

Licensing Committee

Thursday, 4 April 2019 at 6.30 pm

Large & Small Committee Room, King George V House, King George V Road, Amersham

A G E N D A

Item

1 Evacuation Procedure

2 Apologies for Absence

3 Minutes (*Pages 3 - 6*)

To approve the minutes of the Licensing Committee held on 10 July 2018.

4 Declarations of Interest

5 Taxi Licensing Update and Consultation on Statutory Guidance (*Pages 7 - 10*)

Appendix 1 - Task and Finish Group Report (Pages 11 - 78)

Appendix 2 - Government Response to TFG Report (Pages 79 - 106)

Appendix 3 - Statutory Guidance Consultation Document (Pages 107 - 142)

Appendix 4 - Consultation Response (Pages 143 - 160)

6 Exclusion of the Public (if required)

To resolve that under Section 100(A)(4) of the Local Government Act 1972 the public be excluded from the meeting for the following item(s) of business on the grounds that it involves the likely disclosure of exempt information as defined in Part I of Schedule 12A of the Act.

Note: All reports will be updated orally at the meeting if appropriate and may be supplemented by additional reports at the Chairman's discretion.

Membership: Licensing Committee

Councillors: J Rush (Chairman)
C Jackson (Vice-Chairman)
M Flys
G Harris
M Harrold
M Harker
P Jones
C Jones
R J Jones
C Rouse
N Southworth
N Varley
H Wallace
J Waters
F Wilson

Date of next meeting – Thursday, 27 June 2019

Audio/Visual Recording of Meetings

This meeting might be filmed, photographed, audio-recorded or reported by a party other than the Council for subsequent broadcast or publication. If you intend to film, photograph or audio record the proceedings, or if you have any questions please contact Democratic Services. Members of the press please contact the Communications Team.

If you would like this document in large print or an alternative format, please contact 01895 837236; email

CHILTERN DISTRICT COUNCIL

MINUTES of the Meeting of the
LICENSING COMMITTEE (CDC)
held on **10 JULY 2018**

PRESENT: Councillor J Rush - Chairman
" C Jackson - Vice Chairman

Councillors: M Flys
G Harris
M Harrold
M Harker
P Jones
C Jones
C Rouse
N Southworth
H Wallace

APOLOGIES FOR ABSENCE were received from Councillors R J Jones, J Waters and F Wilson

ALSO IN ATTENDANCE: Councillor L Walsh

1 MINUTES

The minutes of the Licensing Committee held on 10 May 2018 and 16 May 2018 were approved and signed by the Chairman as a correct record.

2 DECLARATIONS OF INTEREST

There were no declarations of interest.

3 GAMBLING ACT 2005 STATEMENT OF PRINCIPLES REVIEW 2017 CONSULTATION OUTCOME

Members received a report which detailed the outcome of the consultation on the revised draft Gambling Act 2005 Statement of Principles. It was advised that the consultation had lasted for 6 weeks and in that time two responses had been received.

The first response from GamCare could be seen at Appendix 2 of the agenda pack. Members were advised that the response contained general guidance and information which officers confirmed was already adequately covered by the draft Statement of Principles.

The second response was received from Gosschalks Solicitors, on behalf of the Association of British Bookmakers, which could be seen at Appendix 3 of the supplementary agenda pack. The Committee were informed that the response contained general guidance and comments and a number of suggested changes, which were summarised below:

- In relation to the foreword, officers agreed with the suggestion that the legislation no longer be referred to as “new”, and that reference to “promoting” licensing objectives should be removed and replaced with “have regard to” the licensing objectives.
- Officers recommended that minor changes to the wording of section 2.7 should be made to remove reference to “primary activity” and replace with “providing substantive facilities for betting”.
- Officers recommended the removal of section 8.3 relating to a location policy as it was deemed as unnecessary.
- Officers did not recommend that suggested minor changes to sections 8.6 and 8.12 should be made as these had been adequately covered by other sections of the draft Statement.
- In relation to local risk assessments, it was suggested that points relating to deprivation, unemployment and homeless people should be removed as they were not relevant. Officers did not recommend that these changes be made as the list of factors was widely used by other authorities and was supported by wider knowledge including the recent Guidance issued by the LGA and Public Health England.
- Regarding the possible future Location Policy in the draft Statement of Principles, officers confirmed that the new information on Local Risks addressed this and therefore recommended that reference to a possible future Location Policy be deleted.
- Regarding changes to Conditions, officers confirmed that the draft Statement of Principles already addressed this.

Members were informed that the proposed amendments to the draft Statement of Principles could be delegated to the Head of Healthy Communities in consultation with the Chairman without needing to return to the Committee for approval.

A question was raised as to why there were concerns over the reference to areas of deprivation in the local risk assessment. It was advised that the main concern was around predetermination, however officers explained that the Council was not making any predetermination, but the draft Statement of Principles was instead providing a list of relevant factors which should be taken into account when carrying out a local risk assessment. Various pieces of research had been carried out showing that persons of lower income, unemployment and homelessness were at a higher risk of being affected by gambling related issues.

The Head of Healthy Communities advised the Committee that none of the wards in Chiltern District were in the lowest 30% of deprived areas in the country. Therefore it was suggested that supporting documentation may need to be produced to define areas of deprivation before adopting the wording as part of the Statement of Principles. Members felt that the Council had a duty to protect vulnerable people, regardless of whether they lived in an area of deprivation, and that crime and disorder relating to gambling establishments was often under-reported.

Councillor C Jones proposed:

1. That the responses to the consultation at Appendix 2 and Appendix 3 be noted.
2. That the draft Statement of Principles attached at Appendix 1 be approved subject to the amendments referred to in the minute above, the exact wording to be delegated to the Head of Healthy Communities in consultation with the Chairman of the Licensing Committee.
3. To recommend to Council to adopt the approved draft Statement of Principles at its meeting on 13 November 2018 for publication at least 4 weeks prior to coming into effect for the period 14 January 2019 to 13 January 2022.
4. To request that Cabinet, at its meeting on 16 October 2018, consider the approved draft Statement of Principles and recommend to Council as set out in 3 above.
5. To recommend to Council to resolve with effect from 14 January 2019 to 13 January 2022 not to issue casino premises licences in accordance with Section 166 of the Gambling Act 2005.

This proposal was seconded by Councillor Flys and agreed at a vote.

RESOLVED

- 1. That the responses to the consultation at Appendix 2 and Appendix 3 be noted.**
- 2. That the draft Statement of Principles attached at Appendix 1 be approved subject to the amendments referred to in the minute above, the exact wording to be delegated to the Head of Healthy Communities in consultation with the Chairman of the Licensing Committee.**
- 3. To recommend to Council to adopt the approved draft Statement of Principles at its meeting on 13 November 2018 for publication at least 4 weeks prior to coming into effect for the period 14 January 2019 to 13 January 2022.**
- 4. To request that Cabinet, at its meeting on 16 October 2018, consider the approved draft Statement of Principles and recommend to Council as set out in 3 above.**

- 5. To recommend to Council to resolve with effect from 14 January 2019 to 13 January 2022 not to issue casino premises licences in accordance with Section 166 of the Gambling Act 2005.**

Note: Councillor M Harrold entered the meeting at 6.45 pm but did not participate in the debate.

The meeting ended at 6.51 pm

SUBJECT:	<i>Taxi Licensing Update and Consultation on Statutory Guidance</i>
RESPONSIBLE OFFICER	<i>Martin Holt - Head of Healthy Communities</i>
REPORT AUTHOR	<i>Charlie Robinson – Licensing Manager</i>
WARD/S AFFECTED	<i>All Wards</i>

1. Purpose of Report

- 1.1 To inform Members of a consultation exercise undertaken by the Department for Transport, regarding Hackney Carriage and Private Hire statutory guidance, and to seek approval for the proposed Chiltern District Council response to the consultation.

RECOMMENDATIONS

- 1. Members note the content of the Department for Transport consultation relating to taxi and private hire licensing.**
- 2. Members approve officer's provisional response to be submitted to the Department of Transport as attached at Appendix 4 and direct officers to confirm that the provisional response can now be deemed final.**

2. Reasons for Recommendations

- 2.1 Responding to consultations of this nature allows the Council to feedback its views in relation to important matters and changes that could affect the service that it delivers.

3. Content of Report

3.1. Task and Finish Group

- 3.1.1 The Task and Finish Group (TFG) on Taxi and Private Hire Vehicle Licensing was established in September 2017. The group's remit was to consider evidence relating to the adequacy of current Taxi and Private Hire vehicle (PHV) licensing authority powers, as set out in legislation and guidance, and to make recommendations for actions to address any priority issues identified; specifically:

- Identifying the current priority concerns regarding the regulation of the sector, based on evidence of impact and scale across England;
- Considering, in particular, the adequacy of measures in the licensing system to address those issues;

- Considering whether it would advise the Government to accept the recommendations made in the Law Commission's May 2014 report on Taxi and PHV legislative reform relevant to the issues, and;
- Making specific and prioritised recommendations, legislative and non-legislative, for action to address identified and evidenced issues.

3.1.2 In September of 2018, the TFG published their findings in a report titled 'Taxi and Private Hire Vehicle Licensing: Steps towards a safer and more robust system' (full report available at Appendix 1). The report set out 34 recommendations, some of which were suggested to be already possible and should be implemented immediately, whilst others required further legislation.

3.1.3 One of the key recommendations was number 16:

'The Department for Transport must as a matter of urgency press ahead with consultation on a draft of its Statutory Guidance to local licensing authorities. The guidance must be explicit in its expectations of what licensing authorities should be doing to safeguard vulnerable passengers. The effectiveness of the guidance must be monitored in advance of legislation on national minimum standards.'

3.1.4 On 12th February 2019, the Government issued its response to the report of the TFG (Appendix 2).

3.2 The DfT first issued Best Practice Guidance to assist licensing authorities in England and Wales that have responsibility for the regulation of the Taxi and Private Hire vehicle (PHV) trades in 2006. Following consultation with stakeholders, taking into account their feedback on the original version, the Guidance was revised and updated in 2010.

3.3 The Policing and Crime Act 2017 enables the Secretary of State for Transport to issue Statutory Guidance on exercising Taxi and PHV licensing functions to protect children and vulnerable individuals who are over 18 from harm when using these services. On 12th February 2019 the government launched a consultation on the statutory guidance, the consultation version of the 'Taxi and Private Hire vehicle licensing - protecting users: statutory guidance for licensing authorities' is attached to the report at Appendix 3.

3.4 The government are now asking for local authorities to complete a consultation document which contains a number of questions specific to key parts of the draft guidance. Officers have prepared a response to the consultation which is available at Appendix 4.

7. Corporate Implications

7.1 At this early stage of the review process it is too early to be able to say what the resource implications or risks of these proposals might be. However, it is noted that there is likely to be resource implications whilst implementing and maintaining the changes that could result from the guidance.

8. Links to Council Policy Objectives

8.1 The implementation of this guidance would support the Council's objectives of working towards safe and healthier local communities and striving to conserve the environment and promote sustainability.

9. Next Steps

9.1 The next steps will be as stated in the recommendations.

Acknowledgement

In preparing this study and throughout the work of the Task and Finish Group the expertise, endeavour and understanding of its members has been exceptional.

Whilst preparing and writing this report I have been supported throughout this process by the officials at the Department for Transport; without exaggeration I conclude that none of what has been achieved would have been possible without the support of these officials who personify all that is admired about the British Civil Service.

I would like to wholeheartedly thank all those who have shared with the Group their valuable knowledge and experience in the trade and its regulation, and their views on the way forward.

Professor Mohammed Abdel-Haq

Chairman, the Task and Finish Group on Taxi and Private Hire Vehicle Licensing

Foreword

This report is about public wellbeing. Its genesis and mission were framed by the vision of the then Minister of State at the Department of Transport, the Rt. Hon. John Hayes CBE MP. In commissioning me to lead this vital work, he made clear that in his view the current regulatory regime for the taxi and private hire vehicle (PHV) sector is no longer fit for purpose.

In scoping the work together we were determined, above all, to chart a future which ensured public safety for all, a working environment for those in the trade which guaranteed fair working conditions and whilst maintaining a competitive, dynamic market, preserve the character, integrity and aesthetics of this time-honoured trade.

It is clear that the status quo whereby taxi and PHV licensing is inconsistent, ineffective and incompatible with the protection of vulnerable people must not be allowed to continue. Alongside other incidents of criminality, the events in Rotherham, Rochdale, Oxford and elsewhere have brought the fundamental flaws in the licensing regime into the sharpest possible focus; these oblige uncompromising determination to make taxis and PHVs safe for all.

Our efforts should also be informed by the Prime Minister's determination that the economy must work for all, and that those who, despite their hard work and skill, are 'just about managing' to provide for their families, must not become victims of the 'sweated economy' by those who accept little or no regard to the notion of social responsibility.

I have drawn on the insight of those who know best, and worked with a first-class group of colleagues. It is their sharp minds, commitment, professionalism and cool heads that have enabled the critical thinking and discussions that underpin my recommendations. Members of the Group have strongly held, sometimes polar opposite opinions and, while this means that it has not always been possible to reach a consensus, I am of no doubt that all have the best interests of passengers and the trade foremost in their thoughts. I am grateful to them all.

I learned from the collective wisdom of the Group that there is no single solution to the challenges facing the taxi and PHV sector. So, each aspect of this study and the consequent recommendation is dependent on others. The report aims to produce a holistic ecosystem and solution to the problems it was devised to address and, as a result, to set out a comprehensive platform for the changes necessary to protect and promote the public interests in the common good.

I would like to make it clear that it is in the public interest to allow, indeed encourage, competitive markets. The arrival of new businesses and new modes of business are the healthy expressions of a market economy. So, provided that public safety and employee working conditions are assured and that appropriate emphasis is placed on congestion, air quality and similar concerns, market change can be welcome.

Licensing conditions should be demanding, arguably to a greater degree than at present, but should not, in effect, prohibit market entry for new businesses.

As my task is now complete, the onus falls to the Secretary of State for Transport Chris Grayling, MP and his Ministers, in particular Nusrat Ghani, and Parliamentarians to take the ideas of the report further and to begin to craft the legislation that it will, in some instances, require. In other instances, I trust that Parliament and the Department will lead the cultural change which is necessary to ensure that passengers, workers, operators, and neighbouring authorities are treated fairly. I look forward to the Government's prompt response to this report in order to maintain the momentum for improvement. Undue delay would risk public safety.

Professor Mohammed Abdel-Haq

Chairman, the Task and Finish Group on Taxi and Private Hire Vehicle Licensing.

1. List of Recommendations

Recommendation 1

Notwithstanding the specific recommendations made below, taxi and PHV legislation should be urgently revised to provide a safe, clear and up to date structure that can effectively regulate the two-tier trade as it is now.

Recommendation 2

Government should legislate for national minimum standards for taxi and PHV licensing - for drivers, vehicles and operators (**see recommendation 6**). The national minimum standards that relate to the personal safety of passengers must be set at a level to ensure a high minimum safety standard across every authority in England.

Government must convene a panel of regulators, passenger safety groups and operator representatives to determine the national minimum safety standards. Licensing authorities should, however, be able to set additional higher standards in safety and all other aspects depending on the requirements of the local areas if they wish to do so.

Recommendation 3

Government should urgently update its Best Practice Guidance. To achieve greater consistency in advance of national minimum standards, licensing authorities should only deviate from the recommendations in exceptional circumstances. In this event licensing authorities should publish the rationale for this decision.

Where aspects of licensing are not covered by guidance nor national minimum standards, or where there is a desire to go above and beyond the national minimum standard, licensing authorities should aspire to collaborate with adjoining areas to reduce variations in driver, vehicle and operator requirements. Such action is particularly, but not exclusively, important within city regions.

Recommendation 4

In the short-term, large urban areas, notably those that have metro mayors, should emulate the model of licensing which currently exists in London and be combined into one licensing area. In non-metropolitan areas collaboration and joint working between smaller authorities should become the norm.

Government having encouraged such joint working to build capacity and effectiveness, working with the Local Government Association, should review progress in non-metropolitan areas over the next three years.

Recommendation 5

As the law stands, 'plying for hire' is difficult to prove and requires significant enforcement resources. Technological advancement has blurred the distinction between the two trades.

Government should introduce a statutory definition of both 'plying for hire' and 'pre-booked' in order to maintain the two-tier system. This definition should include reviewing the use of technology and vehicle 'clustering' as well as ensuring taxis retain the sole right to be hailed on streets or at ranks.

Government should convene a panel of regulatory experts to explore and draft the definition.

Recommendation 6

Government should require companies that act as intermediaries between passengers and taxi drivers to meet the same licensing requirements and obligations as PHV operators, as this may provide additional safety for passengers (e.g. though greater traceability).

Recommendation 7

Central Government and licensing authorities should 'level the playing field' by mitigating additional costs faced by the trade where a wider social benefit is provided – for example, where a wheelchair accessible and/or zero emission capable vehicle is made available.

Recommendation 8

Government should legislate to allow local licensing authorities, where a need is proven through a public interest test, to set a cap on the number of taxi and PHVs they license. This can help authorities to solve challenges around congestion, air quality and parking and ensure appropriate provision of taxi and private hire services for passengers, while maintaining drivers' working conditions.

Recommendation 9

All licensing authorities should use their existing powers to make it a condition of licensing that drivers cooperate with requests from authorised compliance officers in other areas. Where a driver fails to comply with this requirement enforcement action should be taken as if the driver has failed to comply with the same request from an officer of the issuing authority.

Recommendation 10

Legislation should be brought forward to enable licensing authorities to carry out enforcement and compliance checks and take appropriate action against any taxi or PHV in their area that is in breach of national minimum standards (**recommendation 2**) or the requirement that all taxi and PHV journeys should start and/or end within the area that issued the relevant licences (**recommendation 11**).

Recommendation 11

Government should legislate that all taxi and PHV journeys should start and/or end within the area for which the driver, vehicle and operator (PHV and taxi – see **recommendation 6**) are licensed. Appropriate measures should be in place to allow specialist services such as chauffeur and disability transport services to continue to operate cross border.

Operators should not be restricted from applying for and holding licences with multiple authorities, subject to them meeting both national standards and any additional requirements imposed by the relevant licensing authority.

Recommendation 12

Licensing authorities should ensure that their licensing, administration and enforcement functions are adequately resourced, setting fees at an appropriate level to enable this.

Recommendation 13

Legislation should be introduced by the Government as a matter of urgency to enable Transport for London to regulate the operation of pedicabs in London.

Recommendation 14

The Department for Transport and Transport for London should work together to enable the issue of Fixed Penalty Notices for both minor taxi and PHV compliance failings. The Department for Transport should introduce legislation to provide all licensing authorities with the same powers.

Recommendation 15

All ridesharing services should explicitly gain the informed consent of passengers at the time of a booking and commencement of a journey.

Recommendation 16

The Department for Transport must as a matter of urgency press ahead with consultation on a draft of its Statutory Guidance to local licensing authorities. The guidance must be explicit in its expectations of what licensing authorities should be doing to safeguard vulnerable passengers. The effectiveness of the guidance must be monitored in advance of legislation on national minimum standards.

Recommendation 17

In the interests of passenger safety, particularly in the light of events in towns and cities like Rochdale, Oxford, Newcastle and Rotherham, all licensed vehicles must be fitted with CCTV (visual and audio) subject to strict data protection measures. Licensing authorities must use their existing power to mandate this ahead of inclusion in national minimum standards.

To support greater consistency in licensing, potentially reduce costs and assist greater out of area compliance, the Government must set out in guidance the standards and specifications of CCTV systems for use in taxis and PHVs. These must then be introduced on a mandatory basis as part of national minimum standards.

Recommendation 18

As Government and local authorities would benefit from a reduction in crime in licensed vehicles both should consider ways in which the costs to small businesses of installing CCTV can be mitigated.

Recommendation 19

National standards must set requirements to assist the public in distinguishing between taxis, PHVs and unlicensed vehicles. These should require drivers to have on display (e.g. a clearly visible badge or arm-band providing) relevant details to assist the passengers in identifying that they are appropriately licensed e.g. photograph of the driver and licence type i.e. immediate hire or pre-booked only.

All PHVs must be required to provide information to passengers including driver photo ID and the vehicle licence number, in advance of a journey. This would enable all passengers to share information with others in advance of their journey. For passengers who cannot receive the relevant information via digital means this information should be available through other means before passengers get into the vehicle.

Recommendation 20

All drivers must be subject to enhanced DBS and barred lists checks. Licensing authorities should use their existing power to mandate this ahead of inclusion as part of national minimum standards.

All licensing authorities must require drivers to subscribe to the DBS update service and DBS checks should must be carried out at a minimum of every six months. Licensing authorities must use their existing power to mandate this ahead of inclusion as part of national standards.

Recommendation 21

Government must issue guidance, as a matter of urgency, that clearly specifies convictions that it considers should be grounds for refusal or revocation of driver licences and the period for which these exclusions should apply. Licensing authorities must align their existing policies to this ahead of inclusion in national minimum standards.

Recommendation 22

The Quality Assurance Framework and Common Law Police Disclosure Provisions must be reviewed to ensure as much relevant information of conduct as well as crimes, by taxi and PHV drivers (and applicants) is disclosed ensuring that licensing authorities are informed immediately of any relevant incidents.

Recommendation 23

All licensing authorities must use the National Anti-Fraud Network (NAFN) register of drivers who have been refused or had revoked taxi or PHV driver licence. All those cases must be recorded, and the database checked for all licence applications and renewals. Licensing authorities must record the reasons for any refusal, suspension or revocation and provide those to other authorities as appropriate. The Government must, as a matter of urgency, bring forward legislation to mandate this alongside a national licensing database (**recommendation 24**).

Recommendation 24

As a matter of urgency Government must establish a mandatory national database of all licensed taxi and PHV drivers, vehicles and operators, to support stronger enforcement.

Recommendation 25

Licensing authorities must use their existing powers to require all drivers to undertake safeguarding/child sexual abuse and exploitation awareness training including the positive role that taxi/PHV drivers can play in spotting and reporting signs of abuse and neglect of vulnerable passengers. This requirement must form part of future national minimum standards.

Recommendation 26

All individuals involved in the licensing decision making process (officials and councillors) must be obliged to undertake appropriate training. The content of the training must form part of national minimum standards.

