above the Council's target of not more than 35% appeals allowed.

A list of all the reportable allowed appeals in this quarter is set out below.

<b>Application Reference: 17/01599/APP</b>	<b>Decision: Committee</b>
Site: Coombs Farm □ Padbury Road □ Thornborough □ Buckinghamshire □ MK18 2EB	
Development: Conversion of Agricultural Building to No.4 residential units	
<p>Members will recall that this related to a group of former agricultural buildings. It was refused for reason that there was an extensive amount of rebuilding to unit 4 and the adjoining structure to facilitate the residential use, it would not constitute a conversion scheme, but would be tantamount to a new dwelling in the countryside. It would conflict with policies RA11 and GP35 of the Aylesbury Vale District Local Plan and the advice contained in the council's adopted design guide 'The Conversion of Traditional Farm Buildings,'</p> <p>The Inspector considered that the buildings making up unit 4 are clearly permanent and substantial but are in a poor state of repair and would require some rebuilding. This rebuilding would result in the creation of dwelling/storage units with a total floor area of 200 square metres, which equates to 23.4% of the overall scheme of 855 square metres. As the appeal relates to the appeal site in its entirety, accommodating all proposed dwellings, and does not solely relate to unit 4 he was satisfied that the rebuilding of the units amounting to just 23.4% of the overall group of buildings would not result in significant rebuilding and can reasonably be regarded as a conversion..</p> <p>Whilst the Council argued that Unit 4 should be regarded in isolation, and that the percentage of rebuilding would be much greater. he found that the group of buildings comprise a single range and that they should be looked at as a whole. There is nothing in the policy, which precludes such an approach. He therefore concluded that the amount of rebuilding required in unit 4 and the adjoining structure would be minimal when the scheme is considered in its entirety and that the buildings need to be redeveloped as a collective to obtain the maximum social, economic and environmental benefits. As such the proposal would constitute a conversion and would not be tantamount to a new dwelling in the countryside, and would not be contrary to Policy RA11 or GP35 of the AVDLP.</p> <p>Note: This is disappointing as we have successfully defended the council's view that each building should be considered individually in relation to the extent of rebuilding and new work on other appeals</p>	
<b>Application Reference: 17/03582/APP</b>	<b>Decision: Delegated</b>
Site: Burcott Lodge □ High Street □ Burcott □ Buckinghamshire □ LU7 0LZ	
Development: Change of use of stable block to annex.	
<p>This was refused for reason that the level of alteration and extension would be in conflict with RA 11 and would be tantamount to a new dwelling.</p> <p>The Inspector considered that the proposal would have no separate curtilage and would be within the grounds of Burcott Lodge. He therefore considered that the proposal is a residential annex, but one capable of being used as an independent dwelling, Although located on the edge</p>	

of the settlement, the existing stable building forms part of the built-up area and is not physically isolated and concluded that as the site is not outside the built up area of the settlement the proposal does not conflict with Policy RA.11 of AVDLP.

The Inspector considered that the proposed development is clearly the conversion of a solid building with limited external changes proposed which do not comprise "major reconstruction or significant extensions" the proposed works would not conflict with Policy RA.11.

<b>Application Reference: 17/04672/APP</b>	<b>Decision: Delegated</b>
--	----------------------------

Site: The Rothschild Arms PH □ 82 Weston Road □ Aston Clinton □ Buckinghamshire □ HP22 5EJ

Development: Conversion and subdivision of the existing public house into two terraced dwellings and construction of three terraced two storey dwellings and associated parking on land on the opposite side of the road currently used as car parking and beer garden associated with Rothschild Arms Public House (PH)

The site is in two parts; on the northern part of the site, the alteration and conversion of The Rothschilds Arms (a public house) to two dwellings is proposed. The southern part of the site is a surface car park situated between nos. 51 and 57 Weston Road. A detached house with a gable end roof and a pair of semi-detached houses under hipped roofs are proposed.

The council had refused permission for this development in October 2018 for the following reason:

The proposed development by reason of the siting, layout and design of the proposed new dwellings would result in an unacceptable form of development in its context which would fail to add to the overall quality of the area and would appear out of character with the established character and appearance of the street scene along this part of Weston Road. The proposal, including the unsatisfactory visual impact of the parking arrangements, would result in a discordant form of development which would fail to promote and reinforce the local distinctiveness and would harm the character and appearance of the street scene. As such, the development would be contrary to policies HDQ1 and HDQ2 of the Aston Clinton Neighbourhood Plan and policy GP.35 of the Aylesbury Vale District Local Plan and would not constitute sustainable development as required by the NPPF. In the context of paragraph 11 of the NPPF, the development would be contrary to the development plan.

