

Buckinghamshire Accountable Care System

*‘Everyone working together so that the people of
Buckinghamshire have happy and healthy lives’*

**We have been working together for years
and will build on this....**

Other Stakeholders:

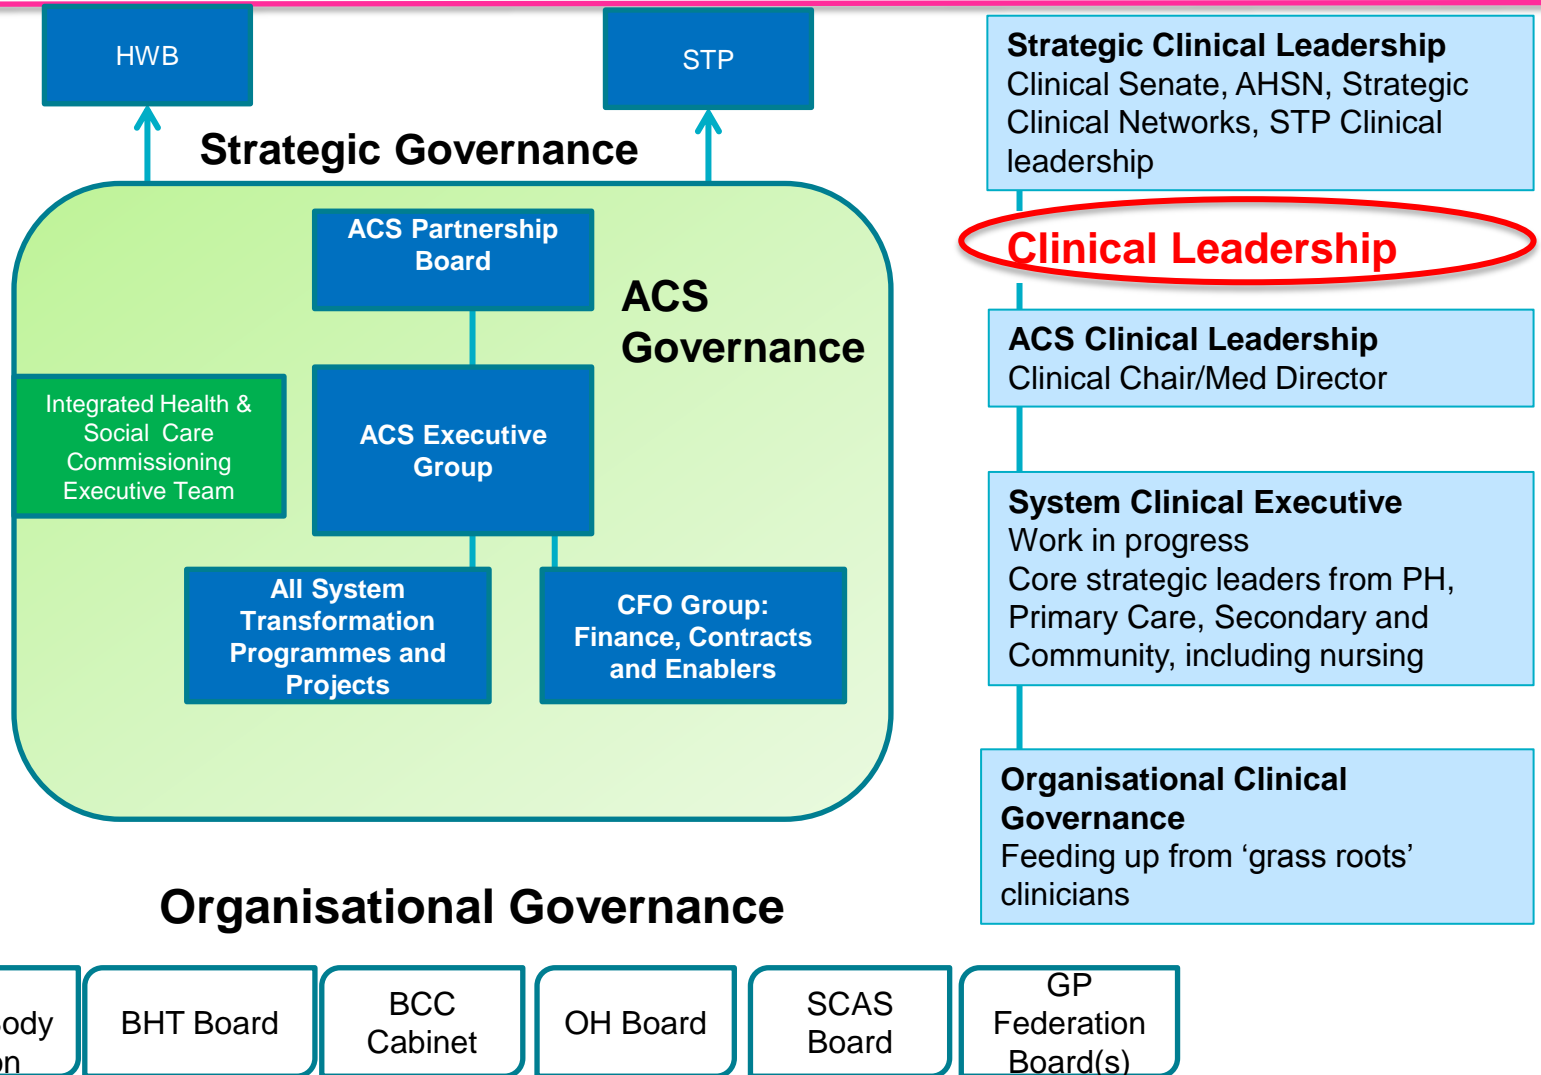

- District Councils
- Voluntary Organisations
- Our Public

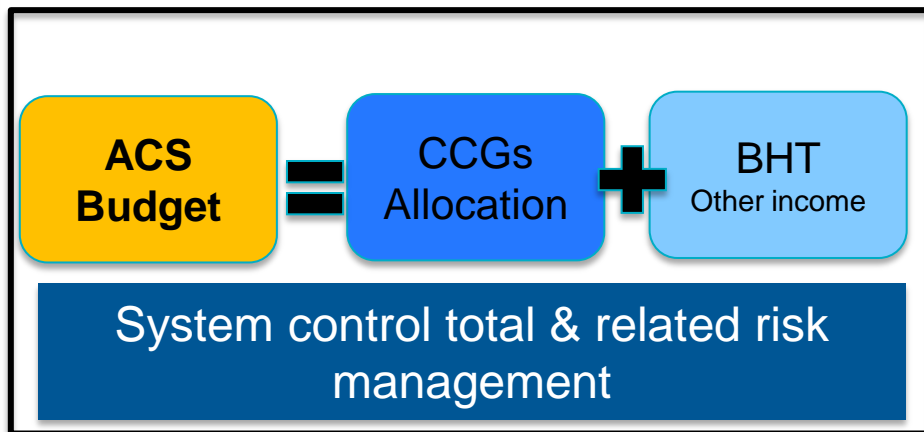

Accountable Care Means Working Together

What it is:	What it is not:
Mature partnerships - a coalition committed to collective decision making	New statutory bodies or change to existing accountabilities
Partners making a single, consistent set of decisions about how to deploy resources	Employers, ways of managing financial or other resources
Stronger local relationships and partnership work based on common understanding of local priorities, challenges and next steps	Legally binding (deliverability rests on goodwill, commitment and shared priorities and objectives)
A clear system plan and the capacity and capability to execute it	Getting rid of the purchaser / provider split or of respective statutory duties and powers
Place-based, multi-year plans built around the needs of local populations and local health priorities	Tried and tested. There will be bumps along the way – the true test is in the relationships!
Delivering improvements	Removing the need for consensus and collaboration

Our statutory and joint governance facilitates delivery

Developing a financial system that supports sustainability

“Other income” means income from non CCG sources for services provided for Bucks residents

Oxford Health FT
other income

SCAS
other income

Bucks County Council

Cost recovery across wider partner group. Agreed principles for releasing efficiencies & investment decisions to deliver collectively agreed outcomes.

System-wide transparency of service performance, planning, transformation and budgets, using an agreed ACS governance structure

How will the ACS Help our Population?

**your community
your care**
developing Buckinghamshire together

- **Support** us to join up health and social care services in order to improve the health of local communities;
- Give us more **local control** and freedom to make decisions;