Recommendation 27

Government must review the assessment process of passenger carrying vehicle (PCV) licensed drivers and/or consideration of the appropriate boundary between taxis/PHVs and public service vehicles (PSVs).

Recommendation 28

Licensing authorities must require that all drivers are able to communicate **in English** orally and in writing to a standard that is required to fulfil their duties, **including in emergency and other challenging situations.**

Recommendation 29

All licensing authorities should use their existing powers to require that the taxi and PHV drivers they license undergo disability quality and awareness training. This should be mandated in national minimum standards.

Recommendation 30

Licensing authorities that have low levels of wheelchair accessible vehicles (WAVs) in their taxi and PHV fleet should ascertain if there is unmet demand for these vehicles. In areas with unmet demand licensing authorities should consider how existing powers could be used to address this, including making it mandatory to have a minimum number of their fleet that are WAVs. As a matter of urgency, the Government's Best Practice Guidance should be revised to make appropriate recommendations to support this objective.

Recommendation 31

Licensing authorities which have not already done so should set up lists of wheelchair accessible vehicles (WAVs) in compliance with s.167 of the Equality Act 2010, to ensure that passengers receive the protections which this provides.

Recommendation 32

Licensing authorities should use their existing enforcement powers to take strong action where disability access refusals are reported, to deter future cases. They should also ensure their systems and processes make it as easy as possible to report disability access refusals.

Recommendation 33

The low pay and exploitation of some, but not all, drivers is a source of concern. Licensing authorities should take into account any evidence of a person or business flouting employment law, and with it the integrity of the National Living Wage, as part of their test of whether that person or business is "fit and proper" to be a PHV or taxi operator.

Recommendation 34

Government should urgently review the evidence and case for restricting the number of hours that taxi and PHV drivers can drive, on the same safety grounds that restrict hours for bus and lorry drivers.

2. Group membership and task

Introduction

- 1 The Task and Finish Group was brought together between July and August 2017 by the then Minister of State for Transport the Rt Hon John Hayes CBE MP, and met for the first time in September 2017.
- 2 The Group's objectives were confirmed in the Terms of Reference agreed by its members. The Group was tasked with:
 - Considering evidence relating to the adequacy of current taxi and PHV licensing authority powers, as set out in legislation and guidance, making recommendations for actions to address any priority issues identified. Specifically:
 - Identifying the current priority concerns regarding the regulation of the sector, based on evidence of impact and scale across England;
 - Considering, in particular, the adequacy of measures in the licensing system to address those issues;
 - Considering whether it would advise the Government to accept the recommendations made in the Law Commission's May 2014 report on taxi and PHV legislative reform relevant to the issues, and;
 - Making specific and prioritised recommendations, legislative and non-legislative, for action to address identified and evidenced issues.

Chairman of the Task and Finish Group

Mohammed Abdel-Haq is a professor in Banking and a Director of the Centre for Islamic Finance at the University of Bolton. Prof Abdel-Haq has a wealth of practical experience in a long career in banking in major financial institutions including Citi Bank, Deutsche Bank, and HSBC. He is the CEO of Oakstone Merchant Bank, Director of the Centre for Opposition Studies at the University of Bolton.

Professor Abdel-Haq was a member of the Council of the Royal Institute for International Affairs (Chatham House) from 2011-2014. In 2011 Prof Abdel-Haq was appointed Chairman of the UK Ministerial Advisory Group on Extremism in Universities and FE Colleges. He was Vice President of The Disability Partnership. Several of his articles on various issues related to public life have been published. Prof Abdel-Haq is a Freeman of the City of Oxford, a member of Amnesty International, a Fellow of the Royal Society of Arts. Prof Abdel-Haq was a Prospective Parliamentary Candidate for Swansea West in the 2005 General Election.

- 3 Membership of the Task and Finish Group:
 - Helen Chapman - Director of Licensing, Regulation & Charging, Transport for London
 - Rt Hon Frank Field MP - - Member of Parliament for Birkenhead
 - Saskia Garner - Policy Officer, Personal Safety, the Suzy Lamplugh Trust
 - Ellie Greenwood - Senior Adviser (Regulation), Local Government Association
 - Dr Michael Grenfell - Executive Director, Enforcement, Competition and Markets Authority
 - Anne Main MP - Member of Parliament for St Albans
 - Steve McNamara - General Secretary, Licensed Taxi Drivers' Association
 - Mick Rix - National Officer for Transport and Distribution, GMB union
 - Donna Short - Director, National Private Hire and Taxi Association
 - Steve Wright MBE - Chairman, Licensed Private Hire Car Association
- 4 To ensure that the Group heard views from a wide cross-section of the sector, it sought written evidence from a range of stakeholders, and further invited a selection of organisations to give oral evidence to the Group. The Group received submissions from 39 organisations and heard evidence from 11.
- 5 Secretariat functions for the Group were provided by officials in the Department for Transport.
- 6 Group members were each able to submit a short summary of their views of this report if they wished to do so; those summaries are attached at Annex A.

3. Market function and regulation

Current regulation

- 3.1 The UK Government is responsible for setting the regulatory structure within which local licensing authorities in England license the taxi and PHV trade. Regulation of taxi drivers in Scotland, Wales and Northern Ireland is devolved to the Scottish Government, Welsh Government and Northern Irish Assembly respectively. This report is focussed on the sector in England only.
- 3.2 Taxi and PHV licensing in England is decentralised; there are 293 licensing authorities. The national legislation is enabling in its nature, giving licensing authorities the discretion to set standards for drivers, vehicles and PHV operators that they deem to be appropriate. There are significant variations in both policy and practice between licensing authorities.

A changing industry

- 3.3 The Task and Finish Group heard from many stakeholders about the age of the legislation that underpins taxi and PHV licensing, and how it is no longer fit for the modern world. Taxi licensing in England outside Greater London rests on the Town Police Clauses Act of 1847, which of course pre-dates the motor car. PHV licensing outside Greater London rests on the Local Government (Miscellaneous Provisions) Act 1976; significantly less old, but still pre-dating the mobile phone and the internet, both of which are increasingly important means of booking taxis and PHVs. Greater London PHV legislation is newer still, passed in 1998, but this still pre-dates near universal mobile phone use, and smartphone apps.¹
- 3.4 Legislation has been out of date for many years now, but it seems that the rise of smartphone booking apps, in particular, has thrown the need for an urgent update on legislation into sharp focus. PHV legislation was written for a world where radio signals were unlikely to reach outside the licensing authority area, and people had to go to a local minicab office, or telephone it using a landline, to book a car. The new way of using apps to book PHVs has an ease (as well as safety features and usually value for money) that has proved very popular with passengers, but the law was not written with such technology in mind and so it can be hard to apply to what is happening in reality.
- 3.5 The effectiveness of the highly localised taxi and PHV licensing system has become unsustainable in the face of new internet and smartphone app-based technology and the public's widespread adoption of those methods of arranging taxi and PHV trips. Government, both central and local, should acknowledge such changes and manage

¹ For simplicity, this report does not describe the separate legislation that licenses PHVs in Plymouth, the Plymouth City Council Act 1975. For the level of detail in this report, it is sufficient to say that its provisions are broadly the same as those in the Local Government (Miscellaneous Provisions) Act 1976.

them to ensure that alongside the benefits being achieved, any negatives are minimised for passengers, the trade and wider communities.

- 3.6 We should also recognise that the changes in how the sector works are being driven by public demand. It is unacceptable to require the public to restrict its reasonable demands to support an outdated framework. It is the market and regulation that must adapt while maintaining high standards.
- 3.7 This report makes a number of specific recommendations about what Government and licensing authorities should do with their taxi and PHV powers, but there is an urgent overarching need to update legislation to reflect much better the reality of the way the trade is operating today. The Government implicitly acknowledged as much by asking the Law Commission to review the legislation in 2011, and it is deeply regrettable that the Government has not yet responded to the report and draft bill which the Commission subsequently published in 2014. Had the Government acted sooner the concerns that led to the formation of this Group may have been avoided.

Recommendation 1

Notwithstanding the specific recommendations made below, taxi and PHV legislation should be urgently revised to provide a safe, clear and up to date structure that can effectively regulate the two-tier trade as it is now.

- 3.8 Regardless of technological change, the Government should legislate for national minimum standards for the licensing of drivers, vehicles and operators. These minimum standards should be set at a high but still proportionate level that would in practice reduce the need (actual or perceived) for individual authorities to add their own further checks or conditions - **'minimum' should not be understood or treated as meaning 'minimal'**.
- 3.9 The current level of discretion given to local licensing authorities has resulted in very significant and unacceptable variations in standards. Failures by some authorities to uphold high standards for the assessment of drivers, for example, have contributed to the involvement of the taxi and PHV trade in well-documented sexual abuse and exploitation of hundreds of children.
- 3.10 Significant variation in standards and the application of these in the licensing of drivers provides an opportunity for individuals to 'forum shop' for licences. Although factors such as service levels and total licensing cost (i.e. inclusive of fees and training requirements) may provide the motivation for most individuals that seek to obtain a licence from an authority other than that in which they intend to predominantly work, this also enables individuals who would not be deemed 'fit and proper' by one authority to potentially obtain a licence elsewhere. The Government has a responsibility to set a national framework that enables safe and effective licensing, and local authorities have a wider responsibility towards all people both within and beyond their boundaries. Better information sharing amongst authorities is also essential, and this is discussed further in Chapter Four.
- 3.11 The Law Commission recommended that all PHV standards should be set at a national level without the ability for licensing authorities to add additional local conditions, but that taxi standards should be 'minimum standards' which could be supplemented locally. This, in the Commission's view, reflected the more localised

nature of taxi markets, particularly the ability to be hired immediately on the street and the requirement for local knowledge that this brings.

- 3.12 However, other recommendations made in this report would restore the link between licensing authorities and PHVs operating in their area and so national minimum standards are more appropriate in this framework. Taxis and PHVs serve a range of very different localities across England, and local licensing authorities should not be prevented from applying extra conditions to their drivers or vehicles where there is an evidenced need. An example of this might be vehicle conditions, to help address local air quality challenges.

Recommendation 2

Government should legislate for national minimum standards for taxi and PHV licensing - for drivers, vehicles and operators (**see recommendation 6**). The national minimum standards that relate to the personal safety of passengers must be set at a level to ensure a high minimum safety standard across every authority in England.

Government must convene a panel of regulators, passenger safety groups and operator representatives to determine the national minimum safety standards. Licensing authorities should, however, be able to set additional higher standards in safety and all other aspects depending on the requirements of the local areas if they wish to do so.

- 3.13 In advance of national minimum standards, the Department for Transport's Best Practice Guidance should be updated; both this and the forthcoming Statutory Guidance should be more directive, to make clearer the requirements and standards that the Government considers are necessary.
- 3.14 All licensing authorities should adopt the Department's recommendations, which should be viewed as the pre-cursors to national minimum standards. Early adoption of these recommendations will therefore assist in the transition for the industry. It will also assist joint working by licensing authorities and in particular support stronger cross-border enforcement activity. The Task and Finish Group heard about current and developing best practice in areas such as Merseyside, West Yorkshire and Greater Manchester. Common standards are the keystone of effective enforcement within regions, giving enforcement officers one set of rules to check drivers and vehicles against, regardless of which authority issued the licences.
- 3.15 There are few barriers that prevent the licensing of operators and drivers in multiple areas, but this is not true for the licensing of vehicles, as requirements in different areas may be contradictory. These variations can include colour; livery; vehicle age restriction both at first licensing and maximum age; whether tinted windows are permissible; seat configuration; engine size (or if electric vehicles can be licensed); and visible signage/ID conditions. It is in the interest of licensing authorities (ease of enforcement), passengers (increased availability) and the trade (increased flexibility to meet demand) for multiple licensing to be possible.

Recommendation 3

Government should urgently update its Best Practice Guidance. To achieve greater consistency in advance of national minimum standards, licensing authorities should only deviate from the recommendations after very careful consideration and in exceptional circumstances. In this event licensing authorities should publish the rationale for this decision.

Where aspects of licensing are not covered by guidance nor national minimum standards, or where there is a desire to go above and beyond the national minimum standard, licensing authorities should aspire to collaborate with adjoining areas to reduce variations in driver, vehicle and operator requirements. Such action is particularly, but not exclusively, important within city regions.

- 3.16 In the long term, greater consistency in licensing that will result from national minimum standards raises the question of the appropriate 'level' of taxi and PHV licensing - that is, which administrative level should undertake this function.
- 3.17 The licensing regime should be rationalised. People are increasingly mobile and the licensing regime should reflect the way in which the public use taxi and PHV services. There may be significant benefits to raising the administrative level of taxi/PHV licensing in some areas, whether as part of wider reform or as a distinct proposal.
- 3.18 An example of the benefits that may accrue from raising the licensing level can be seen in the way the system operates in Greater London in comparison to other large urban areas. Transport for London licenses 108,709 vehicles and 142,199 drivers. By way of contrast, Greater Manchester has 10 authorities licensing a total of 13,392 vehicles and 18,085 drivers².
- 3.19 Without Transport for London, London's 33 local authority districts would be able to set its own policies, requirements, taxi fare rates etc. In addition, each of these would have to replicate the associated administration, likely resulting in increased licensing costs which may ultimately increase passenger fares. Importantly, this would also result in immense enforcement problems in the absence of agreements between the districts to enable their enforcement officers to take action against each other's licensees.
- 3.20 The variance in the costs of obtaining licences (fees and to meet requirements) in different licensing areas within one conurbation can be considerable, by matters of hundreds of pounds. The example of licensing in Greater Manchester was highlighted in the Urban Transport Group's report 'Issues and options for city region taxi and private hire vehicle policy'³ (see fig. 1). The time and cost it takes to obtain a licence can also vary greatly and influence licensing behaviour, exacerbating the number of 'out-of-area' drivers. It is unsurprising that a driver, who is indeed fit and proper by any measure, may still choose to license in a neighbouring authority even if the costs are higher if they will get their licence in a few months rather than two years, and therefore start earning much sooner.
- 3.21 It has not been possible within the timeframe of the Task and Finish Group to make a recommendation as to precisely which authorities (and how many) should be

² Data as of 31 March 2017 - <https://www.gov.uk/government/statistics/taxi-and-private-hire-vehicles-statistics-england-2017>

³ http://www.urbantransportgroup.org/system/files/general-docs/UTG%20Taxi%20Report_FINALforweb.pdf

responsible for taxi/PHV licensing across the country. However, direct electoral accountability must be maintained to ensure that the needs of all residents in any expanded licensing areas are considered.

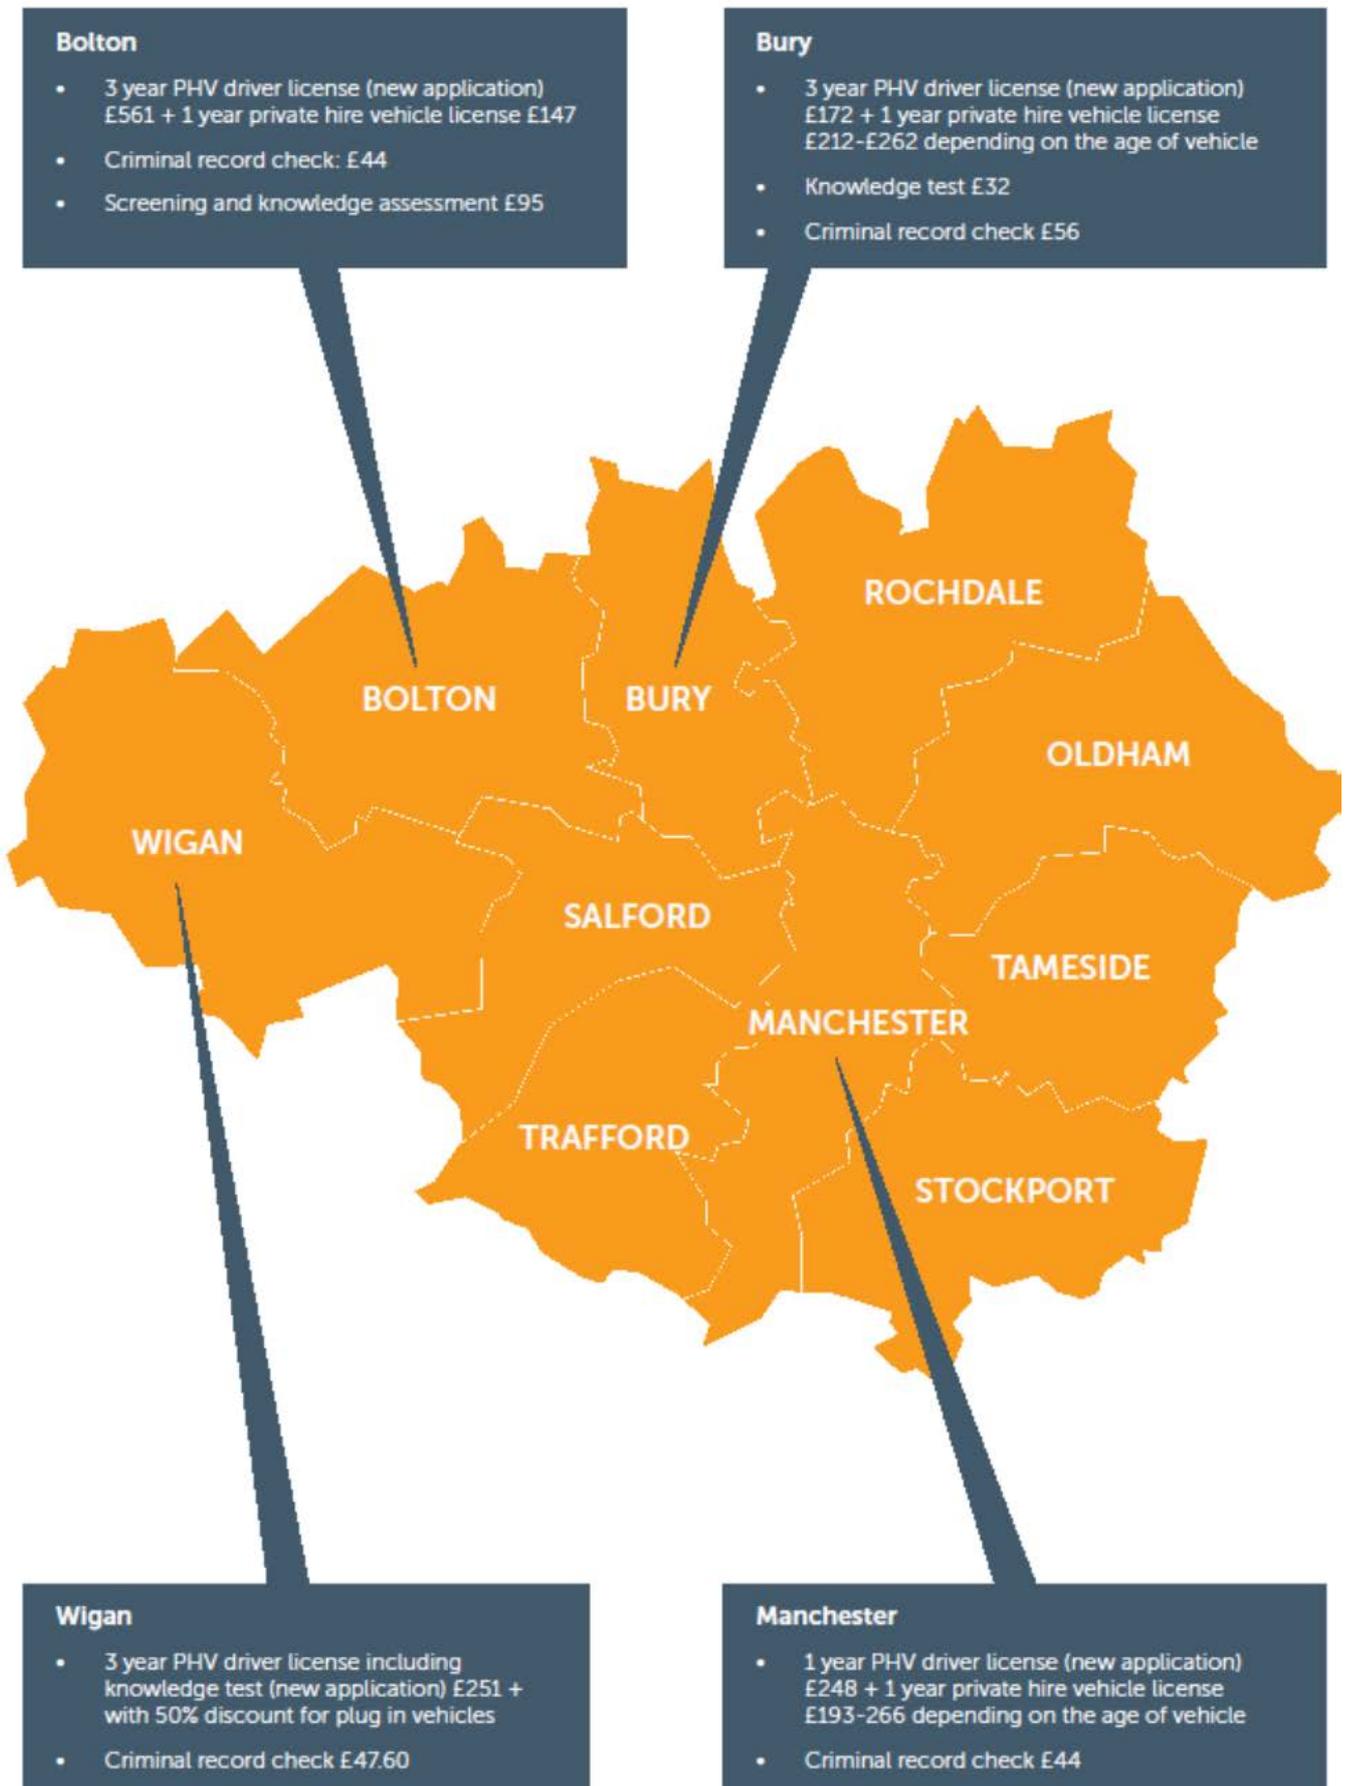

- 3.22 There seems a clear case that large urban areas, particularly those with Metro Mayors, should each be covered by one taxi and PHV licensing authority. Outside those areas, Government should strongly encourage much greater collaboration and joint working between neighbouring authorities, and subsequently review over time whether formal consolidation of more licensing areas is needed.
- 3.23 Where taxi licensing is concerned, larger licensing authorities areas could still retain more localised requirements of taxi regulation, such as quantity restrictions, fare setting, local knowledge testing at the same granular level as now (if deemed beneficial) through the use of taxi zones as are already used in a number of licensing authority areas.