At that time whilst there had been concerns raised about the loss of the pub, the applicant provided evidence to support the assertion that the public house was no longer a viable business and that there was satisfactory provision in the area. The viability of the business was independently assessed and this concluded that the study was robust and detailed to demonstrate it was no longer viable.

The council however felt that the proposal relating to the development on the car park area was unacceptable and it was refused on this basis.

The Inspector noted that the site is situated between houses of varied design with gaps between properties resulting in loosely aligned frontages. There is some consistency to the site layouts on the southern side of Weston Road, with the houses being set behind driveways and soft landscaping. The neighbouring houses at 47-51 Weston Road are laid out at a slight angle to the street, and nos.45 and 63 come noticeably forward of their neighbours. A number of properties also have front extensions or porches which result in stepped frontages. The overall effect is that the buildings are set back from the street with loosely aligned frontages, but without a strict building line.

It was considered that although the houses would not be aligned with the front of no.57, their front elevations would face the street and would follow the loose alignment of frontages to the

west. The combination of plot layout and building design would result in the houses being visually related to the houses to the west.

The Inspector concluded that the design, scale, positioning and layout of the buildings on the southern part of the site would not appear disjointed and would be in keeping with the street scene and the proposed parking layouts would contribute to the established character and appearance of the street scene and would promote and reinforce the local distinctiveness and character of its location on Weston Road. The development would comply with policies HDQ1 and HDQ2 of the Neighbourhood Plan and Policy GP.35 of the Local Plan.

A cost application against the council was dismissed as unreasonable behaviour has not been demonstrated.

<b>Application Reference: 18/00321/APP</b>	<b>Decision: Delegated</b>
--	----------------------------

Site: Trail Flatt Farm □ Lee Road □ Quainton □ Buckinghamshire □ HP22 4BH

Development: Four bay portal frame barn for livestock with storage area for machinery and hay.

There were 3 appeal decisions, in relation to Trail Flatt Farm, Lee Road, Quainton, which has a lengthy planning history. Two of the above appeals were lodged against an enforcement notice on grounds a), g) and the third appeal was lodged against the Council's refusal.

The Planning Inspectorate decided that it will be best to link them together.

- Appeals relating to the alleged unauthorised siting of mobile home on the site (reference Enforcement Notice –EN3/2017 and Appeal Reference –18/00022/ENFNOT) were dismissed, although the Inspector allowed 9 months for compliance with the enforcement notice rather than the 6 months AVDC specified.

- Appeal relating to fourbay portal frame barn for livestock with storage area for machinery and hay.(Planning Application Reference –18/00321/APP, Appeal Reference –18/00029/REF) was allowed with the Inspector concluding that the proposed building would not result in any significant harm to the character and appearance of the area. As such, it would accord with the requirements of NP policy E1 and saved LP policy GP35.

- The Inspector allowed partial award of costs to the council and refused the claim for costs from the appellant.

<b>Application Reference: 18/00675/APP</b>	<b>Decision: Delegated</b>
--	----------------------------

Site: The Stables □ Brackley Road □ Westbury □ Buckinghamshire □ NN13 5JN

Development: Insert window into south facing wall

This was the insertion of a window in a converted barn. It was refused for reason that it was unsympathetic additional opening within an original wall which would have a material detrimental impact upon the character and appearance of this converted stable building and its preserved agricultural state, contrary to policies GP.9, GP.35 and RA.11 of AVDLP and the design guide on the Conversion of Traditional Farm Buildings, and the guidance set out in the NPPF.

The Inspector considered the insertion of this single window would be simple in form and design and would not be within public view., it would match the existing and would accord with the design guide and there would be no actual harm to the character or appearance of the building as a result of the insertion of the window, nor to the historic context of the building.

