Halton Community Combined School's governing body are supportive of the proposed changes to Halton catchment area, creating a shared catchment with John Hamden/Wendover Junior School if the proposal to increase the intake of the schools to 4 form entry goes ahead. Halton School Governors appreciated Bucks CC Admissions team involving the 6B in the proposal and incorporating our	change I have no view on this change	change I have no view on this change	change I have no view on this change	change I have no view on this change	change I have no view on this change		change I have no view on this change	
																	No	1. The impact of a catchment that overlaps two other secondary schools will create competition amongst these schools for places. This is at a time when we are trying to work more collaboratively and in support of each other. 2. There will be additional travel costs that the LA will be committed to with this model, this at a time when expenditure needs to be reduced. 3. Some parents with economic means will be able to transport their son/daughter across the county to the Misbourne School, those without means will not, making this an unfair admission strategy. 4. School travel plans have a central principle to try to reduce traffic and to ensure travel to and from school has a minimal impact on the environment. This proposal will create more journeys across the already very congested Buckinghamshire roads. 5. The notion of \$E^** local schools for local students&** is being ignored with this proposal, this is the desire of the government in terms of building strong local communities. (CHA Governing Body)

									information to make an informed						
									decision. No contextual information						
									about why this proposal has been						
									suggested is stated within the						
									consultation document and information						
									provided is only a section of the current						
									catchment area for the school. The map						
									of the catchment area provided is						
									confusing as the position of the school						
									names on the map is misleading. This						
									makes it impossible to fully appreciate						
									the impact of the decision we are being						
									asked to make. It also seems very remiss						
									that neither the Governing Body or the						
									Head Teacher of the school have been						
									approached to discuss this proposal prior						
									to the public consultation. I strongly						
									oppose the proposal to realign the						
									catchment area. If councillors view the						
									whole of the current catchment area for						
									the school they will appreciate that to the						
									north and west of the school, a large						
									percentage of this is already given over to						
									woodland and fields. This proposal seeks						
									to remove further housing to the south of						
									the school and replace this with further						
									woodland along New Road. Removing						
									harring from the established area and