Recommendation 4

In the short term, large urban areas, notably those that have metro mayors, should emulate the model of licensing which currently exists in London and be combined into one licensing area. In non-metropolitan areas collaboration and joint working between smaller authorities should become the norm.

Government having encouraged such joint working to build capacity and effectiveness, working with the Local Government Association, should review progress in non-metropolitan areas over the next three years

Figure 1 - Licensing in Greater Manchester ⁴

⁴ <http://www.urbantransportgroup.org/resources/types/reports/taxi-issues-and-options-city-region-taxi-and-private-hire-vehicle-policy>

The two tier system

- 3.24 Only taxis are available for immediate hire, be it hailed in the street or at a designated rank. Nevertheless, the potentially very short gap between booking a PHV via an app and getting in the vehicle, may appear similar to members of the public to getting a taxi. Indeed the speed and convenience of using an app might be an easier and more attractive option in some circumstances than hailing a taxi.
- 3.25 This increased ease and speed of PHV hiring has significantly eroded the differentiation in service and the potential additional earnings that taxis' ability to ply for hire can provide. The regulation of the sector has not adapted to reflect this erosion. The Task and Finish Group unanimously agreed that there is still merit in the two-tier taxi and PHV system. For example, the setting of maximum fare tariffs for taxis provides an important element of passenger protection, as people are not able to research fares with alternative providers when hiring immediately. This can protect both visitors to an area, who may have no notion of the distance of their journey and what this might reasonably cost, and also local residents who are protected from the charging of excessively high fares when demand is high. At the same time, the unregulated fares of PHVs enable price competition to the benefit of many consumers.
- 3.26 The Group received many submissions which requested that a statutory definition of 'plying for hire' and 'pre-booked' should be introduced to make clearer the different services that taxis and PHVs can provide.
- 3.27 The Law Commission deliberated whether 'plying for hire' should be defined as part of its work, and ultimately recommended that different terms should be defined. In my view, if we are to be supportive of the two-tier system, it is inevitable that we must be able to effectively distinguish those two tiers. Defining 'plying for hire' is essential to that.

Recommendation 5

As the law stands, 'plying for hire' is difficult to prove and requires significant enforcement resources. Technological advancement has blurred the distinction between the two trades.

Government should introduce a statutory definition of both 'plying for hire' and 'pre-booked' in order to maintain the two-tier system. This definition should include reviewing the use of technology and vehicle 'clustering' as well as ensuring taxis retain the sole right to be hailed on streets or at ranks.

Government should convene a panel of regulatory experts to explore and draft the definition.

- 3.28 Taxi 'radio circuits' or taxi smart phone apps undertake a similar function as PHV operators but are not subjected to a 'fit and proper test' as they do not require a licence. PHV operators are under an obligation to ensure that the drivers and vehicles used are licensed by the same authority and that vehicles are insured and in a suitable condition.
- 3.29 A freedom of information request found that in in the 12-month period running from 08 January 2016 to 07 January 2017, 1,290 Transport for London licensed taxis were reported for not having a second MOT test, six months from the date the taxi licence

was granted. However, it is unknown whether any of these vehicles were used for 'taxi radio circuit' work. Transport for London's data for the period April to December 2017 indicated that 27.1% of PHVs and 35.8% of taxis stopped were non-compliant⁵. In both cases, the total number non-compliant vehicles may be higher as these vehicles were identified as a result of 'on-street' enforcement.

- 3.30 It is true, of course, that unlike PHVs where there must be an operator to take a booking for the transaction to be legal, taxis are able to ply for hire. The booking recording function of a PHV operator evidences that a journey has been pre-booked and is essential in ensuring compliance and preventing a PHV from working illegally as a taxi. However, data from Transport for London's Black cabs and Minicabs Customer Satisfaction Survey (Q3 2016/17) evidence that a decreasing proportion of taxi journeys are engaged by hailing or at a rank, down from 83% in 2013 to 66% in 2016. This trend suggests that it is now appropriate for these intermediaries to be regulated in the same way as PHV operators are.

Recommendation 6

Government should require companies that act as intermediaries between passengers and taxi drivers to meet the same licensing requirements and obligations as PHV operators, as this may provide additional safety for passengers (e.g. though greater traceability).

- 3.31 Central Government and local regulators must acknowledge that new technology has fundamentally changed the market and act if the two-tier system is to remain viable. The competition between taxis and PHVs has increased, but taxis are often subject to additional regulation and, where purpose built vehicles are required, significantly higher costs than their PHV counterparts. If the benefits of a two tier system (e.g. there is a higher proportion of wheelchair accessible vehicles (WAVs) in the taxi fleet) are to be maintained, regulators should consider ways to support the taxi trade. The way to do this is not by 'punishing' the PHV trade, but by reducing the additional cost burden that WAV owners face.
- 3.32 Central Government has already recognised the different costs the two sectors can face; the maximum Plug-in-Taxi Grant (for the purchase of wheelchair accessible zero-emission capable (ZEC) purpose-built taxis) is £7,500, compared to the £4,500 maximum Plug-in-Car Grant available for other vehicles; this kind of approach should be explored further. Government and licensing authorities should explore additional financial assistance that could be provided to off-set the additional costs of WAV and/or ZEC vehicles.
- 3.33 There are various mechanisms that could encourage more rapid adoption of ZEC vehicles in area where air quality is or may become an issue; Transport for London's delicensing scheme, for example, provides a payment of up to £5,000 to delicense older (10+ years old) vehicles. All new taxis licensed by Transport for London must now be ZEC.
- 3.34 Taxis, particularly in London, are perceived by the public as reliable "work horses" on the roads for long hours every day. This perception could be at the forefront of changing opinions and attitudes towards electric vehicles, in general, and specifically

⁵ <https://tfl.gov.uk/cdn/static/cms/documents/phv-licensing-compliance-and-enforcement-january-2018.pdf>

as viable options for commercial and small goods vehicles. The wider benefits of supporting drivers to get such vehicles on the roads could be considerable.

- 3.35 Funding could be allocated to subsidise a tiered taxi and PHV licensing structure that exempts or reduces fees for zero emission capable vehicles and/or those which are wheelchair accessible. This would assist those who make the additional investment to use wheelchair and/or accessible vehicles such as the 'black cab' and reflect the additional benefits these would provide the public.

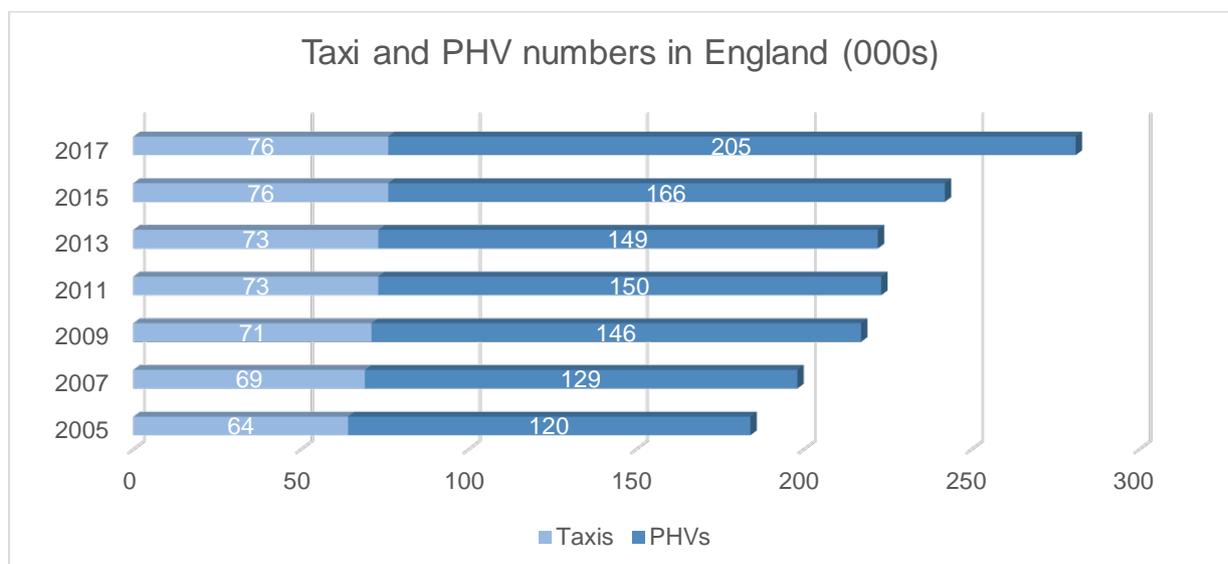

Recommendation 7

Central Government and licensing authorities should 'level the playing field' by mitigating additional costs faced by the trade where a wider social benefit is provided – for example, where a wheelchair accessible and/or zero emission capable vehicle is made available.

A growing industry

- 3.36 The sector has seen rapid growth in recent years. The total number of licensed taxis and PHVs in England reached record levels in 2017, increasing by 26% since 2011 to 281,000⁶. This growth has not been uniform across the two tiers, but was driven by the 37% increase in PHVs over the period, compared to the 3% increase in taxis. In 2017, 73% of all licensed vehicles in England were PHVs; in 2011 this proportion was 67%.
- 3.37 The increase in licensing numbers is also inconsistent across England; to give just some examples, the number of PHVs licensed by Transport for London increased by 39% between 2011 and 2017 to 87,400; in the same period, the number of PHVs licensed by Wolverhampton City Council increased by 434% to 2,949; but decreased by 37% in Tandridge District Council to just 46.

Figure 2 - Taxis and PHVs in England (DfT survey 2017)⁷

⁶ <https://www.gov.uk/government/statistics/taxi-and-private-hire-vehicles-statistics-england-2017>

⁷ https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/642761/taxi-private-hire-vehicles-2017.zip

- 3.38 Currently, licensing authorities outside Greater London have the ability to restrict the number of taxis they license. As of 31 March 2017, 90 English authorities do, to balance the supply and demand of services. Legislation does not currently allow PHV licences to be restricted in such a way, and the Group received a number of submissions arguing in favour of changing this.
- 3.39 Granting licensing authorities the power to cap the number of PHVs could give them an extra tool to help reduce levels of congestion in areas where high numbers of PHVs operate and thereby address in part air quality issues. To use the power for those purposes would require a public interest approach, not merely the "unmet demand" test currently applied to allow the limiting of taxi numbers.
- 3.40 There are potential drawbacks to licence restriction, including administrative burden, restriction of competition and restriction of work opportunities for drivers. Carrying out a clear, well evidenced and considered public interest test before a numbers restriction can be applied would enable an authority to weigh up those factors and make a balanced decision.
- 3.41 This matter was considered as part of the Law Commission's review, albeit in the case of taxis rather than PHVs, but their consideration of what a public interest test should include could equally apply to both segments of the trade. Any test should include matters such as:
- the interests of taxi and PHV users, particularly those of disabled people
 - the interests of licensees
 - the need to avoid traffic congestion, and
 - the need to preserve the environment
 - and for taxis, the need to avoid excessive queues at ranks

Recommendation 8

Government should legislate to allow local licensing authorities, where a need is proven through a public interest test, to set a cap on the number of taxi and PHVs they license. This can help authorities to solve challenges around congestion, air quality and parking and ensure appropriate provision of taxi and private hire services for passengers, while maintaining drivers' working conditions.

Cross-border and out-of-area working

Background

- 3.42 Although taxis and PHVs are locally licensed, the passenger journeys they can carry out are not restricted solely to their licensed area.

Cross-border / out of area working: a simplified summary

- **Taxis** can only ply for hire (to be flagged down or hired from a rank) in their licensed area, but can generally undertake pre-booked work anywhere.
- A **PHV** driver, vehicle and operator must all be licensed in the same area for a journey to be carried out legally - but the journey itself does not need to be in that licensed area: e.g. a London-licensed vehicle and driver can be booked through a London-licensed operator to carry out a passenger journey that takes place entirely in St Albans.
- A **PHV** booking can also be sub-contracted: e.g. a St Albans-licensed operator could take a booking, and arrange for another operator to carry it out: this could be another St Albans-licensed operator, or an operator licensed by any other authority, who would need to fulfil the booking using a driver and vehicle licensed by the same authority as they are.

- 3.43 The ability for a PHV journey to take place anywhere, so long as the driver, vehicle and operator are all licensed by the same authority, comes from the original licensing legislation (the 1998 Act for London, and the 1976 Act elsewhere). It was always possible for a PHV operator to sub-contract a booking to an operator licensed in the same area. Greater London operators have always been able to sub-contract bookings to operators in other areas, and that ability was extended to PHV operators outside Greater London by Section 11 of the Deregulation Act 2015.
- 3.44 Although all PHV operators have always been able to accept bookings regardless of the start and end point of a journey, in practice the advertising of their services and the ability of operators to maintain contact with drivers reduced the likelihood of booking requests from distant locations being received.

The issue

- 3.45 New technology has changed the landscape. The members of the public who use apps for booking PHVs carry with them the ability to request a vehicle anywhere. It is not necessary for the subcontracting process to be undertaken to facilitate the dispatching of an out of area driver to fulfil a booking. An operator could currently, if it chose to, operate nationally on a single licence. It is unlikely that this is what was intended when the legislation was drawn up, and it underlines that it is no longer fit for purpose.
- 3.46 Not all 'cross-border' work is a concern: many journeys will naturally start within one licensing authority and end in another, and the framework should allow this. In areas near to the boundaries of licensing authorities, and particularly in city and urban locations with multiple authorities, there will be high levels of cross-border working. Operators will sometimes fulfil bookings out of their licensing area to reduce dead

mileage, or meet vehicle type requirements (e.g. wheelchair accessible vehicles) when none are available locally. A passenger may have confidence in the safety and quality of a service that a particular operator provides and would prefer to use that favoured operator regardless of the start and/or end points of their journey. This is perhaps more likely in the executive and chauffeur segment of the PHV market.

- 3.47 However, the Group have heard from many sources about the increasing numbers of drivers who now work entirely at (sometimes considerable) distance from the authority that licensed them. The Group saw no evidence of precise numbers but anecdotal evidence is that it is widespread, particularly of drivers licensed by Transport for London but living in cities far away making it highly unlikely that they would travel to London before working. Figure 3 show a map of the home addresses of Transport for London licensed drivers by postcode.
- 3.48 It is difficult for licensing authorities to be effective in monitoring the activities of drivers who are working in this way. The enforcement officers of one authority cannot undertake enforcement action against taxis or PHVs licensed by other authorities. An authority could send its enforcement officers to carry out checks in known 'hot-spots' for its drivers, but while this seems reasonable for an adjoining licensing area, it seems an inefficient solution when the distances involved can be so great. In conjunction with the earlier recommendation on national minimum standards, all licensing authorities should have the powers to take enforcement action against those standards regardless of where a specific driver or vehicle is licensed. So, for example, a Bristol City Council licensing enforcement officer should be able to stop and question any taxi or PHV driving in Bristol regardless of which authority issued the licence. The Group heard evidence that taxis and PHVs can carry passengers across different boundaries and nobody can monitor their compliance or question them. This is simply wrong.

Recommendation 9

All licensing authorities should use their existing powers to make it a condition of licensing that drivers cooperate with requests from authorised compliance officers in other areas. Where a driver fails to comply with this requirement enforcement action should be taken as if the driver has failed to comply with the same request from an officer of the issuing authority.

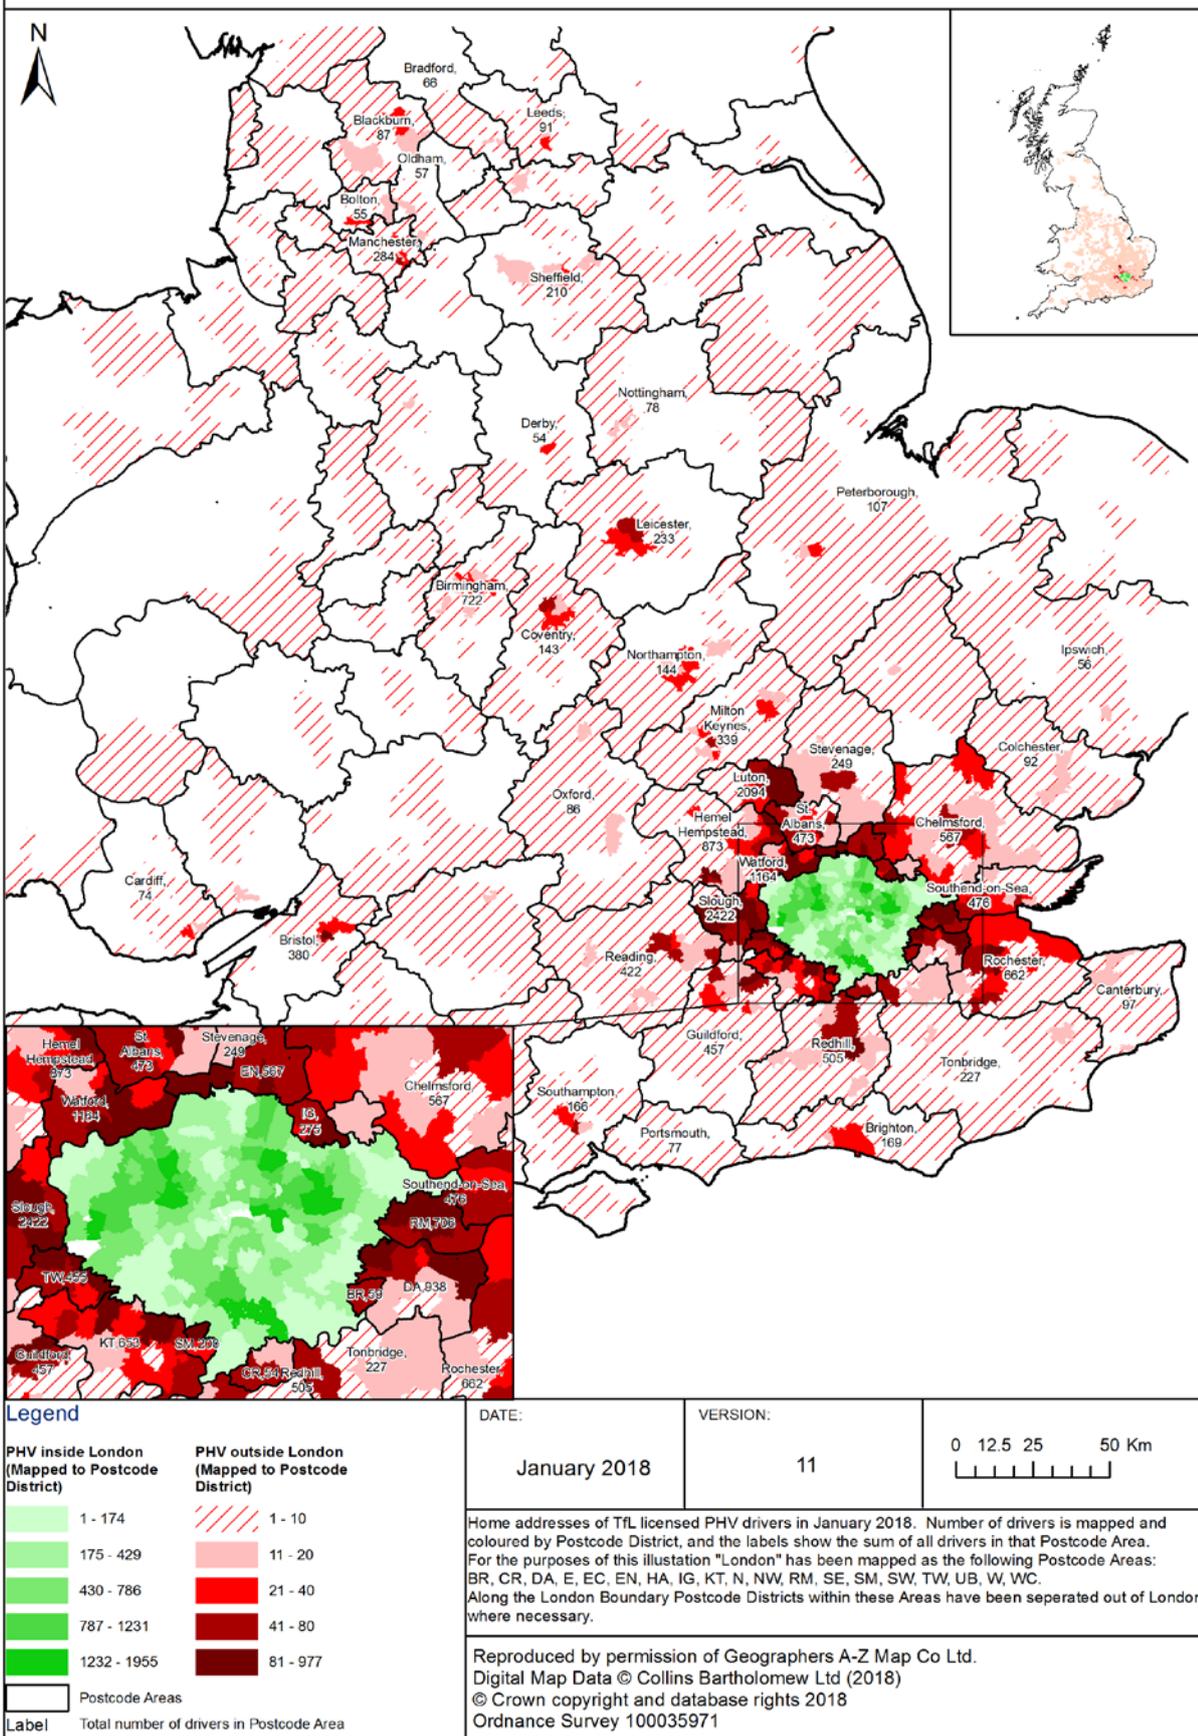

Recommendation 10

Legislation should be brought forward to enable licensing authorities to carry out enforcement and compliance checks and take appropriate action against any taxi or PHV in their area that is in breach of national minimum standards (**recommendation 2**) or the requirement that all taxi and PHV journeys should start and/or end within the area that issued the relevant licences (**recommendation 11**).