- Provide our **fair share of transformation funds** and enable us to influence where these should be invested
- Some **additional funding** to support our transformation.

Our ACS will help us to go further, faster in our ambitions to become one of the safest and resilient health and care systems in the country

The national recognition is testament to the rapid improvements we have already made to patient care over the past two years; the strength of our plans to transform and to the **commitment of all partners** to get this right

Our emerging priorities:

- **Integrated community teams, community hubs and GP clusters:** piloting new ways of joining up health and social care closer to home, tailored to the needs of local communities
- Improving **24 hour** access to **urgent primary care** through innovative OOHs integration;
- Simpler pathways of care across hospital, community and social services for people with **long term conditions**
- A new **streamlined approach** for people with **musculoskeletal problems**

Our key enablers:

- **One Bucks Commissioning Team:** further developing joint commissioning across CCGs and Bucks County Council (adult and children's services, public health, mental health)
- Key providers committed to a formal **provider collaborative agreement** to deliver joined up care
- **Back Office and One Public Estate:** shared projects, using our property assets to provide better services and value to residents

Our strong track record – what have we done so far...

- **Better Healthcare in Bucks** – successful transformation programme to centralise A&E and emergency services
- **Stroke and cardiac** - innovative model of care introduced at Wycombe Hospital
- **Redesigned emergency and urgent care** including seven day medical ambulatory care facility
- **Quality and Outcomes Framework** – nationally recognised innovation to increase use of care and support planning in primary care
- **System-wide quality improvement** – aligned monitoring and governance e.g. Looked After Children
- **Over 75s community nursing** – delivering ‘upstream’ care to prevent admission and shorten length of stay for our older population

Our ambition for outstanding