<b>Application Reference: 18/01997/APP</b>	<b>Decision: Delegated</b>
--	----------------------------

Site: Land West Of Millway □ Winslow Road □ Wingrave □ Buckinghamshire □ HP22 4PT

**Development: Recladding and re-roofing of existing barn**

The applicant seeks full planning permission for the re-cladding and re-roofing of an existing barn structure. Due to the condition of the structure and it predominately being a frame, this proposal was treated as a new agricultural building rather than merely a re-clad

It was refused for reason that there was no evidence of an agricultural need.. In the absence of information in relation to the need for a building of this size it cannot be concluded that the building would constitute sustainable development. Therefore the proposal fails to accord Policy 5 of the Wingrave Neighbourhood Plan and the guidance within the NPPF. The proposed building, by reason of its size, scale and appearance would result in an unsympathetic, incongruous and dominant building within the open countryside, failing to preserve the views across the AAL, which would be detrimental to the character and appearance of the surrounding landscape. contrary to policy 5 of the Wingrave Neighbourhood Plan, policies GP35 and RA8 of the AVDLP, the guidance in the NPPF and PPG.

The Inspector considered the existing frame is an incongruous feature within its setting, and in its current state it does not make a positive contribution to the character and appearance of the surrounding landscape. The proposal would not increase the size or scale of the structure, but it would change its appearance, resulting in a solid building. It would have the appearance of an agricultural building, with lightweight cladding materials and no windows on the elevations (other than rooflights). The site is surrounded by countryside and the cladding of the structure would not close any visual gaps, nor would it prevent views of the countryside. The proposal would not result in an incongruous feature (especially when compared to the existing structure) and the increased solidity arising from the agricultural design of the proposed cladding would not result in an unsympathetic or overly dominant appearance.

The Inspector therefore concluded that the proposed recladding and re-roofing would accord with Local Plan Policies GP.35 and RA.8 and Neighbourhood Plan Policy 5.

**Application Reference: 18/02391/APP**

**Decision: Delegated**

**Site: 2 The Firs Cottages □ Wingrave Road □ Aston Abbotts □ Buckinghamshire □ HP22 4LR**

**Development: Single storey detached garden room annexe**

This relates to a semi detached house which sits to the end of a row of similar semi-detached dwellings with a deep rear garden. It lies outside the settlement. A garden room comprising living/ gym, bathroom, kitchenette located to the rear most part of the garden, approx. 35m from the house, was refused for reason of its size and separation from the main dwelling, the possibility of independent access to it and its internal layout would form detached and self-contained accommodation which would be tantamount to a new dwelling. The proposal would not readily be capable of being incorporated with the main dwelling and would appear as if it were a separate dwelling. The proposal is therefore contrary to policies GP11 and GP35 of the Aylesbury Vale District Local Plan and advice contained in the NPPF

The Inspector stated “Whilst the size of the annex and its degree of separation, together with the potential for independent access being obtained, would share some of the features of a separate dwelling, it is possible to preclude separate use by way of a condition. However, Appendix A to circular 11/95 (the appendix remains extant) contains a model condition, which can require that a residential annex is only ever used for the purposes ancillary to the main dwelling. It is possible to enforce such a condition in this case, and whilst breaches may be difficult to detect, it is not impossible to do so. Thus, the Council’s concern that the proposal would amount to a new dwelling can be adequately addressed”

The Inspector concluded that the proposed garden annex to have been designed sensitively in terms of its scale, height and materials and would therefore be appropriate at this location. It would not have an adverse effect upon the character and appearance of the area and would not

be contrary to Policy GP.35 or the objectives of Policy GP.11, subject to the occupancy condition.

Site: The Old Dairy □ Haddenham Road □ Kingsey □ Buckinghamshire □ HP17 8LR

Development: Extension to agricultural building (Retrospective)

This was refused for reason that the council was not satisfied on the basis of the supporting evidence that there is a need for a further agricultural building on the holding. Accordingly, it has not been demonstrated that the proposed building would comprise sustainable development as sought by the NPPF.

At the time of officers inspecting the site there was a collection of cars on the site within the existing building and no agricultural activity evident.

The Inspector visited the site and considered there was no evidence to suggest that it was not and a tractor was present on the site. He stated "There does not seem to be any dispute that agriculture is the lawful use of the land and the evidence for any change of use is limited. The appellant states that they have been exploring the agricultural opportunities of keeping animals on the site, in particular, goats, and that they have been liaising with a neighbouring farmer who has a larger agricultural holding regarding working together. The fact that no goats were present at the time of my site visit is not sound evidence that the appellant will not buy them. In principal agricultural development is generally accepted in the open countryside and an extension to an agricultural building or rural business may be acceptable where it accords with the Framework principles on sustainability and adopted policies in terms of location, purpose and impact on the character and appearance of the locality.