- 3.49 This report has already recommended that licensing authorities should be able to restrict the number of taxi and PHV licences they issue. However, without a method to prevent vehicles licensed in other areas from working within the "capped" area, any restriction could be easily circumvented by someone licensing elsewhere and simply working remotely within the "capped" area.

Figure 3 - Home postcodes of active Transport for London licensed PHV drivers, January 2018

Figure 4: Prevalence of active London-licensed private hire drivers with home addresses outside London

- 3.50 A number of submissions to the Group supported a proposed restriction that taxi and PHV journeys should only be permitted where the start and/or end point are within the licensing area of the driver, vehicle and (for PHVs) operator. This was primarily proposed to address concerns over the drivers operating predominantly or exclusively outside of the area in which they are licensed.
- 3.51 That proposal is the most effective on the table. There would be a need to carefully consider any flexibilities that may be needed to allow for specific destinations to continue to be served without disruption (e.g. airports), business models to continue (e.g. in the chauffeur / executive hire sector), or specific services for the disabled to not be disrupted.
- 3.52 All those matters would need careful further work, to reduce the risk of causing damage legitimate business models and passenger choice. The potential negative aspects of the proposed restriction would be greatest in inner-city areas which have many boundaries. Without the reduction of licensing authorities proposed in recommendation 4, and the resulting larger areas, all parties would be detrimentally affected. With small geographic areas and more borders, passengers in these areas may no longer be able to use their favoured PHV operator even if these were the closest but simply as a consequence of being the wrong-side one of the many boundaries.
- 3.53 Rationalising the number of licensing areas in these locations would have benefits in its own right, but would also significantly reduce the negative impacts of a start/end point restriction.

Recommendation 11

Government should legislate that all taxi and PHV journeys should start and/or end within the area for which the driver, vehicle and operator (PHVs and taxis – see **recommendation 6**) are licensed. Appropriate measures should be in place to allow specialist services such as chauffeur and disability transport services to continue to operate cross-border.

Operators should not be restricted from applying for and holding licences with multiple authorities, subject to them meeting both national standards and any additional requirements imposed by the relevant licensing authority.

Licensing fee income

- 3.54 Taxi and PHV licensing fees must be set on a cost recovery basis. They should reflect the true costs of the regime, and should not be used by licensing authorities to make profit or be subsidised by the council tax payer. Licensing authorities should ensure that the administration, compliance and enforcement of taxi and PHV licensing is sufficiently funded to enable an efficient process.
- 3.55 Resourcing functions based on revenue received approaches the issue the wrong way around. Licensing authorities should of course aim to deliver value for money by working efficiently, but that is not the same as at the lowest possible cost. Licensing authorities should first establish what resources are required to adequately administer and enforce the regime and set the licensing fees based on this. For example, the Group received evidence of how the funding of a police intelligence liaison officer can significantly improve cooperation and the flow of information. The resourcing of initiatives such as this may be beneficial but prove prohibitive for some

of the smaller licensing authorities, the restructuring proposed in recommendation 4 would result in authorities operating at a scale which enable them to resource these activities but removing administrative duplication and spreading the costs across a wider pool of licensees.

Recommendation 12

Licensing authorities should ensure that their licensing, administration and enforcement functions are adequately resourced, setting fees at an appropriate level to enable this.

Pedicab regulation in London

- 3.56 One result of having different taxi legislation applicable to London and the rest of England is that pedicabs (sometimes called rickshaws) cannot be regulated in the former. Case law has established that they are classed as "stage carriages" in the context of London taxi law, and therefore out of scope of taxi regulation. While there should be a place for a safe and responsible pedicab trade, particularly in Central London, there has been much justified criticism in recent years of rogue pedicab operators taking advantage of tourists with excessive charges and absence of safety checks.
- 3.57 It is not acceptable that Transport for London is unable to regulate pedicabs to ensure a safe service; the Government announced in 2016 that it would rectify this, and the legislation should be brought forward as soon as possible.

Recommendation 13

Legislation should be introduced by the Government as a matter of urgency to enable Transport for London to regulate the operation of pedicabs in London.

Fixed Penalty Notice for minor compliance infringements

- 3.58 The enforcement of minor licensing infringements can be excessively burdensome on licensing authorities and frustrates their efforts to raise standards within their area. There are important benefits to setting a culture where licensees know that they must adhere to the basics or else face sanctions, freeing up officials and enabling them to focus on more serious matters.
- 3.59 Transport for London has proposed that it should be enabled to issue Fixed Penalty Notices to PHV drivers as it already is to taxi drivers who have breached minor licensing requirements such as failing to wear their badge. Transport for London's view is that this immediate financial deterrent would expand the enforcement options available to them to increase compliance and reduce the need to resort to more expensive measures that ultimately increase licensing fees for the majority of drivers that are compliant. The Local Government Association's initial submission to the working Group also called on licensing authorities to have modern enforcement tools such as Fixed Penalty Notices and stop notices.

- 3.60 Transport for London has elected not to make use of the powers it currently has to issue Fixed Penalty Notices until it is able to apply the same to PHVs. As stated elsewhere in this report, the two tiers of the trade should as far as practicable be treated equitably. Elsewhere in this report the case has been made for greater consistency in regulation across England in part to underpin national enforcement powers of national standards. Therefore it would be appropriate for the powers to issue Fixed Penalty Notices to be available to all licensing authorities, for both taxis and PHVs.

Recommendation 14

The Department for Transport and Transport for London should work together to enable the issue of Fixed Penalty Notices for both minor taxi and PHV compliance failings. The Department for Transport should introduce legislation to provide all licensing authorities with the same powers.

Ridesharing

- 3.61 Ridesharing services in this context refers to the sharing of taxis or PHVs for hire by individuals that are unknown to each other prior to the beginning their trips. This form of service may provide members of the public with cheaper fares as costs are shared, and better utilise the capacity of vehicles, thereby reducing congestion and pollution. But there are potentially increased risks, too.
- 3.62 The limited time available to the Group has required that attention was focussed on key areas of urgent concern. While the issue of ridesharing has not been considered in depth, it should be clear to all that use these services that that they consent to sharing a confined space with people that are unknown to them. Operator and drivers should be required to make this clear when booking and at the start of a journey.
- 3.63 Where a taxi or PHV is no longer used entirely for exclusive private hire, the arguments in favour of mandating CCTV are enhanced; the argument that CCTV may represent an invasion of privacy is reduced greatly if not entirely negated, as there can be no argument that the vehicle is a private space. The use of CCTV is discussed further in Chapter Three.

Recommendation 15

All ridesharing services should explicitly gain the informed consent of passengers at the time of the booking and commencement of the journey.

4. Safety in taxis and private hire vehicles

Public protection

- 4.1 One of the most important considerations of any regulatory system is safety. It is of paramount importance that passengers using taxis or PHVs can get into a vehicle knowing that their driver has been rigorously checked and deemed to be a suitable person to carry passengers. The enclosed nature of a taxi or PHV affords a potential opportunity to a person who wishes to take advantage of the vulnerable. It is important to recognise that in different circumstances, it may be either the passenger or the driver who is vulnerable.
- 4.2 The vast majority of licensed taxi and PHV drivers in the UK are decent and law-abiding people. Nevertheless, there have been recent and numerous cases of licensed drivers participating in, or enabling, child sexual exploitation as well as isolated opportunistic attacks on passengers. Following these horrendous offences, many licensing authorities have acted to address the failings that contributed to enabling these incidents. The lessons from the Casey and Jay reports and the impact on the lives of those affected by these and other failures must not be forgotten. To do otherwise would compound the harm and injustice done to the victims. No licensing authority should consider that the lessons learned do not apply to them merely because there have not been significant reports of such activity in their area: many of the previous offences in these cases have only become known many years after the event. Neither central government nor licensing authorities can provide absolute assurances of safety, but licensing authorities have the powers to mitigate the risks now. In the long term it is for central government to act to enable the mandating of standards to force any complacent authorities to act.
- 4.3 The Policing and Crime Act 2017 gave the Government the power to issue Statutory Guidance to local licensing authorities on the way taxi and PHV licensing powers should be used to protect children and vulnerable adults. That guidance should ultimately form the core of the national safety standards for both the taxi and PHV sector, and it should be issued as soon as possible.
- 4.4 Until national minimum standards for the taxi and PHV sector are introduced, the Statutory Guidance provides an opportunity to take a significant step towards in greater consistency in how the safety elements of the 'fit and proper' test are applied.

- 4.5 The application of high standards with regard to safety would provide increased public confidence in the sector and mitigate the potential for drivers to seek out areas where standards are applied less rigorously.

Recommendation 16

The Department for Transport must as a matter of urgency press ahead with consultation on a draft of its Statutory Guidance to local licensing authorities. The guidance must be explicit in its expectations of what licensing authorities should be doing to safeguard vulnerable passengers. The effectiveness of the guidance must be monitored in advance of legislation on national minimum standards.

- 4.6 Under the current highly devolved regulatory framework, local licensing authorities have a pivotal role in the effectiveness of guidance. Once the guidance has been issued, licensing authorities should play their part and give it due consideration. The Department for Transport should also monitor the overall effect of the guidance; the policies outlined will only be as successful as their implementation.
- 4.7 Until such time as the Government brings forward legislation to mandate national minimum standards, licensing authorities should work collectively to increase consistency. As the recommendations made in the Statutory and Best Practice Guidance are the Government's views, it is reasonable to assume that these would be considered as the basis for national minimum standards. As noted earlier in this report, licensing authorities would not be acting in the long-term best interests of the trade to divert far from the recommendations, as this may result in a period of significant change in standards and requirements at a later date.

CCTV

- 4.8 The Group received a number of submissions and heard from witnesses about the benefits of having CCTV in taxis and PHVs. There were numerous positive comments regarding the potential benefits that CCTV might provide to both passengers and drivers. The vast majority of taxi and PHV passengers receive a good and safe service but the few drivers that abuse their position of trust undermine public confidence in passenger safety. CCTV can reaffirm or increase passenger confidence.
- 4.9 CCTV would not just protect passengers. In England and Wales, approximately 53% of taxi and PHV drivers are non-white, a much higher than average percentage of the workforce. The Group heard from the United Private Hire Drivers that 50% of drivers it surveyed had been threatened or assaulted and that 57% had been racially abused while working.
- 4.10 Where both cameras and audio recording is used, those who verbally and physically abuse drivers would do so knowing that the attack would be recorded, providing invaluable evidence to enforcement agencies. There are also incidents of false allegations being made against drivers, and CCTV evidence can protect drivers from potentially losing their licence and their livelihood.

- 4.11 Only a small number of licensing authorities in England currently require CCTV in their licensed vehicles⁸; however, there is a strong case for having CCTV in taxis and PHVs, and licensing authorities which do not already mandate CCTV should do so. The concern most commonly raised is the costs of installing and maintaining CCTV systems. These do not however appear to be unreasonable for owners of licensed vehicles to bear given an assumed operational life of a system and the potential for reduced damage to the vehicle. The majority of taxis and PHV are owner driven - these could benefit from reduced abuse and assaults by passengers, reduced fare evasion and potentially increased passenger usage through greater confidence in the sector.

Recommendation 17

In the interests of passenger safety, particularly in the light of events in towns and cities like Rochdale, Oxford, Newcastle and Rotherham, all licensed vehicles must be fitted with CCTV (visual and audio) subject to strict data protection measures. Licensing authorities must use their existing power to mandate this ahead of inclusion in national minimum standards.

To support greater consistency in licensing, potentially reduce costs and assist greater out of area compliance, the Government must set out in guidance the standards and specifications of CCTV systems for use in taxis and PHVs. These must then be introduced on a mandatory basis as part of national minimum standards.

- 4.12 It is however not just the driver and passenger that CCTV can benefit. Licensing authorities are better able to make an informed decision whether to take no action, suspend or revoke a licence following a complaint. This evidence can be used at court should the driver appeal a decision, and it may even prevent the driver guilty of misconduct from launching an appeal. Society as a whole benefits from increased protection from crime.
- 4.13 Yet mandating CCTV in vehicles will incur extra cost for many small businesses, the vast majority of drivers currently consider as such. Recognising the benefits to society, ways of helping with individual and small business costs should be seriously explored.

Recommendation 18

As Government and local authorities would benefit from a reduction in crime in licensed vehicle both should consider ways in which the costs to small businesses of installing CCTV can be mitigated.

- 4.14 Technology has advanced rapidly in recent years and what may once have been an expensive and difficult to achieve is now common place. GPS has provided an accurate and reliable way to track vehicles for many years now. These advances can further public safety (driver and passengers) by recording the movements of vehicles and provide valuable evidence in proving or disproving an allegation. As part of the

⁸ <https://www.gov.uk/government/statistics/taxi-and-private-hire-vehicles-statistics-england-2017> (Table 0106)

work that will be required to set an appropriate minimum standard for CCTV systems in taxis and PHVs, the Government should also consider whether and how GPS tracking could also be included.

- 4.15 As discussed previously in this report, the public often view taxis and PHVs as providing identical services. Plying for hire by PHVs and unlicensed vehicles is illegal and should not be tolerated under any circumstances. However, when the public see a licensed PHV they may attempt to hire this immediately through confusion between the two-tiers of the system. Raising public awareness of the differences between taxis and PHVs protects all parties; passengers use the appropriately insured and licensed drivers and vehicles, taxi drivers receive the benefits of their exclusive right to 'ply for hire' in recognition of meeting the relevant requirements and law-abiding PHV drivers will not face confrontation from refusing to carry passengers that have not pre-booked.

Recommendation 19

National standards must set requirements to assist the public in distinguishing between taxis, PHVs and unlicensed vehicles. These should require drivers to have on display (e.g. a clearly visible badge or arm-band providing) relevant details to assist the passengers in identifying that they are appropriately licensed e.g. photograph of the driver and licence type i.e. immediate hire or pre-booked only.

All PHVs must be required to provide information to passengers including driver photo ID and the vehicle licence number, in advance of a journey. This would enable all passengers to share information with others in advance of their journey. For passengers who cannot receive the relevant information via digital means this information should be available through other means before passengers get into the vehicle.

Background checks and information sharing

- 4.16 To enable licensing authorities to make the best decisions on applications they receive, and to support greater consistency, they should have as complete as possible a picture of the applicant's background. It is welcomed that all licensing authorities require an enhanced Disclosure and Barring Service (DBS) check for all drivers⁹; however, only 77% report that they currently also check the barred list for both taxi and PHV drivers, and there is no reason why this should not be 100%. This can be carried out at no extra charge.

⁹ Department for Transport's 2017 Taxi and Private Hire statistics - <https://www.gov.uk/government/collections/taxi-statistics>

- 4.17 The DBS update service is an online subscription that allows individuals to keep their standard or enhanced DBS certificate up to date and allows employers and regulators to check a certificate online. This subscription service therefore allows taxi and PHV drivers licensing authorities (as a nominee with the individual's consent) to check the status of a certificate online at any time. Subscription to the service removes the need for repeat checks, reduces the administrative burden and mitigates potential delays in relicensing. This will more cheaply and easily allow licensing authorities to undertake checks other than at first application or renewal. Drivers are licensed for three years and vehicles usually on year however vehicles are routinely checked every 6-12 months to ensure they continue to meet the standards required. Interim checks on the continued suitability of driver does not therefore seem disproportionate.

Recommendation 20

All drivers must be subject to enhanced DBS and barred lists checks. Licensing authorities should use their existing power to mandate this ahead of inclusion as part of national minimum standards.

All licensing authorities must require drivers to subscribe to the DBS update service and DBS checks should must be carried out at a minimum of every six months. Licensing authorities must use their existing power to mandate this ahead of inclusion as part of national standards.

Recommendation 21

Government must issue guidance, as a matter of urgency, that clearly specifies convictions that it considers should be grounds for refusal or revocation of driver licences and the period for which these exclusions should apply. Licensing authorities must align their existing policies to this ahead of inclusion in national minimum standards.

- 4.18 There is a concern that critical information about the risk posed by a driver is not always being shared with licensing authorities by the police, under the Common Law Police Disclosure (CLPD) provisions. It is vital that licensing authorities have access to this 'soft intelligence'; patterns of behaviour such as complaints against drivers (regardless of whether they were working) even when these do not result in arrest or charge may be indicative of characteristics that raise doubts over the suitability to hold a licence. Provision of this helps authorities to build a fuller picture of the potential risks an individual may pose. This information may tip the 'balance of probabilities' assessment that licensing authorities must undertake.
- 4.19 The CLPD provisions enable new information obtained by the police to be rapidly passed on to licensing authorities, rather than information becoming known to them through a DBS check some time after an incident. However, a survey carried out by the Institute of Licensing of its local authority members in 2017 shows that less than 25% of respondents consider that the current data sharing agreements are satisfactory. This process can be of huge benefit to protecting the safety of

passengers and it is imperative that the maximum protection this provides is being delivered.

Recommendation 22

The Quality Assurance Framework and Common Law Police Disclosure Provisions must be reviewed to ensure as much relevant information of behaviours as well as crimes by taxi and PHV drivers (and applicants) is disclosed to and to ensure licensing authorities are informed immediately of any relevant incidents.

- 4.20 The current efforts of the Local Government Association to create a register of drivers who have been refused or revoked taxi or PHV driver licences, in conjunction with the National Anti-Fraud Network (NAFN), are to be welcomed. It was disappointing to see that the Private Members Bill brought by Daniel Zeichner MP, which would have made use of such a register mandatory, failed to pass its Second Reading in the House of Commons on 2 February when the bill was "talked out".
- 4.21 Without that Bill, it is hoped that all licensing authorities will use the register as only complete coverage will make the most of the benefits. It is unacceptable that a driver could have a licence refused or revoked on safety grounds by one authority, but gain a licence in an another authority by virtue of not disclosing that history. A DBS check may not provide the cause for a refusal or revocation by another authority; this would depend, for example, on whether the decision was based on previous convictions or on 'soft-intelligence' received. The register will enable past revocations or refusals to be flagged, and the authority considering an application to seek further information from the refusing authority.
- 4.22 Even with that information, decisions must still be made in accordance with the policies of the authority that is handling the application - a refusal in one area must be fully understood and should not be an automatic bar to a licence being issued elsewhere; for example, if one refusal has been made on the basis of a conviction, but sufficient time has now passed during which the applicant has demonstrated continued good character to comply with the authority's convictions policy. The system will provide an extra safeguard for the public, not a blacklist of drivers; licensing authorities will continue to make independent judgements whether, on the balance of probabilities, an individual is fit and proper. The purpose of this database is to assist licensing authorities in this assessment by enabling as fully a picture of an individual as possible to be considered.

Recommendation 23

All licensing authorities must use the National Anti-Fraud Network (NAFN) register of drivers who have been refused or had revoked taxi or PHV driver licence. All refusals and revocations must be recorded, and the register checked for all licence applications and renewals. Licensing authorities must retain the reasons for any refusal, suspension or revocation and provide those to other authorities as appropriate. The Government must, as a matter of urgency, bring forward legislation to mandate this alongside a national licensing database (**recommendation 24**).

- 4.23 In addition, a broader national database of all taxi and PHV licences, for drivers vehicles and operators should be introduced. This would be a significant aid to cross-border enforcement, complementary to the national enforcement powers recommended. In the current absence of such powers, it would still improve the ability of authorities to be able to identify where driver and vehicles are licensed in order to report concerns or issues to the "home" licensing authority, or indeed the police.

Recommendation 24

As a matter of urgency Government must establish a mandatory national database of all licensed taxi and PHV drivers, vehicles and operators, to support stronger enforcement.

Training and engagement

- 4.24 It is important that drivers are equipped with the skills and knowledge they need to identify situations where vulnerable passengers may be at risk. Over half of licensing authorities currently require their drivers to undertake child sexual abuse and exploitation (CSAE) awareness training, and this is good practice that all licensing authorities should follow. It is not sufficient to wait for evidence of a 'problem' within a licensing area before doing this.
- 4.25 As part of that training, and their wider engagement with drivers, licensing authorities should remember that their network of checked and trained, professional drivers can be an important source of intelligence about signs of abuse and neglect amongst their passengers. Poorly checked and trained drivers may pose risks, but well trained and supported drivers can be an important part of the solution. An example of the positive contribution the trade can play is that of Cherwell District Council driver Satbir Arora, whose awareness prevented a 13-year-old girl from meeting a 24-year-old male who was convicted of attempted abduction and the distribution and making of indecent images.

Recommendation 25

Licensing authorities must use their existing powers to require all drivers to undertake safeguarding/child sexual abuse and exploitation awareness training including the positive role that taxi/PHV drivers can play in spotting and reporting signs of abuse and neglect of vulnerable passengers. This requirement must form part of future national minimum standards.

Improving decision making

- 4.26 Implementing national standards, including those on the consideration of convictions, will be a huge step toward greater consistency in licensing decisions. There have been examples of individuals that have been issued licences despite convictions for serious offences. However all licensing decisions are ultimately made by individuals, not policy documents. It is essential therefore that those involved in the determination of licensing matters have received sufficient training to discharge their duties effectively and correctly. This training should cover licensing procedures, natural justice, understanding the risks of child sexual exploitation, consideration of 'soft intelligence', and disability and equality, in addition to any other issues deemed appropriate. Training should not simply relate to procedures, but should also cover the making of difficult and potentially controversial decisions.

Recommendation 26

All individuals involved in the licensing decision making process (officials and councillors) must have to undertake appropriate training. The content of the training must form part of national minimum standards.

Use of Passenger Carrying Vehicle (PCV) licensed drivers

- 4.27 Driving a Public Service Vehicle (a vehicle that can carry 9 or more passengers e.g. a minibus or bus) for hire or reward requires a PCV licence. PCV driver licences are issued by the Driver and Vehicle Licensing Agency (on behalf of Traffic Commissioners). Unlike taxi or PHV drivers, applicants for a PCV licence are not subject to any routine DBS checks (neither basic nor enhanced).
- 4.28 Applicants for a licence to drive passenger minibuses and buses must complete an application form and declare any convictions for non-driving offences as well as those relating to driving hours, roadworthiness or loading of vehicles as well as any.
- 4.29 The declaration of any offences will result in the DVLA notifying the relevant Traffic Commissioner so the applicant's suitability to hold the licence, in relation to their conduct, may be reviewed. Traffic Commissioners may grant refuse, suspend or revoke driving entitlement, taking into account passenger safety.
- 4.30 However, a number of areas have experienced issues whereby individuals whose taxi or PHV licence or application have been refused or revoked have applied to the Driver and Vehicle Licensing Agency and obtained a PCV licence, and these individuals have then carried passengers driving a minibus. In some cases, people who have had their licence revoked have even continued to work for the same operator.
- 4.31 This is an issue that has clear implications for passenger safety. Although it may technically be outside the scope of taxi and PHV licensing, there are evidently clear overlaps in practice. It is not acceptable that individuals that are deemed to be unfit to carry passengers in a vehicle that seats fewer than nine passengers are able to do under a different licensing system, simply because there are additional seats in a vehicle.

