

# Langrish Boat 23 Pidham Lane East Meon Five Ways Maintenance and Repairs

Loddon Vale Trail Riders Fellowship  
& Hants CC joint co-operation

## Langrish 23 Repair Scope (July 2016)

### large pools + fallen trees

Access for horse riders and walkers is becoming difficult due to large pools forming in several areas and falling trees.

Pools require draining, filling with hard core and new surface formed with scalpings. Trees require to be cut up and cleared. Drainage can be improved to reduce water damage.

## Langrish 23 Repair Site Visit (21Jan17)

### 3 large holes and rutting

Large holes are still evident from water damage/drainage issues, but rutting due to use / field access has increased since July 2016.

Suggestion to increase quantities of materials by 50% to ensure the scope can be fully completed and drainage improved. Any excess materials can be used 50m further up the byway.

## Langrish 23 Method Statement and Risk Assessments (Devon)

- Outline method statement drafted based on initial site discussion.

Microsoft Word  
7 - 2003 Document

- 3 risk assessment forms created
  - Manual handling
  - Small hand tools
  - Working around site machinery