The Inspector did not find that the development is contrary to the AVDLP, and it is in accordance with the aims of the Framework.

He also awarded costs against the council on the basis that "there are no policies within the Aylesbury Vale District Local Plan that would resist this form of agricultural development. Furthermore, the Council did not dispute that the development was in accordance with all other relevant policies in the Development Plan. They claim that there is not a need for the additional building and that therefore this would result in unsustainable development. This is completely contrary to the aims of the Framework, which seeks to support rural enterprise as set out in my appeal decision. As a result I find that the Council has failed to substantiate its reason for refusal and has thus acted unreasonably in this case and there can be no question that the applicant was put to unnecessary or wasted expense. I therefore find that unreasonable behaviour resulting in unnecessary or wasted expense, as described in Planning Practice Guidance, has been demonstrated and that a full award of costs is justified."

This emphasises the need to justify any refusal in policy terms.

**Application Reference: 18/03384/APP** | **Decision: Delegated**

Site: The Cottages □ 2 High Street □ Dinton □ Buckinghamshire □ HP17 8UW

Development: First floor rear/side extension

This was for a first floor extension to the rear of this semi detached house measuring 6.2m x 4.4m x 5.7m high. It was refused for reason that its scale, massing and design would be out of keeping with the existing dwelling and unacceptably dominate and overwhelm it. Such an extension would result in an incongruous and strident feature that would attract undue attention visually and fail to respect the dwellings character and appearance contrary to policies GP.9 and

GP35 of AVDLP and design guide and the NPPF.

The Inspector considered that the proposed development reflects sensitive design which takes into account the existing building and the site and plot constraints and does not dominate the existing building. The gable feature next door would be reflected in the proposed development and the ground floor extension would reflect the size and shape of the existing (albeit slightly larger). The existing chimney would be retained. The proposals ensure that eaves and ridge levels remain below that of the host dwelling. Whilst accepting that there would be an additional amount of built form, the Inspector considered this would not harm the character and appearance of the host dwelling or the conservation area and accords with AVDLP..

**Application Reference: 18/03986/APP** | **Decision: Delegated**

Site: Masons Meadow □ Aylesbury Road □ Aston Clinton □ Buckinghamshire □ HP22 5AH

Development: Replacement of a B8 storage and distribution building with a B1(a) office building (retrospective)

This was a retrospective application for a one and a half storey building which was refused for reason that the structure is outside of the settlement boundary, in a location deemed unsustainable for an office. The proposal would not lead to rural employment opportunities (Policy B2 of the Aston Clinton Neighbourhood Plan) and no justification for the proposed use being at this location has been advanced sufficient to outweigh the harm arising or to demonstrate that the location is in a sustainable location for the proposed office use. The proposal conflicts with Aston Clinton Neighbourhood Plan policy H1 in that the site is beyond the settlement boundary, and B3. The proposal also conflicts with AVDLP policies RA2 and RA29 and fails to accord with guidance in the National Planning Policy Framework.

The Inspector agreed that the site is outside the defined settlement boundary as identified in the Aston Clinton Parish Neighbourhood Plan (ACPNP) and is therefore located in open countryside beyond the built up area of the village.

The appeal site is part of a more extensive area, which includes several former agricultural buildings that have been converted into residential and commercial uses. The access driveway is shared with another property, which also accommodates a number of commercial units. The site previously accommodated a B8 storage and distribution unit and based on the evidence the Inspector concluded it is previously developed land.

The Inspector considered the site to be within a short walk of the centre of Aston Clinton with only a short car journey to either Aylesbury or Tring with good access to train lines with a bus stop approximately 120 metres from the site providing linkages to Dunstable, Aylesbury and Watford. e found that the site has good access to public transport services and is therefore a sustainable location.

The Inspector found the appellants businesses have been established in the local area for many years and employ a number of local people. The new office would support the administrative part of these enterprises. He concluded that this is a sustainable location for an office use in support of the rural economy. The Inspector stated “I do not find that the proposal would be harmful to the location given the previous use of the land and the small scale nature of the proposal within an existing cluster of buildings used for residential and commercial purposes. Whilst the proposal is contrary to Policy H1 and B3 of the ACPNP and Policies RA29 of the Aylesbury Vale District Local Plan (2010) (AVDP), which amongst other things seek to resist new employment development outside of defined settlement boundaries, I conclude that in this case that material considerations apply to allow this proposal when it is contrary to the development plan. I have found that the proposal would also not intensify the pattern of scattered development outside the settlement boundary and would therefore not conflict with Policy RA2 of the AVDLP which seeks to avoid reducing open land. Additionally, I find that the proposal accords with Policy B2 of the ACPNP and the Framework, which seek to support the rural economy.”