Recommendation 27

Government must review the assessment process of passenger carrying vehicle (PCV) licensed drivers and/or consider the appropriate licensing boundary between taxis/PHVs and public service vehicles (PSVs).

Language skills

4.32 It is important that drivers are able to converse effectively, and particularly so in emergency situations. Drivers should be able to:

- Converse with passengers to demonstrate an understanding of the desired destination, an estimation of the time taken to get there and other common passenger requests;
- Provide a customer with correct change from a note or notes of higher value than the given fare, and doing so with relative simplicity;
- Provide a legibly written receipt upon request.

Recommendation 28

Licensing authorities must require that all drivers are able to communicate **in English** orally and in writing to a standard that is required to fulfil their duties, **including in emergency and other challenging situations.**

5. Accessibility

The importance of the taxi and PHV market

- 5.1 As an introduction to this chapter, from the following quote from the evidence received from the Disabled Persons' Transport Advisory Committee (DPTAC) sets the scene appropriately:

'For those who cannot use public transport, either due to the nature of their conditions or because they live in areas with a poor public transport service, taxis can be the key element allowing them to live independently.'

Submission from DPTAC, November 2017

- 5.2 Evidence received by the Group highlighted that consideration of accessibility needs is essential in any reform of the sector. If the Government enacts national standards, accessibility considerations should be an integral part of their development, not a mere add-on. In the short term, it is important that licensing authorities use the powers they already have to improve access and passenger experience.

Training

- 5.3 The 2017 taxi and private hire statistics show that only 38% of licensing authorities in England require their taxi drivers to undertake disability equality training, and 35% require it for their PHV drivers. This training should be a national requirement as part of national standards, but licensing authorities have the power to require it now and should do. It is important that drivers working in a sector that can be a lifeline for those unable to use public transport understand that position, and how they can best support their passengers.

Recommendation 29

All licensing authorities should use their existing powers to require that their taxi and PHV drivers undergo disability equality and awareness and equality training. This should ultimately be mandated as part of national minimum standards.

Vehicle types and access

- 5.4 As can be seen in figures 4 and 5, the proportion of vehicles licensed by different authorities that are wheelchair accessible varies considerably. The 2017 statistics show that 63% of authorities require their taxi fleets to be a wheelchair accessible vehicle (WAV). These figures show that in England (excluding London) 41% of taxis are WAVs but this is only part of the story; in over a quarter of authorities, 5% or fewer of taxis are accessible. The situation is even worse for PHVs - nearly two-thirds of authorities have a fleet in which 5% or fewer of PHVs are wheelchair accessible.
- 5.5 Standard (non-WAV) vehicles remain important too: most disabled people do not use wheelchairs, and many people will find saloons easier to get in and out of. Mixed fleets are important, reflecting the diverse needs of passengers, but nonetheless, levels of WAV PHVs in particular (given the significant increase in PHVs in recent years) appears low in even the most populous areas. I have outlined one way in which licensing authorities can seek to increase availability in paragraph 3.35.

Recommendation 30

Licensing authorities that have low levels of wheelchair accessible vehicles (WAVs) in their taxi and PHV fleet should ascertain if there is unmet demand for these vehicles. In areas with unmet demand licensing authorities should consider how existing powers could be used to address this, including making it mandatory to have a minimum number of their fleet that are WAVs. As a matter of urgency the Government's Best Practice Guidance should be revised to make appropriate recommendations to support this objective.

- 5.6 It is welcome that in 2017, the Government brought sections 165 and 167 of the Equality Act 2010 into force, ensuring that drivers of wheelchair vehicles that a licensing authority designates for this purpose cannot charge wheelchair users more than non-wheelchair users, and must provide appropriate assistance.

Recommendation 31

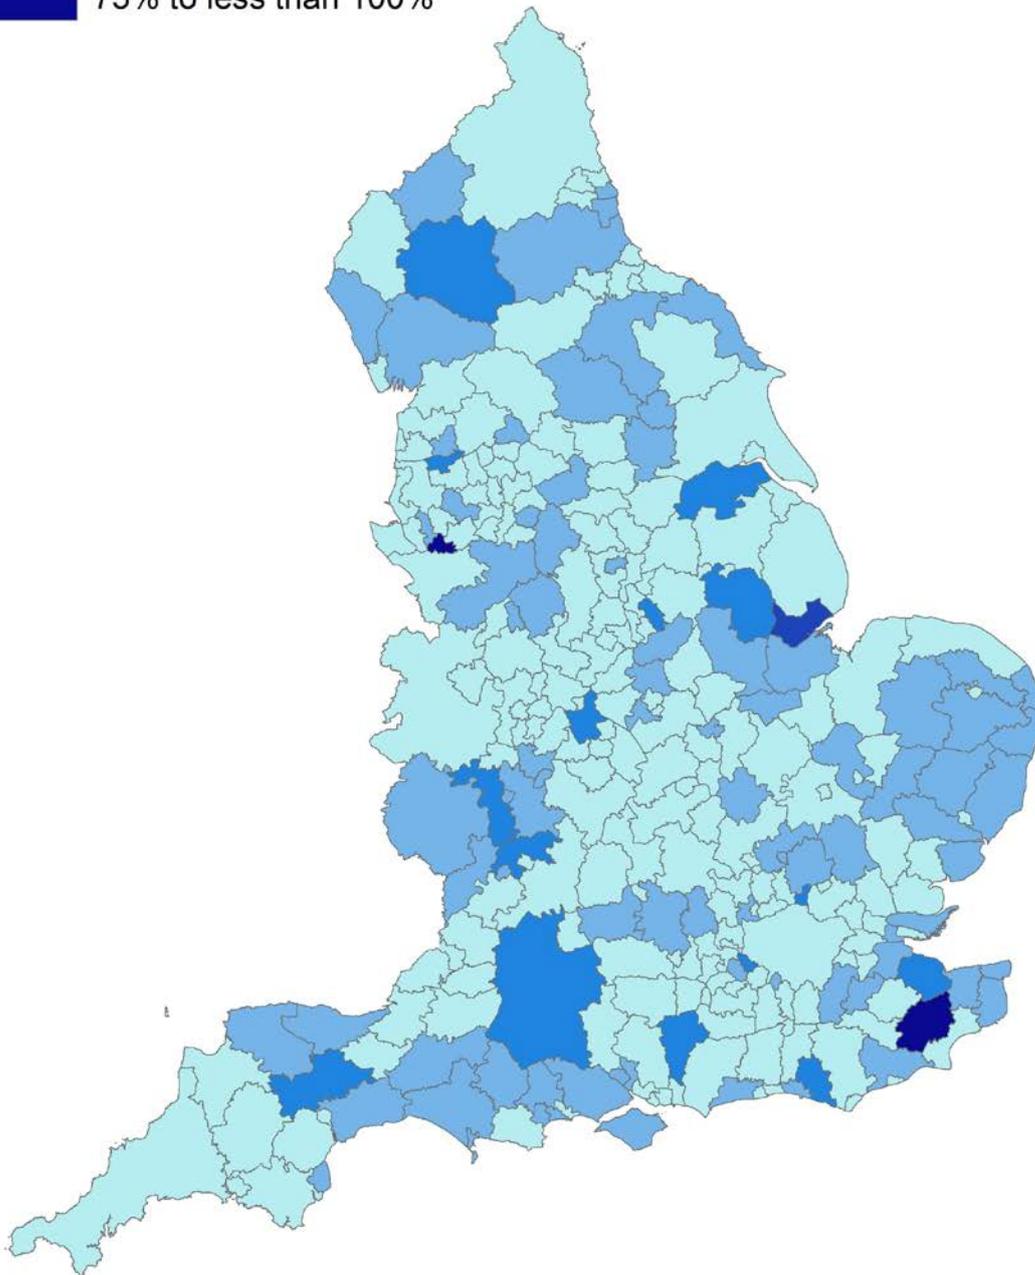

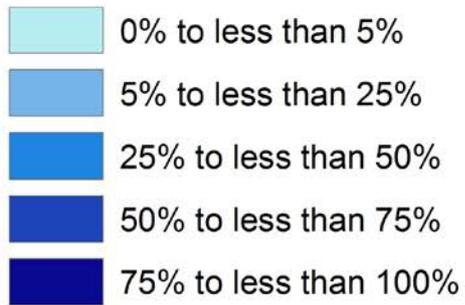

Licensing authorities which have not already done so should set up lists of wheelchair accessible vehicles (WAVs) in compliance with s.167 of the Equality Act 2010, to ensure that passengers receive the protections which this provides.

- 5.7 It is illegal for a taxi or PHV driver to refuse to carry an assistance dog, unless the driver has obtained a medical exemption certificate from their licensing authority. Despite this, a recent campaign by the Guide Dogs for the Blind Association indicates that nearly half of guide dog owners surveyed had experienced an access refusal in the past year. This is unacceptable, and licensing authorities should ensure that strong action is taken when instances are reported. Driver awareness is also

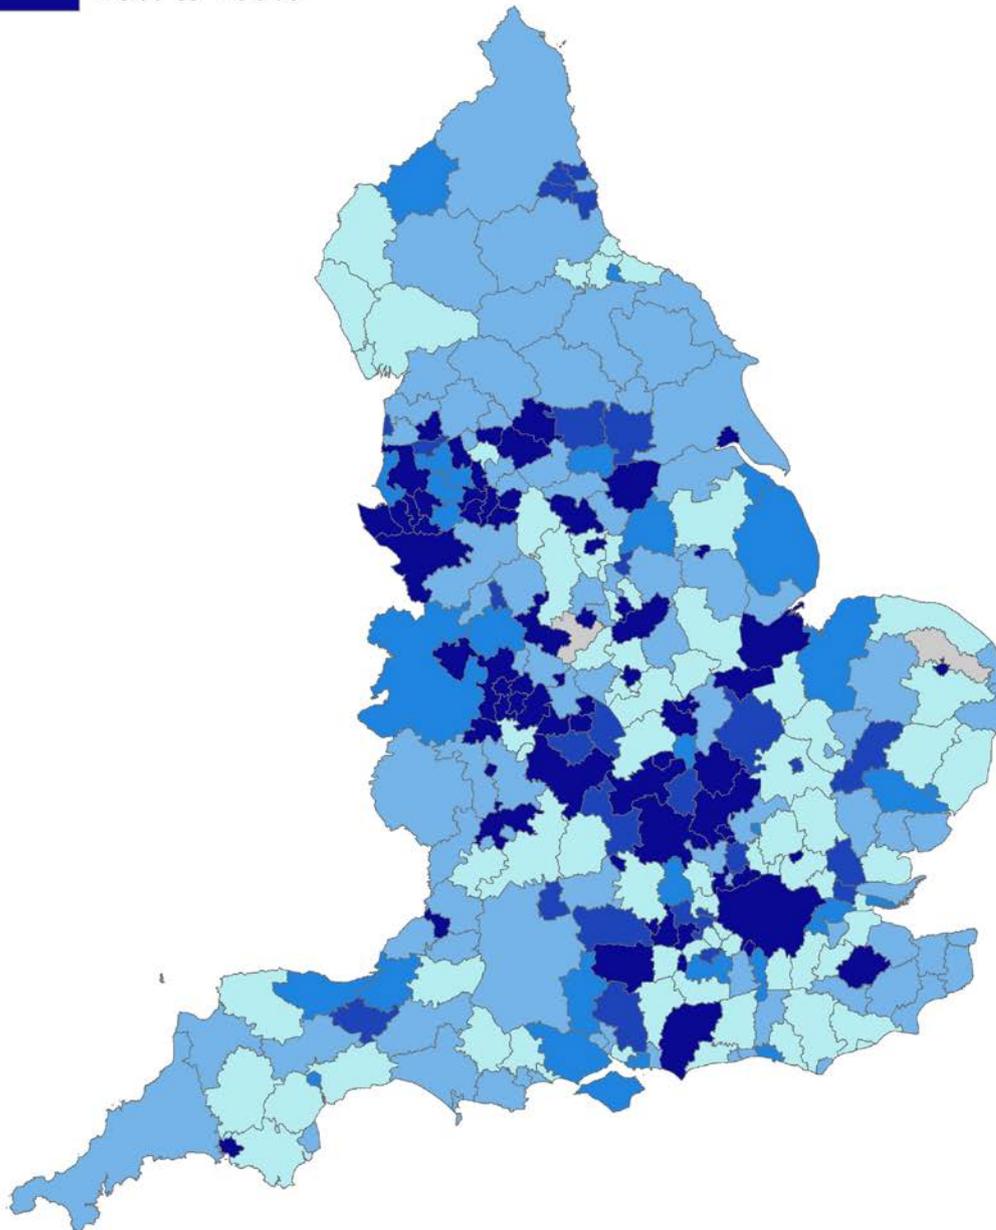

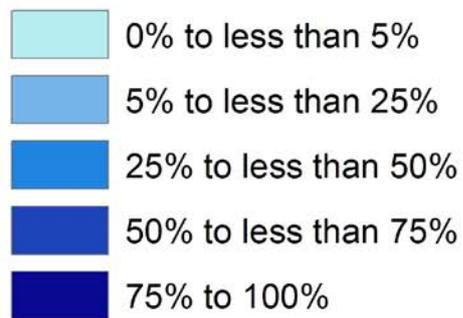

critical, and the earlier recommendation in favour of mandatory disability equality training would address this.

Recommendation 32

Licensing authorities should use their existing enforcement powers to take strong action where disability access refusals are reported, to deter future cases. They should also ensure their systems and processes make it as easy as possible for passengers to report disability access refusals.

6. Working conditions

Characteristics of employment in the sector

- 6.1 Traditionally a large proportion of taxi and PHV drivers have been self-employed. In the PHV sector, the 'traditional' working model is largely based on drivers paying a fee to the operator to gain a place on its list of drivers. Although this does not guarantee an income, drivers are able to decide whether to renew this relationship at the end of the period, or in the interim should they not receive what they consider sufficient fares.
- 6.2 This absence of guaranteed income is now being repeated in the 'gig economy' PHV model, the difference being that the fee(s) paid to the operator is usually taken as a percentage of each fare. The 'gig economy' was defined as 'the exchange of labour for money between individuals or companies via digital platforms that actively facilitate matching between providers and customers, on a short-term and payment by task basis' in the Department for Business, Energy and Industrial Strategy's [2018] research paper¹².
- 6.3 However, even in the 'gig economy' PHV model, the relationship between the PHV operator and driver has changed very little from the 'traditional' model. Drivers still require an operator to act as the intermediary between them and the passenger. This means that PHV operators have control over the fare levels and the number of journeys a driver may receive.
- 6.4 The introduction of new technology in the private hire market has enabled new ways for the PHV operator to bring together drivers and passengers. This experience is not unique to this sector nor is the use of such technology unique to new entrants. There are many long-established companies that now use apps both in the PHV and taxi markets. At the same time I am aware that there are a number of ongoing legal disputes regarding the legal status of individuals that work in the PHV trade. While the reporting of these cases has focused on those involving app-based PHV operators the relationship between driver and operator appears similar in both the established and disruptive operator business models
- 6.5 On 7 February the Government's 'Good Work'¹³ document, which was published in response to the 2017 'Good Work – The Taylor Review of Modern Working Practices'¹⁴, acknowledged Taylor's seven point plan was important to achieve the overarching ambition that all work in the UK should be decent and fair. The second of the points is focused on seeking clarity in the gig economy. It acknowledges that platform-based working offers opportunities for genuine two-way flexibility, and that these should be protected. However, it also recognises the importance of ensuring fairness both for those who work in this way and those who compete with them. It

¹² <https://www.gov.uk/government/publications/gig-economy-research>

¹³ <https://www.gov.uk/government/news/governments-response-to-the-taylor-review-of-modern-working-practices>

¹⁴ https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/627671/good-work-taylor-review-modern-working-practices-rg.pdf

proposes that 'worker' status should be maintained but it should make it easier for individuals and businesses to distinguish 'workers' from those who are legitimately self-employed.

- 6.6 While it was not in the remit or expertise of the Group to decide the employment status of drivers, it did hear about and consider working practices in the sector. In particular, concerns were raised about the balance of risk and reward for PHV drivers and the effects this has on their welfare and, potentially for public safety.

Working practices and earnings

- 6.7 The Group heard concerns that drivers, of both taxis and PHVs, are working longer hours to maintain existing incomes due to the increasing numbers of drivers. Of particular concern was the suggestion that drivers may be working excessively long periods without adequate breaks and the possible consequences of this for public safety.
- 6.8 All operators must meet their statutory obligations to drivers. Where drivers are 'workers' or employees, operators must ensure that none takes home less than they are entitled under National Living Wage legislation. Operators however should have a duty of care to support their drivers regardless of their employment status. Such an approach would obviously benefit drivers but it is also in operator's interests to support good working environments. It can support the retention of good drivers and lead to benefits for passengers; a driver who is content with their relationship with the operator may provide a better service and lead to repeat custom.

The role of PHV licensing authorities

- 6.9 It is outside the expertise and scope of a local licensing authority to determine the employment status of drivers working with its licensed PHV operators. However, licensing authorities do have a responsibility to ensure that operators are 'fit and proper'. If a licensing authority has evidence of an operator persistently flouting employment law (for example, making no changes in response to an employment tribunal that is not being appealed, or can be appealed no further), that should legitimately be seen as casting doubt on whether that operator is "fit and proper", and would be worthy of thorough consideration.

Recommendation 33

The low pay and exploitation of some, but not all, drivers is a source of concern. Licensing authorities should take into account any evidence of a person or business flouting employment law, and with it the integrity of the National Living Wage, as part of their test of whether that person or business is "fit and proper" to be a PHV operator.

Working/driving hours and safety

- 6.10 As already noted, the Group heard the view from some stakeholders that erosion in drivers' earnings has resulting in drivers working for increased, and potentially excessive, hours to maintain their income. It is self-evident that, at some threshold,

tiredness and long hours of driving in any vehicle poses a risk to public safety through reduced alertness and response times. The Group did not see independent evidence of how many hours drivers are working however it heard from industry experts that the taxi and PHV industry is one which has historically lent itself to long working hours generally.

- 6.11 At present, taxi and PHV drivers are not subject to the Road Transport (Working Time) Regulations 2005¹⁵. Drivers can therefore choose the hours they work, and there are no rules that limit the number of hours they can work in a day or week.
- 6.12 That appears potentially problematic. A minibus driver has limits on how long they can work and when they must take rest breaks. There is no logical reason why a taxi or PHV driver (possibly the same person as the minibus driver) should be permitted to carry paying passengers in a car for an unlimited length of time. A taxi/PHV driver still needs to be aware of the road and environment around them and be able to respond in a timely way to changes.
- 6.13 However, there are many questions of detail which it has not been possible to consider in full for this report. The European Union rules on drivers' hours and working time are complex, as the scenarios detailed in the Department's guidance¹⁶ illustrates. The appropriateness of these rules for the taxi and PHV sector is also open to debate; for example, limiting the number of driven hours may seem more appropriate than including times when a person is available and waiting for work. By its nature, the periods when taxis and PHVs are "available to answer calls to start work" (referred to as 'period of availability' in the guidance) would contribute to working hours but could not be considered as a rest period for the purposes of calculating driving hours according to the current rules.
- 6.14 The biggest challenge is how any limit(s) would be monitored and enforced; monitoring may require a tachograph system such as that used in buses and HGVs to be fitted to all taxis and PHVs. This may record the working/driving hours but consideration would need to be given to whether licensing authorities would monitor compliance or whether this would be done by the Traffic Commissioners (as for buses and HGVs). Despite these issues, this report favours driving time restrictions in principle if evidence indicates this is required on safety grounds and if a workable and proportionate way of doing so can be found. I think that Government should look at these issues in much greater detail than we reasonably can be done here.

Recommendation 34

Government should urgently review the evidence and case for restricting the number of hours that taxi and PHV drivers can drive, on the same safety grounds that restrict hours for bus and lorry driver.

- 6.15 In the meantime, it is worthwhile noting again that local licensing authorities have a key role to play in maintaining safety. Drivers have a responsibility to themselves, their passengers and the public to ensure they are fit to drive, and this requires drivers to be open and honest with licensing authorities (as well as the DVLA) on any health issues that may mean they should not be driving. Where concerns about the operation of taxis and PHVs are brought to the attention of licensing authorities they could – and should – take immediate action against drivers and operators if there is

¹⁵ <http://www.legislation.gov.uk/ukSI/2005/639/contents/made>

¹⁶ <https://www.gov.uk/government/publications/eu-rules-on-drivers-hours-and-working-time>

any evidence of unsafe activity. A fit and proper operator should neither encourage nor condone excessive working or driving hours.

Annex A- Comments by Group Members

Helen Chapman

Director of Licensing, Regulation & Charging, Transport for London

Transport for London (TfL) is the largest taxi and private hire licensing authority in England with almost a quarter of a million taxi and private hire licensees. In London, like many parts of the rest of the UK and globally, we have seen significant change in the taxi and private hire sector in recent years which we anticipate will continue to change in line with consumer needs.

Regulation is required to ensure the safety of passengers engaging with taxi and private hire services but it is right that this regulation is reviewed and modernised to reflect the modern world and the changing needs of passengers.

On behalf of the Mayor of London and TfL I am grateful for the opportunity to have formed part of the Department for Transport Working Group. It has been a worthwhile and rewarding experience to work as part of a group looking at regulatory practices to meet the needs of a changing world while remaining focussed on passenger safety and convenience. I would like to thank the Chair for his efforts in navigating a course through the often strongly held views of the Group and invited guests to produce a report of real substance with the safety of passengers at its heart.

We agree wholeheartedly with many of the recommendations put forward by the report which, if adopted, will deliver fundamental improvements in public safety and improvements in delivering a world class two tier taxi and private hire service. Many of these recommendations for primary legislative change have previously been raised by the Mayor and TfL and, indeed, many London based taxi and private hire stakeholders and we are delighted to have these views shared by the Chair of the Working Group.

