Consultation for new premises licence under the Licensing Act 2003 Burcott Lodge Farm, Soulbury Road, Wing, Buckinghamshire

I have reviewed the licence application dated 12th January 2011, the amendment document dated 14th January 2011 and the Event Safety Management Plan version 2 as submitted with the application. In order to protect public safety and prevent public nuisance I recommend that the following conditions are considered by the applicant and/or Licensing Committee for inclusion on the operating schedule should the Licence be granted:

1. The organisers of the event shall supply the Environmental Health Department with a complete list of catering concessions that will be on site for the duration of the event no later than two weeks prior to the commencement of the event.
2. The water supply at the event including the water supply to the campsite must be sampled to ensure that it complies with Water Authority Regulations and is free from bacteriological contamination. The results of this water sampling must be made available to the Environmental Health Department by Wednesday 13th July 2011.
3. There is to be no amplified live or recorded music on the event site on Friday 15th July 2011 other than necessary soundchecks. All soundchecks are to be carried out between 09.00 and 19.00 hours.
4. Noise levels as measured 1 metre from the façade of any noise sensitive dwelling are not to exceed the maximum levels detailed below:

Date	Time Period	Maximum dB(A)
Saturday 16 th July 2011	11:00 – 23:59	65 LAeq (15 minutes)
Sunday 17 th July 2011	00:00 – 02:00	45 LAeq (5 minutes)
Sunday 17 th July 2011	11:00 – 23:00	65 LAeq (15 minutes)

In addition, in the frequency range 63Hz to 125Hz, noise levels shall not exceed 70dB(L) as measured 1 metre from the façade of any noise sensitive dwelling.

5. The organisers of the event shall supply the Environmental Health Department with details of the arrangements in place for noise monitoring during the event. This shall include details of noise monitoring points and the off site monitoring and communication arrangements that will be in place to ensure the above maximum noise levels are not exceeded. Where monitoring is undertaken records of this monitoring must be kept and these records made available to any Environmental

A32

Health Officer on request (NB: when identifying monitoring points at noise sensitive dwellings, consideration must be given to the weather conditions and prevailing wind direction which will affect noise propagation).

6. The Licensee shall comply with any request of an Environmental Health Officer to reduce the noise level. In this respect there shall be a clear management structure between the organiser and the sound desk managers at each stage/marquee to ensure that noise levels are reduced rapidly.
7. At least one week prior to the commencement of the event, the organisers shall provide local residents who may be affected with information regarding the dates and times of the event and what time amplified music will reduce and cease on the site. This information shall also include an emergency contact telephone number for local residents to call if they are affected so that their concerns can be addressed.
8. A copy of the final version of the event risk assessment is to be submitted to the Environmental Health Department no later than two weeks prior to the commencement of the event.

Regards

Lindsey Hone
District Environmental Health Officer