<b>Application Reference: 18/04221/APP</b>		<b>Decision: Delegated</b>
Site: 68 The Avenue □ Worminghall □ Buckinghamshire □ HP18 9LE		
Development: Annex to side to replace garage. New windows/doors.		
<p>No 68 The Avenue is a detached chalet style property with garage to the side. The proposal was for a one and a half storey attached annexe with its own front entrance, separate from the main dwelling and full facilities.</p> <p>The proposal was refused for reason that it would be tantamount to a new dwelling and would not be an annex, given its lack of shared facilities which would allow any future occupant to forego any interdependency. This lack of dependency is further compounded by the strident and discordant appearance that would be at odds and out of balance with the existing dwelling given its unacceptable scale, it would appear incongruous and overly bulky, and compromise the sense of openness locally, which is characteristic of the rural village setting, contrary to Worminghall Neighbourhood Plan policy RC1, policies GP.9 and GP.35 of AVDLP and design guide on Residential Extensions.</p> <p>The Inspector considered that the front gable would be a prominent feature, but did not agree that it would be incongruous to the existing property which exhibits gable features, albeit smaller in the form of the dormer windows and the proposed porch canopy. Furthermore, the Inspector noted a range of front gable projections and features on other properties in the vicinity. The development is proportionate to the existing dwelling and overall the resultant form would sit comfortably within the plot.</p> <p>In terms of the use as an annexe the Inspector considered this could be controlled by condition and that the development being sought under this householder application is for an annex and whilst breaches may be difficult to detect, it is possible to enforce such a condition.</p>		
<b>Application Reference: 19/00515/APP</b>		<b>Decision: Delegated</b>
Site: Land Adj □ Rose Barn □ Gibraltar □ Dinton □ Buckinghamshire □ HP17 8TY		
Development: Demolition of buildings associated with the builders yard and erection of one new dwelling and double garages to serve both the new dwelling and Rose Barn.		
<p>The appeal site is located within the hamlet of Gibraltar. It is currently in use in part as a builder's yard, including open storage, as well as permanent and temporary structures. The site is also used in part as outdoor amenity space for Rose Barn, an existing dwelling.</p> <p>Permission was refused on the basis that the site is in an unsustainable location for new residential development, in a location with limited local facilities, services or employment opportunities. Furthermore the proposed dwelling and detached garage would be large in scale and would introduce significant built form into a rural site on the edge of a hamlet that would result in an unacceptable level of adverse impact to the character and appearance of an Area of Attractive Landscape by virtue of the scale and appearance of the proposed dwelling contrary to policies GP35 and RA8 of the Aylesbury Vale District Local Plan, and the NPPF.</p> <p>The Inspector considered that the site "does benefit from easy access to good quality public transport services to a level that would surpass those in most rural areas. It is also possible to access the reasonable range of local services and amenities by walking or cycling. While it is true that some people may choose to use a motor vehicle for those types of trips the same applies elsewhere. Services and amenities are available within Dinton, with the pub being the only community facility in Gibraltar. A single dwelling would have a limited positive impact because the occupiers would most likely use some of the local facilities helping contribute to their sustainability"</p>		

The Inspector was satisfied that the appeal proposal is appropriate for the site and surroundings. Furthermore, the new buildings are located away from nearby properties which means there would be no harm to living conditions of existing and future occupiers. The proposal would also result in the removal of unsightly buildings and paraphernalia associated with the current use as a builder's yard which would enhance the area. The appeal site is also very well screened, particularly from the A418, which means there would be a very limited visual impact. In light of the above the appeal proposal would represent an appropriate location for development. The inspector found that the appeal proposal would be consistent with paragraphs 77 – 79 of the Framework regarding the provision of rural housing.

In terms of impact on the CA, the site is already developed and the removal of the builder's yard would enhance the CA. Overall, the Inspector concluded that the appeal proposal would have a neutral effect thereby preserving the character and appearance of the CA.