Proposals within the report, in particular a solution to address the common practice referred to as cross border hiring, national minimum standards, national enforcement capabilities and statutory definitions to define the two tier system will produce a model of licensing and regulation that helps to enhance passenger safety and is not only fit for today but is also future-proofed and flexible to meet the changing demands of passengers.

We remain ready to support Government in implementing these recommendations, particularly those that require national legislation. As the largest licensing authority we can provide expert support and guidance to any panels that are formed to take forward these sensible recommendations.

We would like to comment on a number of recommendations from a TfL perspective:

Recommendation 2 – we strongly support the introduction of national minimum standards and that these minimum standards should be set at a high level for safety.

We would like to thank the Chair for the common sense approach in recommending that licensing authorities can go further than the minimum, where required, to meet local needs. This is particularly important in London to retain the ability to set standards to meet air quality challenges and to continue to deliver the Knowledge of London for taxi drivers.

Recommendation 5 – The two tier system has worked well in London for many years and London’s taxis are frequently voted the best in the world. Recommending a statutory definition for plying for hire and pre-booked services is sensible and long overdue. We would like to formally register our interest in joining the panel of regulatory experts to help draft appropriate definitions.

Recommendation 8 – we welcome the Chair’s recommendation to allow local licensing authorities to set a cap on the number of taxi and private hire vehicles. The growing number of private hire vehicles in the capital is causing significant challenges in tackling congestion, air quality and appropriate parking controls. However, we note and strongly agree that there should be a proven need to set a cap by having a public interest test so monopolies cannot be formed. Once again, we remain ready to assist Government in defining an appropriate public interest test.

Recommendation 11 – cross border hiring has been commonplace in the industry for many years but with the introduction of app based services in the industry and the expansion in the number of private hire drivers and vehicles, it requires an urgent solution so as not to undermine public safety and confidence in using private hire services. TfL explored this issue in detail and in February 2018 we published a detailed policy paper with proposals to address this issue. The paper was presented to the Working Group and we are delighted to see this is being taken forward as one of the key recommendations for change.

Recommendations 25 and 29 we are fully supportive of these two proposals, however, we believe that an assessment is the more appropriate “minimum standard”. As a licensing authority our role is to assess the fitness of an applicant rather than to train them to be fit. However, for some authorities they may wish to provide this training above and beyond the minimum standard and this flexibility could be accommodated.

Recommendation 30 - All taxis in London are Wheelchair Accessible and we recognise the need to enhance the provision for Wheelchair Accessible Vehicles in the private hire fleet. However, this recommendation, as written, will be difficult to achieve as vehicles are licensed separately to private hire operators and therefore it isn’t easy to introduce a minimum quota of wheelchair accessible vehicles.

We look forward to working with the Government to see these recommendations brought forward and ensure a modern, sustainable and two-tier taxi and private hire system for the future.

Rt Hon Frank Field MP

Member of Parliament for Birkenhead

Mohammed Abdel-Haq has written a superb report. It follows a thorough, comprehensive evidence-gathering process conducted by the Working Group under his chairmanship.

The House of Commons debate, in which the Minister announced the creation of the Working Group, centred on the pay, working conditions and living standards of taxi and private hire drivers.

This report addresses each of those important points. In doing so, it puts forward sound recommendations to restore the integrity of the National Living Wage – the cornerstone of the Government’s labour market policy – while ensuring adequate rates of pay and decent working conditions for drivers are put at the heart of what it means to be a ‘fit and proper’ operator.

The implementation of those recommendations, alongside many others in this report, will perform the crucial role of constructing minimum standards upon which the taxi and private hire industry can continue to thrive and innovate.

Saskia Garner

Policy Officer, Personal Safety, the Suzy Lamplugh Trust

Suzy Lamplugh Trust would like to commend the Chair on the completion of this final report and express our thanks for being included in the Task and Finish Group. We are delighted that most of the recommendations from our research report, Steering Towards Safety in Taxi and Private Hire Licensing, have been included in the report. We fully endorse the content of the report, with the exception of the comments below, which should not defer from our recognition of what has been achieved.

We have no position on **Recommendation 4** which recommends combining licensing areas. This is because we think the problems of inconsistency between neighbouring licensing authority policies would be resolved with the introduction of national minimum standards.

We would like to emphasise, in relation to **Recommendation 8**, the importance of the public interest test to determine whether a cap on numbers will increase or reduce personal safety. Our concern would be a situation where a cap resulted in demand out-weighting supply, which may put passengers at risk if they are unable to hire a licensed vehicle for their journey.

We do not support **Recommendation 11** as we do not believe there is a personal safety reason for limiting the start and end-point of a journey. We believe that the current practice of drivers choosing which licensing authority to obtain their licence from based on less stringent safety checks would be resolved by the introduction of national minimum standards.

In point 3.8 of the report we would request that the word 'proportionate' be defined, to ensure that the high standards set are in no way compromised by this stipulation.

In addition to what has been included in the report, Suzy Lamplugh Trust would like to recommend the addition of the following recommendations:

Inclusion of taxi and PHV drivers as a regulated activity

This would enable the offences under the Safeguarding Vulnerable Groups Act 2006, relating to a barred individual working or seeking to work in regulated activity, to apply.

No deregulation of licensing

Suzy Lamplugh Trust is also concerned about the proposed deregulation of licensing requirements for PHV drivers as set out in the 2016 Tourism Action Plan. This would effectively allow individuals to have access to members of the public including vulnerable adults and children in a private vehicle, without any prior safety checks. There should therefore be no de-regulation of existing laws that protect personal safety within taxi and PHV licensing.

Prohibition of taxis or PHVs for use by non-taxi/PHV licensed drivers

The prohibition of PHVs and taxis for personal use by non-PHV or taxi-licensed drivers must be introduced in London. This is to prevent drivers who do not hold a PHV or taxi licence, and who therefore have not been subject to safety checks, from picking up passengers who may assume they do hold a PHV or taxi licence as they are driving a licensed vehicle. While we are aware that PHVs should always be pre-booked, research carried out by the Suzy Lamplugh Trust in September 2017 showed that one in five people (21%) think that minicabs can be hailed on the street, and a quarter of people (26%) believe minicabs can take passengers who approach

them while parked. In addition, our research showed that over half (57%) have taken a taxi or minicab without asking to see the driver's ID badge first.

Ellie Greenwood**Senior Adviser (Regulation), Local Government Association**

As the organisation representing licensing authorities, the Local Government Association (LGA) is pleased to have been part of this working group. The LGA is supportive of the vast majority of recommendations in this document, many of which we have been actively calling for over several years, and the objectives underpinning them. Encouragingly, it has been clear throughout the process of the working group how much consensus there is on key issues including updating the legislation, a strengthened and consistent approach to safeguarding standards and the need to address out of area working.

The LGA has worked closely with its members in recent years to support them to strengthen taxi and PHV licensing; producing guidance, running training events and, most recently, commissioning the development of the national register of licence refusals and revocations. The focus of all this work has been to ensure authorities are doing all that they can to safeguard people using taxis and PHVs.

In doing this, we have also consistently urged Government to take the much needed step of modernising outdated taxi and PHV legislation.

It is to be hoped that the report of an independent Chairman marks a turning point on this, and that Government now moves swiftly to take it forward and introduce new legislation. The report recognises that the taxi and PHV market has changed beyond recognition since the existing framework was introduced. As we said in our original submission to the working group, this has too often left councils and Transport for London on the front line of competing, costly legal challenges as to whether new business models fit within an obsolete framework. It is ultimately Government's responsibility to ensure we have a regulatory framework that is fit for purpose and protects people, and it must now do so.

The LGA and its members recognise and accept that as markets change and develop, so too regulation and regulators themselves must adapt. But we believe that local authorities must continue to be central to the licensing process and are pleased that the report recognises the importance of retaining local flexibility in taxi / PHV licensing, in terms of the ability to set local conditions (alongside national minimum standards) and the proposal for a power to set local caps.

There is a strong case to be made for greater collaboration across licensing authorities: on local policies, standards and enforcement of taxi and PHV licensing. The LGA urges all of its members to move forward on this cooperatively and quickly.

In some places, there may be also be a good case for reviewing licensing authority borders. But licensing authorities need to reflect local areas, economies and taxi / PHV markets, and will therefore look different in different places, as they do currently. Any process of revising licensing authority boundaries needs to be led from the bottom up, based on functional economic geography, and should in the first instance be encouraged as a voluntary approach.

It should also be linked to the fact that, beyond the licensing function, the map of local government is evolving. Combined authorities, metro mayors and proposed reorganisation in two tier areas may impact the way in which licensing authorities are structured and operate. These developments should provide the foundation for any changes to the map of licensing authorities, to help maintain the local democratic accountability that the report highlights, while also ensuring that licensing authorities do not become remote from the communities that they serve and seek to safeguard.

It is positive that the report envisages a voluntary approach on this issue, and recognises that Government can help to encourage this – for example, through funding for licensing authorities to develop new models and legislation enabling authorities to form shared licensing areas.

A particular issue for many local areas and licensing authorities has been the growth in out of area working over recent years. The LGA believes that drivers should operate predominantly in the areas where they are licensed, and welcomes the recognition of this issue in the report. We are also pleased that the report recognises the concerns that the LGA and its members have raised about the very limited oversight of drivers of PCVs. It is vital that this safeguarding issue is addressed quickly, building on the work the LGA is doing to develop the national register of refusals and revocations.

Finally, we would caution that while undoubtedly desirable, there may be practical and financial barriers to local licensing authorities introducing some of the report's recommendations, such as mandating minimum numbers of wheelchair accessible vehicles, or (in particular) mitigating additional costs faced by the trade (on zero emission or wheelchair accessible vehicles, or CCTV). However, we look forward to working with Government to explore the options available in these areas.

Dr Michael Grenfell

Executive Director, Enforcement, Competition and Markets Authority

The Competition and Markets Authority has a statutory duty to promote competition for the benefit of consumers. This draws on the insight that, generally, consumers benefit from choice and also from the effect of competitive pressures on suppliers of services and goods, giving those suppliers an incentive to provide their services and goods to a high standard of quality, at a competitive price and with a desire to innovate; where there is effective competition, that is the only way that suppliers can win and retain business.

Applying this to the taxi and private hire vehicle (PHV) sector, competition provides operators with the incentive to give passengers value for money, by way of higher service standards, affordable fares and innovativeness in service provision.

The CMA recognises the need for robust regulation to protect passengers where market competition cannot wholly do this – for example, as regards safety standards. But we consider that such regulation should be proportionate and should be no more onerous than is necessary, with the concern that excessive or unnecessary regulation can create barriers to competition and new market entry, which would be counterproductive for the interests of passengers, depriving them of the benefits of competition (described above) as regards quality standards, price and innovation.

The benefit of price competition – affordability of taxi and cab fares for millions of ordinary people, and particularly the less affluent – should not be regarded as merely a ‘nice-to-have’ add-on. It is extremely important, including for some of the most vulnerable citizens in our society. It is also relevant to safety considerations; if people are unable to afford a taxi or cab fare (for example, after an evening out), they might well choose ways of transport that are considerably less safe – such as unlicensed vehicles, or themselves driving under the influence of alcohol – endangering themselves and others.

Having regard to these considerations, representing the CMA I have sought to engage with the serious work of the Group in what I hope has been in a constructive and cooperative spirit. As the Chairman says in his Foreword, there have been *‘strongly held and sometimes polar opposite opinions’* among members of the Group, and this is surely almost inevitable given the diverse range of interests and perspectives represented on the Group. It has been the Chairman’s task to draw useful insights from the range of expertise in the Group and produce a series of practical recommendations – designed to improve the sector and be workable – even if there is not complete consensus or unanimity about these.

My view is that the Chairman has been very successful in this.

I am happy to endorse the vast majority of the recommendations.

The only significant qualifications that I would wish to put on record are:

- As regards **Recommendation 8**, I am concerned that a numerical cap on the number of providers of taxi/PHV services risks having the effect of artificially and unnecessarily constraining competition, to the detriment of passengers – depriving them of the best prospect of high service standards, value for money and innovation in service provision.

I welcome the report’s recognition, in paragraph 3.40, of the risks of this and the consequent need to carry out *‘a clear, well-evidenced and considered public interest test before a number of restrictions can be applied’*.

Nevertheless, I am not convinced that the case for any kind of cap or numbers has been adequately made out.

In any event, I would urge that, even if there were to be such a cap, the factors taken into account in a public interest test should at least include, in addition to those listed in paragraph 3.41:

‘the effects on competition, including on service standards and affordability of fares, bearing in mind that the absence of affordable fares can induce people to travel by less safe modes of transport’.

- As regards **Recommendation 11**, I am concerned that limiting taxi and PHV operations to the area of pick-up or destination where the provider is licensed narrows the choice available to passengers and weakens competitive pressures, to the potential detriment of passengers (as described above).

Nevertheless, I fully recognise the concern that this recommendation is designed to address – namely, the risk of ‘forum shopping’ by providers, undermining regulatory safeguards applied by licensing authorities.

The report proposes some mitigating measures, specifically:

- Larger licensing areas (as proposed in Recommendation 4); I think that giving effect to this is a necessary precondition to Recommendation 11.
- The notion that operators should not be restricted from applying for and holding licences with multiple authorities, subject to meeting both national standards and any additional requirements imposed by the relevant licensing authority; in my view, this will be effective so long as the cost of multiple licensing is not so onerous as to represent a barrier to operators taking it up.

Finally, I should like to record that, in spite of the differences of opinion between members of the Group, it has been a huge privilege to work alongside such talented and well-informed individuals, who have brought their particular expertise and skills to bear on these difficult issues, and have consistently done so with a view to advancing the public interest, improving the sector and protecting the position of passengers and drivers.

I am in addition impressed by, and grateful for, the secretariat of officials from the Department for Transport who provided support and advice to the Group with admirable efficiency and professionalism.

As for our Chairman, Professor Mohammed Abdel-Haq, he had, as I have noted, the unenviable task of bringing together these disparate perspectives to form a coherent and workable set of recommendations; he is to be warmly commended on his achievement in doing so, and on conducting the Group’s meetings throughout in a spirit of courtesy and good humour. It has been an honour to be a member of his Group.

Anne Main MP

Member of Parliament for St Albans

It has been a pleasure to serve on the working group set up to advise and contribute to debate on the future of Taxi and Private Hire Vehicle licensing. The group has worked on this issue for a considerable period of time and there has been healthy debate throughout the process.

It is a considerable achievement that Professor Mohammed Abdel-Haq has been able to compile a report that has received backing from the many different viewpoints represented on the group.

Whilst I endorse almost all of the recommendations made in the report, I do want to share my concerns about three of the more contentious issues that we have not been able to find consensus on during our meetings;

Recommendation 8

I am concerned with the proposed power for local authorities to cap taxi and PHV vehicle licences. Whilst I appreciate that a public interest test will mitigate the potential issues with this proposal, I am still not convinced that it will benefit public safety or competition in the industry.

One of the issues that this seeks to address is ‘forum shopping’ by drivers who seek PHV licences from those authorities that are seen as easier, quicker and cheaper to get a licence from. The structure of the report suggests a significant strengthening of the licensing requirements across all local authority areas which I feel reduces any need for capping powers.

Combined with a more effective method of reducing drivers licensing in one area and working predominately in another, along with considerably higher licensing standards for all authority areas then I do not believe there is a requirement for a cap. Which I believe would reduce competition and do little to protect passenger safety.

Recommendation 11

I am still not convinced, based on evidence we have heard and read from many different stakeholder groups, that this is the best way to effectively license taxi and PHVs going forward. Although many firms will be totally unaffected by this, I believe there will be considerable implications for smaller PHV companies who regularly operate across several invisible local authority boundaries.

The aim of this recommendation is to prevent drivers being licensed in one part of the country from working predominately somewhere else. I had hoped we would have found a more creative way of reducing this problem whilst still retaining local autonomy, as I fear this recommendation is overly burdensome and is not a practical solution that fits in with passengers’ demands in the modern PHV industry.

I hope that the government will consult on this particular issue widely and seek to find a better and more creative solution that will protect the integrity of local authority licensing and retain healthy competition across boundaries that passengers have come to expect.

Recommendation 17

I do not believe the case has been made for the mandatory enforcement of CCTV in all taxis and PHVs. I support the aims of this recommendation, CCTV will be helpful for the prevention and conviction of crime involving taxi and PHV journeys.

However, I believe that local authorities should have the autonomy to decide on whether or not mandatory CCTV is required for the area in which they cover. I also remain concerned about the financial implications for drivers and small PHV companies who will bear the cost for installation, maintenance and recording of the footage in a data compliant manner.

I do believe the case has been made for drivers or companies choosing to have CCTV. This could form part of proposals for drivers to choose to license themselves at a higher level for passenger safety. A suggestion would be that if drivers choose to have CCTV installed, and license themselves at a higher level, this could allow them to operate across different LA boundaries other than the one they are licensed in.

I hope the government give careful consideration to the recommendations in this report. I believe there is a need to modernise the legislation governing the taxi and PHV industry and there are many sound proposals within this report that should be acted upon.

I would like to register my thanks to Professor Abdel-Haq and the team at the Department for Transport who have worked very hard to pull together this excellent report. I am also grateful to the other working group members who have contributed to a lively and informed debate.

Steve McNamara

General Secretary, Licensed Taxi Drivers' Association

The Licensed Taxi Drivers' Association agrees with the need to stop some drivers, particularly PHV drivers working through apps, from working excessively. However, we are concerned that the proposed measures set out in this report, especially the installation of tachographs, are neither practical nor proportionate and will prove to be very costly for both regulators and drivers.

For those PHV drivers who use apps for all their business it would be relatively easy to introduce restrictions on how long they are logged into the app. However, it would be much harder to regulate the hours of taxi drivers. The installation of tachographs has previously been discussed to try and control the hours of taxi drivers but each time the relevant regulator has deemed it an excessive measure, as well as intrusive and costly.

The best way to tackle excessive driving hours is to remove the need for drivers to work these hours in order to make ends meet. The LTDA believes that if all PHV operators paid their drivers at least the national minimum wage the hours those drivers feel the need to work would fall substantially.

Mick Rix

National Officer for Transport and Distribution, GMB union

The report attempts to address in a number of key areas enhanced public safety provisions with national minimum standards.

The issues around cross border working, plying for hire are issues which have blighted the trade for a number of years. The report recommendations are serious attempt to address these concerns and tackle head on what is a serious problem.

The recommendations on workers rights being placed into license conditions for operators if adopted will be another nail in the coffin for those who seek to exploit drivers for their own gain.

GMB urges the report recommendations to be adopted by our law makers and that legislation should be brought forward as quickly as possible.

Finally I would like to thank our Chair, who along with his good humour and humility, kept everyone focussed. It was a pleasure to work with him.

Donna Short

Director, National Private Hire and Taxi Association

Firstly I would like to echo the sentiments of every member of this group and commend the Chair of the group, Professor Mohammed Abdel-Haq, for a very comprehensive, detailed and easy to read report to the Minister. It is my belief that the report reflects accurately and succinctly the thoughts and views of the majority of the group's members on most of the points raised during the meetings held over the past few months.

This has been an arduous task, given the complexity of existing taxi and private hire legislation – and its archaic and user-unfriendly state, which was the prime motivation for Transport Minister John Hayes MP to have set up the group in the first place. In that regard I would also wish to thank the officers of the Department for Transport for their administrative support and input into the production of the report, and indeed the entire process of hosting and overseeing all the group meetings.

There is no need for me to put down each recommendation and comment on all of them, as in reality I am in agreement with most of the recommendations. What is most important is for the Minister to consider each of the recommendations' aims and goals, and whether they would pass the test of "Is this really what Parliament intends if/when they revise the legislation?"

This presupposes that the current Minister will approve and "sign off" the report at the earliest possible opportunity, so that Government can start work on those recommendations that may be activated immediately without having to depend upon new primary legislation - which we have all been advised would not be feasible for this industry during the current session of Parliament.

May I give a huge personal thumbs-up to **Recommendations 17/18** (CCTV in all licensed vehicles, with a funding boost; the debate is as to voluntary or mandatory) and Recommendation 26 (the training of council officers and emphatically, Councillors on licensing committees).

There are some recommendations however which will certainly be more controversial than others; none more so than **Recommendation 11** concerning all journeys – both taxi and private hire – having to start and/or finish within the area in which all three elements (driver, vehicle and operator) are licensed.

Given that there would be concessions made for certain segments of the industry, this only slightly eases the blow of what would otherwise cause a serious restraint of trade. In my opinion such a fundamental ring-fencing of licensing restriction would stifle competition, stunt the growth of some of the larger companies and conglomerates, and possibly put some of the smaller private hire operations out of business.

In practical terms, hundreds of operations that depend almost entirely on airport transfers (these operations are not exclusively chauffeur/executive, but often cater for a mix of upmarket and "ordinary" private hire passengers), would be severely hampered in particular, as often their drivers are dispatched to pick up or drop off regular customers at any of the major airports from, say, the driver's own home without having set foot in his licensing area during that journey.

Above all, there could be severe risks posed to public safety, as the recommended ABBA [that all taxi and PHV journeys should start and/or end within the area for

which the driver, vehicle and operator are licensed] restriction limits customer choice to the extent that some passengers may end up stranded, often late at night, merely because their potential transport has the wrong plate on the vehicle. This cannot be right, nor in the best interests of the travelling public.

We understand that the practice of many drivers and operators at the present time of working entirely remotely from their own licensing district is not what Parliament intended in any existing legislation; nor is it safe for the public in all its ramifications; nor is it anything but damaging to bona fide firms that “do it right”. There must be some way to curtail this pandemic abuse of licensing practice; however I do not believe that Recommendation 11 is the way to accomplish this.

Unfortunately any potential alternatives are scuppered by two recent pieces of case law: that of **Skyline Taxis v Milton Keynes Council** from November 2017 (where the necessity of a “physical presence” of a private hire operator base in each district was discarded), and **Knowsley MBC v Delta and Uber** from March 2018 (which rules out the concept of “intended use policy” for private hire). This entire topic requires intense investigation.

