8 MILTON KEYNES ARCHAEOLOGICAL OFFICER'S REPORT Nick Crank, Milton Keynes Council	3 - 8

INVESTOR IN PEOPLE

MILTON KEYNES COUNCIL, CONSERVATION & ARCHAEOLOGY TEAM

For Bucks Historic Environment Forum, March 2016

DEVELOPMENT MANAGEMENT

The Conservation & Archaeology Team received 1049 planning consultations during 2015, 420 of which were for the Senior Archaeological Officer. The team were also consulted on a number of draft Neighbourhood Plans including those for Castlethorpe, Newport Pagnell and Sherington in addition to the emerging Local Plan - Plan:MK.

FIELDWORK

Twenty-two development-related fieldwork projects were undertaken in Milton Keynes borough in 2015, see attached list.

Highlights included:

- The discovery of a second pitched-limestone circular Romano-British mausoleum by MOLA Northampton during excavations at Passenham Quarry, Calverton.
- Excavation of an early-middle Saxon settlement comprising up to 8 sunken-featured buildings, 10 post-built buildings, and two beam-slot buildings by Albion Archaeology at Kickles Farm, Newport Pagnell.
- The mapping and excavation of a Neolithic cursus monument with associated round barrow at Haversham Road Quarry, Wolverton by Cambridge Archaeological Unit.

BUILDING CONSERVATION

In April, Milton Keynes Central Library was listed at Grade II, joining a growing number of designated early examples of MKDC architecture. Other New Town buildings considered for listing in 2015 included the Mies Van Der Rohe inspired CMK office blocks Norfolk and Ashton House which were not considered sufficiently significant to be added to the national list.

Both Willen and Old Woughton Parish Councils have produced draft Conservation Area reviews for consideration. It is hoped that these documents and any agreed boundary changes may be adopted in 2016.

HISTORIC ENVIRONMENT RECORD

A Historic England sponsored revisit of the 2011 HER Audit was begun by the Senior Archaeological Officer in August.

OUTREACH

In September the Senior Archaeological Officer led a third well-attended 'Heritage Hike' in the Ouzel valley as part of the Heritage Open Days season. Talks on recent archaeological discoveries in Milton Keynes were also given to Loughton & Great Holm Parish Council and Castlethorpe Heritage Group.

The 9th annual Milton Keynes Archaeology Day on Saturday 9th November was another successful and well-attended event attracting 600 people of all ages from Milton Keynes and beyond to enjoy the various talks, displays and activities on offer. Particularly popular was the 'Hands-on Archaeology workshop' for young people organised by locally-based firm Cotswold Archaeology which had upwards of 40 participants. The talks in the Events Space attracted a total of 110 people over the day and gave insights into Marine Archaeology, Medieval Mosaics and the amazingly well-preserved 3000 year old fenland settlement of Must Farm. Many more stopped by at the displays of recent finds by local societies and metal detectorists in the foyer. Next year's 10th anniversary event is already being programmed and will be held on Saturday 12th November.