The other recommendation which seems to have caused a great deal of controversy is **Recommendation 8**: to set a cap on the number of private hire vehicles. At present there are entirely too many licensed vehicles now in operation, and this on the surface has caused severe competition, longer drivers’ hours, congestion and air quality issues.

However, it is my view that a cap on private hire numbers at this time is a “closing the stable door after the horse has bolted” scenario: it is too late to have the desired effect of correcting the above problems, as numbers have already skyrocketed and the vehicles that are currently licensed cannot be taken off the road purely on numerical grounds.

There is still a perceived need for more drivers and vehicles in some districts, whilst there is an over-supply in others. To limit PHV numbers across the board would possibly endanger passengers in those areas where supply is short, to the extent that those passengers could seek transport in unlicensed vehicles, drive their own vehicle when over the alcohol limit, or even attempt to walk to their destination and put themselves at risk on the street during night time hours.

If national standards are brought in at the level whereby (a) licence-shopping outside the district becomes less attractive; (b) reciprocal implementation of authority by officers allows for stricter enforcement across borders; and (c) the standards for both drivers and vehicles preclude volumes of casual licensing of substandard vehicles, these factors in themselves would limit further numbers of licensed vehicles flooding the market.

It is my belief that market forces will prevail without an artificial ceiling; supply and demand of PHVs must be allowed to continue in the name of fair competition and public safety.

As for driver training (**Recommendation 25**), this is an area that needs serious consideration: there is no longer a Sector Skills Council to sanction and implement future training programmes; there is no longer a current structure of updated BTEC (underpinning knowledge) and NVQ (assessment) that could be applied nationally; and crucially there is little funding in place to assist applicants to gain this very important and necessary training. The situation needs careful examination, new funding sources and constructive reform as soon as possible.

Within **Recommendation 30** (wheelchair accessible vehicle provision) the most important criterion must be clarity: it must be stressed that the Government position favours a mixed fleet of both saloon and wheelchair taxis. If it is not possible to have a set percentage of WAVs agreed across the entire country, then there must be another way to provide such provision without making WAVs compulsory across the entire taxi fleet in any one district. This policy is discriminatory against ambulant disabled passengers: arthritics, stroke victims, partially blind passengers, as they often have great difficulty getting into and out of WAVs.

There are perceived practical difficulties in implementing **Recommendation 34**, the restriction of taxi and PHV drivers' hours. Government will have to come up with an alternative to tachographs in every licensed vehicle, which is the current method of tracking drivers' hours in the bus, coach and logistics industries.

My only concern in respect of a possible omission within the recommendations is any mention of medical standards for drivers. I appreciate that this may fall under the category of "fit and proper" (which still needs defining); however in our experience the DVLA Group 2 criteria for medical fitness to drive are not being adhered to, either in terms of the exam itself or its correct frequency of intervals, by far too many licensing authorities. This poses a serious risk to the travelling public, and should be addressed with some urgency.

The motto, credo and remit of this Association from its inception has always been "to raise standards in the trade, both actual and as perceived by the public". The view of members of the group, and indeed the report itself, mirror(s) those desires and sentiments, and it has been an honour and a privilege for me to have been chosen and to have taken part in the group meetings and discussions.

Time is of the essence if this industry is to be rescued from its current state of chaotic lack of coherence and direction. I cannot emphasise strongly enough that this report encapsulates and addresses in great detail and insight the difficulties currently at hand, and – unlike previous attempts at reforming the industry - it must be acted upon with alacrity and determination.

Steve Wright MBE

Chairman, Licensed Private Hire Car Association

The views below are based on known policy and positions of LPHCA members alongside the discretionary judgement I am constitutionally afforded as LPHCA Chairman.

Given there were so many different and interested parties providing input, I feel the quality of the Report and the proposal outcomes, are in the main excellent and I'd like to congratulate and commend the Chair, DfT Officials and Group Colleagues for the hard work, professionalism and spirit of collaboration, widely shown.

Inevitably there are a few areas of non-agreement and unless referenced below, the LPHCA fully endorses the proposals and more generally the superb quality of the report.

Recommendation 8

We cannot agree with recommendation 8 because it is, in our view, anti-competitive, protectionist, un-environmentally friendly and safety compromising, furthermore it would be extremely costly, as well as difficult to enforce and regulate.

We do not accept that the proposal should help authorities to solve challenges around congestion, air quality and parking, which can be resolved outside of Taxi & PHV licensing. Nor do we accept that it would ensure appropriate provision of taxi and private hire services for passengers, while maintaining drivers' working conditions, which again is a matter that in our view is wholly outside of Taxi & PHV licensing.

This proposal, if adopted, could bring about shortage of supply and make it very difficult for hire and replacement vehicle companies to operate. This in turn could leave consumers at risk of being stranded because of volatile and unpredictable demand factors, such as the weather and seasonal demands (e.g. during, Diwali, Christmas & New Year periods).

This proposal also lacks any tangible safety benefits and in our view, it would compromise rather than enhance safety.

Recommendation 11

We cannot agree with recommendation 11 because it is anti-competitive, protectionist, un-environmentally friendly and safety compromising, furthermore it would be extremely costly, as well as difficult to enforce and regulate. It would also increase dead mileage, make the industry far less efficient, increase costs and potentially lead to demand outstripping supply, which has serious safety implications.

The notion that Operators could hold multiple licenses is unsound, unnecessary and cost-prohibitive. Some operators would need to hold scores and possibly hundreds of licenses to operate as they do now, the cost and administrative burden would take the Private Hire Industry into an area that we believe has no place in a modern economy.

This proposal, in our view, is also out of kilter with the Law Commission's recommendations, government policy and fair, progressive competition. It will be, without doubt, vehemently opposed by the Private Hire Industry and will badly let down consumers if taken forward. National standards, compliance and enforcement proposed by the Chair elsewhere will eradicate many of the current inhibiting factors

on Local Authorities to deliver 'fit for purpose' regulations, without such inhibitive measures.

This proposal looks to be borne out of so called 'Cross-Border hiring', something which has always been undertaken by PHVs without problem until the arrival of large 'App-Only' companies whose drivers show themselves publicly outside of the area they are licensed in.

The proposal, as drafted, would not solve 'Out of area working' as the entities that have caused this anomaly, will simply licence in every licensing authority, which will be beyond the scope of the vast majority of PHV operators in England.

A viable solution may be to only allow pre-booked and corporate journeys to be undertaken out of area, with PHV drivers only able to show their position / availability in the area they are licensed in.

This could be enshrined in the future definition of Plying for Hire recommended elsewhere, by establishing a clear distinction between Public and Private Hiring of PHV's and Taxis.

The notion that specialist services such as chauffeur and disability transport services could continue to operate cross border under exemption is problematic as defining what a chauffeur is would be difficult.

Nearly every PHV carries elderly, disabled, special needs and vulnerable passengers and many PHVs are not specialist vehicles, but nevertheless they are the preferred mode of door-to-door transport for such passengers. This proposal would have a negative impact on such passengers.

We therefore cannot endorse the proposal and point out there are far better ways to deal with 'cross-border' / 'out of area operation'. We believe safety would in fact, be compromised, rather than improved.

Recommendation 12

We agree that Licensing Authorities should ensure that their licensing administration and enforcement functions are adequately resourced, setting fees at an appropriate level to enable this.

We must however ensure that such fees are proportionate, distributed appropriately and set at reasonable levels. Such fees should also be applicable to taxi & PHV drivers and operators and not have commercially inhibiting factors in the fees structure.

Recommendation 17

We accept that CCTV has a great role to play regarding both passengers and driver safety. We have undertaken research with consumers, operators and drivers on both the merits and issues that CCTV can bring.

We accept 'in principle' the spirit of what is being sought by way of safety, but personal privacy, uncertainty of costs, who has access to the data and how this would affect entities that provide hire-cars for drivers when either broken down or following an accident are significant issues.

We therefore cannot agree with mandating CCTV across the board and would like government to undertake a full-blown regulatory impact assessment and have considerable dialogue with trade representatives and others, so we can get the right balance for CCTV to go forward in a viable way.

Recommendation 28

We agree that Licensing Authorities must require that all drivers are able to communicate in English orally and in writing to a standard that is required to fulfil their duties, including in emergency and other challenging situations.

A problem area however comes within any written element, which in our view in London has been set way above the standard that is required for a PHV driver to fulfil their duties. We would like a fixed national standard of English to be in place that enshrines an oral test, the ability to plan a route and use an atlas & satnav. Good tests are already available and in use by some Local Authorities.

The level needed for written English is low because the only writing that most taxi or PHV drivers will need to do in the course of work is to write out a receipt. Since the introduction of English Language testing in London, there have been legal challenges, trade protests, heavily signed petitions, alongside the changing of requirements and implementation dates.

Proposed exemptions have been dropped and a great deal of hardship, unnecessary stress and cost has also been the consequence, alongside serious unresolved issues for dyslexic drivers. The British Dyslexia Association are in contact with TfL and the LPHCA on very real problems that the written element is causing.

TfL's current English Language requirements has caused the Mayor of London to have two meetings with Trade Representatives to date. The requirement date has been moved back several times (now to 30th April 2019) and the Mayor has stated that further dialogue could be needed in 2019 to get things right.

As well as the above, taxi drivers in London are exempted, whilst PHV drivers are not, which is something we are looking at on the basis of equality and discrimination. It is also very questionable why someone who has been working in the PHV industry for many years needs to be retrospectively tested for their English.

It should be remembered that every PHV driver in London has passed a driving test and for many years all PHV drivers have undertaken a TfL approved topographical assessment.

We propose that an agreed pan-England standard of assessment is needed, rather than every Local Authority doing its own thing, at differing costs and standards.

Recommendation 30

We are very supportive of measures that improve disabled vehicle provision but around 90% of disabled passengers are not wheelchair bound and rely on normal PHVs for their transport, with many actually preferring non-wheelchair accessible vehicles.

Mandating fleet quotas would bring considerable problems for PHV Operators as well as many drivers who are majoritively self-employed and now move between fleets. We would therefore like government to facilitate dialogue with PHV trade representatives and disabled groups like the Disabled Persons Transport Advisory Committee (DPTAC) to discuss how Private Hire can play a greater role in providing appropriate vehicles.

SUMMARY

The LPHCA believes that following the Law Commission Review and Professor Mohammed Abdel-Haq's excellent report, a number of these recommendations could

be brought in fairly quickly as there appears to be wide ranging consensus on key areas.

We also feel that for certain recommendations like English Language, enhanced DBS and barred lists checks, use of the National Anti-Fraud Network (NAFN) database, etc., that an absolute standard should be put in place. This would ensure that inconsistency, which has traditionally been the root cause of licensing problems, is eradicated.

Foreword

I would like to thank the Chair and Members of the Task and Finish Group on Taxi and Private Hire Vehicle Licensing for their time and for sharing their knowledge and expertise. I share the group's desire to act where needed. Many of the recommendations in the Chair's report seek to ensure the safety of passengers in taxis and private hire vehicles wherever they may be travelling, and the report is clear on the role that government and licensing authorities must play to achieve this.

My Department has considered the recommendations made by the Chair and the comments of the members; it is clear where there is a consensus and where the arguments are more finely balanced. In this response I will set out the action Government will take. At the forefront of our deliberations are the interests of passengers, both in the short-term and going forward to provide a framework that works now and for the future as the sector faces further change.

The existing licensing framework provides licensing authorities with extensive powers to set appropriate standards for drivers, vehicles and private hire operators. As the Chair has identified, licensing authorities can bring about much of the needed reform through the use of these powers and we support the call for far greater collaboration between licensing authorities in the interests of both passengers and the trade.

Together, Government and licensing authorities can learn from past failings and regulatory and industry best practice, to provide a framework that fosters fair competition, high standards and a service for all that those working in the trade can be rightly proud of.

Nusrat Ghani MP

Parliamentary Under Secretary of State for Transport

Background

The Task and Finish Group

- 1 The Task and Finish Group (TFG) on Taxi and Private Hire Vehicle Licensing was established in September 2017. The group's remit was to consider evidence relating to the adequacy of current taxi and private hire vehicle (PHV) licensing authority powers, as set out in legislation and guidance, and to make recommendations for actions to address any priority issues identified; specifically:
 - Identifying the current priority concerns regarding the regulation of the sector, based on evidence of impact and scale across England;
 - Considering, in particular, the adequacy of measures in the licensing system to address those issues;
 - Considering whether it would advise the Government to accept the recommendations made in the Law Commission's May 2014 report on taxi and PHV legislative reform relevant to the issues, and;
 - Making specific and prioritised recommendations, legislative and non-legislative, for action to address identified and evidenced issues.
- 2 The Chair of the group, Professor Mohammed Abdel-Haq, submitted his report (the 'TFG report'), with individual annexes contributed by group members, to the Secretary of State for Transport on 9 July 2018.

The format of this response

- 3 This response first sets out a broad summary of the Government's position, and the actions it proposes to take.
- 4 This is followed, in chapters two to five, by a point-by-point consideration of the report's 34 specific recommendations. The chapter headings mirror the named sections of the TFG report.

1. Summary

The report of the Chair of the independent Task and Finish Group sets out a road-map for reform of the regulation of the taxi and private hire vehicle (PHV) sector. His report highlights the leadership role that government must provide and the extensive powers that licensing authorities currently have to shape the sector and the benefits of increased collaboration between them. Above all other considerations the Task and Finish Group has put the passenger at the heart of its thinking; we welcome and share this view. Government will take action where needed to ensure a safe and well-functioning sector which meets the needs and expectations of its passengers.

Greater collaboration is essential to delivering safe and convenient travel for all; unlike other forms of licensing the people and premises (in this case the drivers and vehicles) are mobile and will frequently be asked to work beyond the area in which they are licensed - while regulation is undertaken at a local level, journeys the public wish to take are not bound by borders. Greater consistency and collaboration in regulation is needed to address the changes in the sector and the concerns of the public, the trade and of regulators themselves.

The primary concern of the group was considering ways in which the safety of passengers can be protected. The Chair, with the full support of the group's members, has made a number of recommendations on robust measures he feels are appropriate and how government should ensure these are consistently applied and enforced. The Government accepts the three key measures recommended to achieve a safe service for passengers:

- National Minimum Standards
- National Enforcement Powers; and
- A National Licensing Database.

In addition, Government will consider further, with a view to legislation, the Chair's recommendation around tackling cross-border working, including how it might work in detail.

Government has already made commitments as part of its Inclusive Transport Strategy to work with licensing authorities to increase the availability of wheelchair accessible vehicles where demand is unmet; to prevent the refusal of wheelchair users and those travelling with assistance dogs; and to take strong action if such offences occur.

As with other parts of the economy, the PHV trade has experienced growth in numbers and changes to the way those within it work. The Good Work Plan, published in December 2018, sets out the Government's vision for the future of the labour market and its ambitious plans for implementing the recommendations arising from the Taylor Review.

2. Market function and regulation

TFG Recommendation 1

Notwithstanding the specific recommendations made below, taxi and PHV legislation should be urgently revised to provide a safe, clear and up to date structure that can effectively regulate the two-tier trade as it is now.

Government response

- 2.1 We agree that the regulation of taxis and private hire vehicles needs reform. Government acknowledged that need in 2012 by asking the Law Commission to review the regulation of the sector and propose an updated legislative framework. The Commission published a report and draft Bill in May 2014.
- 2.2 Since the Law Commission's report was published in 2014, the sector has undergone rapid change and continues to do so. Increased use of technology by passengers and the trade has resulted in a significantly different licensing landscape from that which existed when the Commission undertook its review. The TFG report makes a number of specific recommendations which conflict with the approach that the Law Commission took - for example, concerning cross-border journey restrictions - and it does not address in detail many of the fundamental questions about how an entirely new legislative framework might look.
- 2.3 We will set out in this response what legislation the Government proposes to take forward. In the short term this does not include a full replacement of the law which regulates taxi and private hire. It will, however, be important to fully consider this as part of work on the Future of Mobility¹, which will consider how Government can support new technology and innovation through regulatory frameworks which can evolve with time.

¹ <https://www.gov.uk/government/publications/industrial-strategy-the-grand-challenges/industrial-strategy-the-grand-challenges#future-of-mobility>

TFG Recommendation 2

Government should legislate for national minimum standards for taxi and PHV licensing - for drivers, vehicles and operators (see recommendation 6). The national minimum standards that relate to the personal safety of passengers must be set at a level to ensure a high minimum safety standard across every authority in England.

Government must convene a panel of regulators, passenger safety groups and operator representatives to determine the national minimum safety standards. Licensing authorities should, however, be able to set additional higher standards in safety and all other aspects depending on the requirements of the local areas if they wish to do so.

Government response

- 2.4 The Government agrees that there should be national minimum standards for taxi and PHV licensing, and will take forward legislation when time allows to enable these.
- 2.5 There is a welcome consensus in favour of the principle of national minimum standards, though careful consideration will be needed to define the scope of those standards and what they should be. In particular, it will be important to carefully balance the need to create more harmonised licensing practice, particularly where safety is concerned, with the important right of local licensing authorities to set conditions appropriate for their areas.
- 2.6 In the interim, Government will continue to review its statutory and best practice guidance. The development of these, through engagement and consultation, will ultimately shape the content of national minimum standards.
- 2.7 At Autumn Budget 2018, the Government announced that it will consider legislating at Finance Bill 2019-20 to introduce a tax-registration check linked to the licence renewal processes. This would include drivers of taxis and PHVs and PHV operators licensing in England and Wales. Applicants would need to provide proof they are correctly registered for tax in order to be granted these licences. This would help to raise regulatory standards and improve tax compliance in this sector.

TFG Recommendation 3

Government should urgently update its Best Practice Guidance. To achieve greater consistency in advance of national minimum standards, licensing authorities should only deviate from the recommendations in exceptional circumstances. In this event licensing authorities should publish the rationale for this decision.

Where aspects of licensing are not covered by guidance nor national minimum standards, or where there is a desire to go above and beyond the national minimum standard, licensing authorities should aspire to collaborate with adjoining areas to reduce variations in driver, vehicle and operator requirements. Such action is particularly, but not exclusively, important within city regions.

Government response

- 2.8 The Government welcomes this recommendation, recognising as it does the leadership role that Government must play but also the shared collective responsibility that licensing authorities have to work together to increase consistency beyond safety standards and in doing so address the root cause of wider concerns over 'out-of-area' working by some licensees.
- 2.9 Alongside this response, the Department is for the first time consulting on statutory guidance to be issued to licensing authorities which details the Department's view of how their functions may be exercised so as to protect children and vulnerable adults from harm. Licensing authorities are obligated to have regard to this guidance, and as such we expect the final recommendations to be enacted unless there is a clear local reason to deviate from them.

TFG Recommendation 4

In the short-term, large urban areas, notably those that have metro mayors, should emulate the model of licensing which currently exists in London and be combined into one licensing area. In non-metropolitan areas collaboration and joint working between smaller authorities should become the norm.

Government having encouraged such joint working to build capacity and effectiveness, working with the Local Government Association, should review progress in non-metropolitan areas over the next three years.

Government Response

- 2.10 The Government agrees that collaboration and joint working can be helpful in ensuring efficient operation of taxi and PHV licensing in smaller local authorities. The Government will keep progress in this area under review.

TFG Recommendation 5

As the law stands, plying for hire is difficult to prove and requires significant enforcement resources. Technological advancement has blurred the distinction between the two trades.

Government should introduce a statutory definition of both plying for hire and pre-booked in order to maintain the two-tier system. This definition should include reviewing the use of technology and vehicle 'clustering' as well as ensuring taxis retain the sole right to be hailed on streets or at ranks.

Government should convene a panel of regulatory experts to explore and draft the definition.

Government response

- 2.11 This matter was the subject of specific consideration by the Law Commission in the course of its review. The Commission ultimately concluded that a statutory definition of plying for hire would not be a practical improvement on the current position. This decision was reached with the advice of an expert panel established specifically for the purpose of discussing reform of "plying for hire". The Commission's main reason

for reaching this conclusion was that whether a vehicle is plying for hire in particular circumstances is a matter of fact and degree that the courts must consider. It concluded that many of the current grey areas would remain unresolved as no statutory list of factors could be sufficiently determinative to give clear guidance.

- 2.12 We have no reason to believe that the legal situation has changed since 2014, and thus no reason to believe that a new or reconvened expert panel would reach a different conclusion. As a result, the Government does not intend to take this recommendation forward at this time.

TFG Recommendation 6

Government should require companies that act as intermediaries between passengers and taxi drivers to meet the same licensing requirements and obligations as PHV operators, as this may provide additional safety for passengers (e.g. though greater traceability).

Government response

- 2.13 PHV operators, and companies that act as intermediaries for taxi bookings, do perform functions that appear very similar. However, the Government is not convinced that there is a compelling case for the licensing of taxi intermediaries (such as taxi apps or radio circuits).
- 2.14 An operator is fundamental to the booking of a PHV, and so has a distinct and legally necessary role in the regulatory system. Conversely, when a taxi is requested via an intermediary, that intermediary is doing nothing more than passengers could do themselves - they merely convey the request from the passenger to a taxi driver. This is unlike the situation with PHVs where it would be illegal for the passenger to engage the services of the driver directly, and the involvement of the PHV operator is necessary to make the journey a lawful one. This distinction reflects the greater degree of regulation applied to taxis than PHVs.
- 2.15 The Law Commission also considered this, and concluded that intermediaries working solely with licensed taxis should not require licensing.

TFG Recommendation 7

Central Government and licensing authorities should 'level the playing field' by mitigating additional costs faced by the trade where a wider social benefit is provided – for example, where a wheelchair accessible and/or zero emission capable vehicle is made available.

Government Response

- 2.16 Government is aware of the additional cost involved in the purchase of a wheelchair accessible vehicle (WAV) or a zero-emission capable vehicle, whether voluntarily or because of licensing requirements.

- 2.17 For zero-emission capable vehicles, the Government provides the plug-in car grant² and the plug-in taxi grant³.
- 2.18 A number of authorities are proactively encouraging the provision of WAVs through offering discounted licensing fees for these vehicles. Government welcomes this initiative and would encourage licensing authorities to consider what other incentives could be offered (particularly those which may not impose costs on licensing authorities themselves - for example, allowing WAVs access to bus lanes).
- 2.19 The Government does not propose to introduce further financial incentives for taxis and PHVs based on vehicle type at the current time; however we will keep this under review.

TFG Recommendation 8

Government should legislate to allow local licensing authorities, where a need is proven through a public interest test, to set a cap on the number of taxi and private hire vehicles they license. This can help authorities to solve challenges around congestion, air quality and parking and ensure appropriate provision of taxi and private hire services for passengers, while maintaining drivers' working conditions.

Government Response

- 2.20 Local licensing authorities outside London can currently limit the number of taxis they licence, provided there is no significant 'unmet demand' for taxi services in their areas. It is not currently possible by law for any licensing authority in England to limit the number of PHVs it licenses.
- 2.21 The TFG members had differing opinions on this recommendation, recorded in their comments in the annex to the report; Transport for London (TfL) strongly supports it, while some other members flag concerns about the effects on competition in particular. Competition benefits consumers by incentivising operators to give value for money, to innovate, and drive improvements in service standards.
- 2.22 Of particular concern would be any potential impact on safety. An undersupply of vehicles would increase wait times and cause people to be stranded in vulnerable situations, potentially increasing the use of unlicensed, unvetted and illegal drivers and vehicles. We acknowledge that the recommendation is that licence 'caps' should require a public interest test, which may allow for consideration of any negative impacts. Nevertheless, the potential negative impacts of capping for passengers are considerable, and real-life demand for taxi and PHV services can be very difficult to accurately calculate. Reducing the availability of PHVs could also result in higher prices for passengers, as, unlike taxis, PHV fares are not controlled.
- 2.23 There has been significant growth in the number of PHVs licensed in London in recent years; there was an increase of 66% between March 2014 and March 2017, from around 53,000 vehicles to nearly 88,000. Since then, the number does appear to have stabilised at around 87,500.⁴ TfL has congestion charging powers, and has announced following public consultation that the exemption from the congestion

² <https://www.gov.uk/government/publications/plug-in-car-grant/plug-in-car-grant-eligibility-guidance>

³ https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/682046/plugin-taxi-grant-vehicle-application-guidance.pdf

⁴ <https://tfl.gov.uk/info-for/taxis-and-private-hire/licensing/licensing-information>

charge currently given to PHVs when they are working will be removed from April 2019.⁵

- 2.24 The Government does not propose to take this recommendation forward. We would instead wish to see local authorities make the most use of existing powers to address air quality and congestion issues.

TFG Recommendation 9

All licensing authorities should use their existing powers make it a condition of licensing that drivers cooperate with requests from authorised compliance officers in other areas. Where a driver fails to comply with this requirement enforcement action should be taken as if the driver has failed to comply with the same request from an officer of the issuing authority

Government Response

- 2.25 The Government welcomes this recommendation. Regardless of any current or future rules on cross-border working (see paragraphs 2.30 - 2.35), drivers will on occasion encounter licensing officers from other authorities.
- 2.26 We are aware of a number of authorities that already have this requirement as part of their licensing conditions and we would encourage other licensing authorities to do so too. Where drivers are working in an area other than that in which they are licensed, it should be expected that licensees comply with the reasonable requests of any licensing officers, assisting them in ensuring compliance with appropriate standards, and ultimately protecting passengers.

TFG Recommendation 10

Legislation should be brought forward to enable licensing authorities to carry out enforcement and compliance checks and take appropriate action against any taxi or PHV in their area that is in breach of national minimum standards (recommendation 2) or the requirement that all taxi and PHV journeys should start and/or end within the area that issued the relevant licences (recommendation 11).

Government Response

- 2.27 The Government agrees that there should be national enforcement against the national minimum standards that will be introduced in response to recommendation two, and will legislate for this when time allows.
- 2.28 As noted above, regardless of any current or future rules on cross-border working, drivers will inevitably undertake some journeys which take them outside their licensed area. The benefits to passenger safety resulting from robust national minimum standards can only be maximised when effective enforcement ensures compliance with these, regardless of where journeys are taking place.

⁵ <https://consultations.tfl.gov.uk/policy/private-hire-charge-exemption/> (the exemption will continue to be available for wheelchair accessible PHVs).

- 2.29 The Government will work closely with licensing authorities and enforcement officers to ensure that the precise scope of national enforcement powers, and how they would be used in practice, are carefully considered and defined.

TFG Recommendation 11

Government should legislate that all taxi and PHV journeys should start and/or end within the area for which the driver, vehicle and operator (PHVs and taxis – see recommendation 6) are licensed. Appropriate measures should be in place to allow specialist services such as chauffeur and disability transport services to continue to operate cross border.

Operators should not be restricted from applying for and holding licences with multiple authorities, subject to them meeting both national standards and any additional requirements imposed by the relevant licensing authority.

Government Response

- 2.30 There are clearly a range of views within the sector and interested parties about how cross-border, or out-of-area, journeys by taxis and PHVs should be permitted or restricted. This can clearly be seen in the range of views expressed by individual members of the TFG in their comments in the annex to the report.
- 2.31 Currently, a PHV journey can take place anywhere in England provided that the driver, vehicle and operator are licensed by the same licensing authority. However, the licensing requirements in different areas (for example, the training required of drivers or the vehicle standards set) can vary considerably.
- 2.32 Such variations, combined with the freedom to carry out journeys anywhere, can incentivise drivers or operators to license away from the area where they actually intend to carry out work. This means that the ability of local licensing authorities to set and maintain taxi and PHV standards for their local areas is undermined.
- 2.33 We acknowledge the view that national minimum standards will go some way towards resolving that problem. The Suzy Lamplugh Trust noted in its comments on the TFG report that it did not support recommendation 11 because the introduction of national minimum standards would resolve the current practice of drivers choosing which licensing authority to obtain their licence from based on "less stringent" safety checks.
- 2.34 Even with national minimum standards in place, there will still be variations in licensing conditions (and therefore matters like licence costs and processing times), since the Government does not intend to remove the ability of licensing authorities to set their own local standards in matters not covered by the national minimum standards, or above and beyond those minimum standards. Local authorities are accountable for licensing in their areas and it is only right that they have the powers to properly shape and influence their local market.
- 2.35 Government therefore agrees with the principle of this recommendation, and will consider further (with a view to legislation) how it might best work in detail. In particular, Government will need to consider what size of area is appropriate. We will also consider what flexibilities or exemptions might be needed to reduce or avoid negative impacts on any particular business models, types of transport or passenger,

and businesses or localities that are close to (perhaps multiple) licensing authority borders.

TFG Recommendation 12

Licensing authorities should ensure that their licensing administration and enforcement functions are adequately resourced, setting fees at an appropriate level to enable this.

Government Response

- 2.36 The prime reason for regulation of taxis and PHVs is to protect the public and licensing authorities must ensure that this function is sufficiently resourced to do so. We therefore urge licensing authorities to ensure that they have efficient and effective procedures in place to minimise the cost to the trade of establishing a robust and well-resourced licensing body and undertake a review of their licensing fees to recover the permissible costs and no more of providing this.

TFG Recommendation 13

Legislation should be introduced by the Government as a matter of urgency to enable Transport for London to regulate the operation of pedicabs in London

Government Response

- 2.37 The Government fully supports this recommendation.
- 2.38 Under the current law, pedicabs can be regulated as taxis elsewhere in England but not in London. This is the result of the differing legislation that governs London and the rest of England. In London, pedicabs are considered to be 'stage carriages' rather than taxis (hackney carriages). The resulting lack of any regulation of pedicabs in London is an anomaly which needs fixing, in the clear interest of passengers.
- 2.39 The Government has worked with TfL to support the Pedicabs (London) Private Members' Bill brought forward by Paul Scully MP. The objective of the Bill has cross party support, and we hope that Parliament will enable this to become statute.
- 2.40 Should the Pedicabs (London) Bill not become law, the Government will put forward its own legislation when time permits to enable TfL to regulate pedicabs.

TFG Recommendation 14

The Department for Transport and Transport for London should work together to enable the issue of Fixed Penalty Notices (FPNs) for both minor taxi and PHV compliance failings. The Department for Transport should introduce legislation to provide all licensing authorities with the same powers.

Government Response

- 2.41 The Transport for London Act 2008 enables an FPN system to be introduced for certain taxi and PHV offences within London. These powers have never been commenced by TfL. Despite the title of the relevant schedule to the 2008 Act, the list of offences only relates to Acts which govern taxi regulation and therefore would not enable FPNs to be issued regarding any PHV offence.
- 2.42 The Department for Transport and TfL are discussing what amendments to the schedule of offences would be required to address this regulatory imbalance and address TfL's concerns, so that it can make effective use of its powers.
- 2.43 The Department is aware that a number of licensing authorities operate a penalty points system to address minor infringements. We will engage with licensing authorities to establish if there is significant demand for a power to issue fixed penalty notices outside of London to assist in the enforcement of national minimum standards.

TFG Recommendation 15

All ridesharing service services should explicitly gain the informed consent of passengers at the time of the booking and commencement of the journey.

Government Response

- 2.44 Taxi and PHV ridesharing services (i.e. multiple passengers sharing a taxi or PHV to the same, or similar, destinations who are charged separate fares - for example, the 'Uber Pool' service) have been permitted for over 30 years but the adoption by the public of new technology is likely to increase the participation rate.
- 2.45 Government supports choice for consumers but this must be an informed choice. It would be unacceptable for any person to be led to believe that they are hiring a taxi or PHV exclusively, and then be expected to share with other passengers who are unknown to them. Although the TFG report does not present any evidence that such confusion is happening in practice, operators should ensure their systems make it entirely clear to passengers when they are engaging a shared service. Licensing authorities may wish to ensure that their operator licensing conditions make clear that operators must do this.

3. Safety in taxis and private hire vehicles

- 3.1 Many of the recommendations made by the TFG Report in this area call on local licensing authorities to make better use of their existing powers, ahead of Government legislating for the introduction of national minimum standards.

TFG Recommendation 16

The Department for Transport must as a matter of urgency press ahead with consultation on a draft of its Statutory Guidance to local licensing authorities. The guidance must be explicit in its expectations of what licensing authorities should be doing to safeguard vulnerable passengers. The effectiveness of the guidance must be monitored in advance of legislation on national minimum standards.

Government Response

- 3.2 The TFG received submissions and heard evidence on ways to increase passenger safety from a wide range of organisations.
- 3.3 Both the Jay and Casey Reports into child sexual abuse and exploitation noted the prominent role played by taxi and PHV drivers in a large number of cases of abuse. The Casey Report in particular uncovered what was described as "weak and ineffective arrangements for taxi licensing which leave the public at risk." To help reduce the risk posed to children and vulnerable individuals from harm by taxi and PHV drivers who seek to abuse their position of trust, section 177 of the Policing and Crime Act 2017 enables the Secretary of State to issue statutory guidance to licensing authorities on the exercise of their taxi and PHV licensing functions.
- 3.4 The TFG was invited to review the draft statutory guidance ahead of the public consultation, and it has now been published for consultation alongside this response. The Department is grateful to the organisations it engaged with while drafting the guidance for consultation, and we encourage all organisations and individuals with views on the guidance to respond to the consultation.

TFG Recommendation 17

In the interests of passenger safety, particularly in the light of events in towns and cities like Rochdale, Oxford, Newcastle and Rotherham, all licensed vehicles must be fitted with CCTV (visual and audio) subject to strict data protection measures. Licensing authorities must use their existing power to mandate this ahead of the requirement's inclusion in national minimum standards.

To support greater consistency in licensing, potentially reduce costs and assist greater out of area compliance, the Government must set out in guidance the standards and specifications of CCTV systems for use in taxis and PHVs. These must then be introduced on a mandatory basis as part of national minimum standards

Government Response

- 3.5 The Government's view on the use of CCTV in taxis and private hire vehicles is set out in the consultation on draft statutory guidance which accompanies this response.
- 3.6 It is the Department's view that CCTV (with targeted overt recording of audio instigated when either the passenger or driver deems necessary) provides additional public protection - to both passengers and drivers - providing a fuller objective record of events, assisting in identification of unacceptable and/or illegal behaviour by all occupants of the vehicle. As the TFG report identifies, ridesharing in taxis and PHVs is becoming more popular, introducing further risks as passengers are travelling in close proximity with strangers.
- 3.7 However, Government must also consider the importance of protecting individuals' privacy. It is vital therefore that any recordings made are able to be viewed only by those with a legitimate need to do so, such as the police when investigating an allegation or licensing authorities in response to a complaint. Licensing authorities should refer to guidance issued by the Information Commissioner and the Surveillance Camera Commissioner when formulating their policies on the specification and use of in vehicle CCTV system.
- 3.8 It should be noted that where a local authority considers granting a license subject to CCTV conditions, it assumes the role of a system operator for the purposes of the Home Secretary's Surveillance Camera Code issued under the Protection of Freedoms Act 2012, which means it must have regard to the Code; and is the data controller for the purposes of the Data Protection Act 2018.

TFG Recommendation 18

As Government and local authorities would benefit from a reduction in crime in licensed vehicle both should consider ways in which the costs to small businesses of installing CCTV can be mitigated.

Government Response

- 3.9 It is likely that Government and local authorities would benefit from a reduction in crime as a result of more extensive installation of CCTV in taxis and PHVs. However, CCTV is installed in many businesses at their own cost with an expectation that this

will deter crime and so protect their staff and property. For example, similar conditions may be required before granting establishments a licence to sell alcohol.

- 3.10 Government has acted to assist the trade where tighter regulation has significantly increased costs, for example providing a grant of up to £7,500 to assist the trade in transitioning to zero emission capable vehicles. The cost of installing a CCTV system is similar to a replacement set of tyres for a vehicle; as such we do not consider subsidising of these additional costs is necessary.

TFG Recommendation 19

National standards must set requirements to assist the public in distinguishing between taxis, PHVs and unlicensed vehicles. These should require drivers to have on display (e.g. a clearly visible badge or arm-band providing) relevant details to assist the passengers in identifying that they are appropriately licensed e.g. photograph of the driver and licence type i.e. immediate hire or pre-booked only.

All PHVs must be required to provide information to passengers including driver photo ID and the vehicle licence number, in advance of a journey. This would enable all passengers to share information with others in advance of their journey. For passengers who cannot receive the relevant information via digital means this information should be available through other means before passengers get into the vehicle.

Government Response

- 3.11 It is clearly important that people are able to identify a licensed vehicle and driver, minimising the risk of them travelling in vehicles that are not licensed or correctly insured.
- 3.12 It is also common that people do not understand fundamental differences between taxis and PHVs; comments from the Suzy Lamplugh Trust in the annex to the TFG report highlight that over a quarter of people believe PHVs can be hired directly through the driver.
- 3.13 There are divergent standards through England as to what a taxi and PHV may look like, or display. These differences range from the minor e.g. whether an operator's details can or must be displayed (either permanently or in a form which can be removed) to specifying what colour vehicles must be in order to be licensed.
- 3.14 The Government will consider what vehicle and driver identification requirements should be included within national minimum requirements, focussing on supporting safety. Over and above national minimum standards, local considerations (particularly in respect of vehicle licensing conditions) will remain important.

TFG Recommendation 20

All drivers must be subject to enhanced DBS and barred lists checks. Licensing authorities should use their existing power to mandate this ahead of inclusion as part of national minimum standards.

All licensing authorities must require drivers to subscribe to the DBS update service and DBS checks should must be carried out at a minimum of every six months. Licensing authorities must use their existing power to mandate this ahead of inclusion as part of national standards.

Government Response

- 3.15 The Government agrees with both parts of this recommendation, and they are included in the statutory guidance which has been issued for consultation alongside this response. In the longer term, they will be considered as part of national minimum standards.
- 3.16 In 2012 the Government enabled licensing authorities to undertake enhanced Disclosure and Barring Service (DBS) checks; this includes the ability to check both barred lists, which list people who are prevented from working with children and/or adults as they are, have been, or might in the future be, engaged in regulated activity or where a person is cautioned or convicted for a relevant (automatic barring) offence. As the TFG report acknowledges, all licensing authorities have a stated policy of requiring enhanced DBS checks for taxi and PHV drivers, but a small minority of authorities do not also check the barred lists despite there being no additional cost to do so.
- 3.17 The TFG report also highlights the benefits of requiring licensees to subscribe to the DBS's update service, through reduced administration and lower long-term costs for both licensing authorities and licensees themselves.

TFG Recommendation 21

Government must issue guidance, as a matter of urgency, that clearly specifies convictions that it considers should be grounds for refusal or revocation of driver licences and the period for which these exclusions should apply. Licensing authorities must align their existing policies to this ahead of inclusion in national minimum standards.

Government Response

- 3.18 The Government agrees with this recommendation, and its view has been included in the statutory guidance which has been issued for consultation alongside this response.
- 3.19 As with the introduction of national minimum standards, Government will seek to balance the need for greater nationwide consistency with respect for local decision making. We welcome the work that the Institute of Licensing in partnership with the Local Government Association, the National Association of Licensing and Enforcement Officers and Lawyers in Local Government have done in this area. Their work has informed the guidance on previous convictions that is included in the

draft statutory guidance. The intention is that, subject to the outcome of the consultation, this will be included in national minimum standards.

TFG Recommendation 22

The Quality Assurance Framework and Common Law Police Disclosure Provisions must be reviewed to ensure as much relevant information of behaviours as well as crimes by taxi and PHV drivers (and applicants) is disclosed to and to ensure licensing authorities are informed immediately of any relevant incidents.

Government Response

- 3.20 Under section 113B (4) of the Police Act 1997, the legislation requires that the DBS requests that a relevant Chief Officer of police provide any information which he/she reasonable believes to be relevant and considers ought to be disclosed. The Quality Assurance Framework (QAF) is the decision-making tool used by the Disclosure Units of police and other law enforcement agencies when considering whether information should be disclosed or not for inclusion in Enhanced Disclosure and Barring Service certificates. This is overseen by the National Police Chiefs' Council (NPCC) as it relates to the statutory police role within the disclosure regime.
- 3.21 Under Common Law Police Disclosure provisions (CLPD), the police can use their common law powers for the prevention and detection of crime to proactively provide police intelligence or information to a third party (such as a licensing authority) where there is a public protection risk, to allow them to act swiftly to mitigate any danger. It is for Chief Police Officers to locally determine the implementation of CLPD provisions.
- 3.22 Government will discuss the provision of information with the NPCC with a view to ensuring that appropriate steps are being taken to provide relevant information to licensing authorities.

TFG Recommendation 23

All licensing authorities must use the National Anti-Fraud Network (NAFN) register of drivers who have been refused or had revoked taxi or PHV driver licence. All refusals and revocations must be recorded, and the register checked for all licence applications and renewals. Licensing authorities must retain the reasons for any refusal, suspension or revocation and provide those to other authorities as appropriate. The Government must, as a matter of urgency, bring forward legislation to mandate this alongside a national licensing database (recommendation 24).

Government Response

- 3.23 It is important that licensing authorities who are making a decision on whether to grant a taxi or PHV driver licence can do so in possession of all relevant facts, including whether the applicant has been refused or lost a licence in another area because of safety concerns. At present, there is no data sharing mechanism to make sure that such history is disclosed to them.

- 3.24 The Government supports the Private Member's Bill brought by Daniel Zeichner MP that would mandate licensing authorities to use such a database. The Government also welcomes the initiative of the LGA in setting up a voluntary database of drivers who have been refused or revoked licences. Any information obtained using data sharing methods like this must be used as an aid to local, independent decision making. The statutory guidance which is published for consultation alongside this response expands further on the Government's view.
- 3.25 In the longer term, the Government intends that information about drivers who have had licences refused or revoked would be one part of the wider-ranging national database discussed against the next recommendation (24).

TFG Recommendation 24

Government must establish a mandatory national database of all licensed taxi and PHV drivers, vehicles and operators, to support stronger enforcement.

Government Response

- 3.26 Government will legislate for the creation of a national taxi and private hire database, as a necessary accompaniment to national enforcement powers. Development of the database will take account of the work undertaken for the identification of taxis and PHVs for charging Clean Air Zone purposes.
- 3.27 It will assist in the effective application of national minimum standards by enabling suitably qualified local authority enforcement officers to take action against taxis and PHVs regardless of where they are licensed.
- 3.28 The establishment of a national licensing database will assist bodies such as licensing authorities and the police to communicate information in a timely manner, as it will enable them to quickly and accurately identify where a driver or vehicle are licensed. For example, this would assist the police in disclosing relevant information under the Common Law Police Disclosure powers.

TFG Recommendation 25

Licensing authorities must use their existing powers to require all drivers to undertake safeguarding / child sexual abuse and exploitation awareness training including the positive role that taxi/PHV drivers can play in spotting and reporting signs of abuse and neglect of vulnerable passengers. This requirement must form part of future national minimum standards.

Government Response

- 3.29 The Government welcomes this recommendation and the acknowledgement that such a requirement can be universally applied under powers already available to licensing authorities.
- 3.30 The draft statutory guidance which has been issued for consultation alongside this response includes a recommendation that licensees should be required to undertake safeguarding / child sexual abuse and exploitation awareness training.

- 3.31 In the longer term, the Government intends that this requirement would be included in national minimum standards.

TFG Recommendation 26

All individuals involved in the licensing decision making process (officials and councillors) must have to undertake appropriate training. The content of the training must form part of national minimum standards.

Government Response

- 3.32 It is important that councillors or officers making decisions about the suitability of licensing applicants are suitably trained and equipped to do so. Authorities may have very robust policies in place, but it is the practical application of these that provides protection to the public. Licensing officers may frequently be called on to make difficult decisions, such as revoking or refusing a licence conscious of the implications that decision may have on the applicant or licensee and their family. Licensing authorities must ensure that their decision makers are aware of the public protection role they have and that the overriding consideration is the safety of the public.
- 3.33 The draft statutory guidance which has been published for consultation alongside this response recommends that those charged with determining taxi and PHV licensing matters undertake appropriate training.
- 3.34 In the longer term the Government intends that the requirement for training would be included in national minimum standards.

TFG Recommendation 27

Government must review the assessment process of passenger carrying vehicle (PCV) licensed drivers and/or consider the appropriate licensing boundary between taxis/PHVs and public service vehicles (PSVs).

Government Response

- 3.35 The TFG report explains the current demarcation (i.e. seating capacity) and differing licensing processes between the PHV and Public Service Vehicle (PSV - minibuses, buses and coaches) regimes.
- 3.36 The Government attaches the utmost priority to passenger safety in the licenced taxi and PHV trade. The licensing regime for any transport mode must be reflective of the relative potential risk they might pose to the travelling public. It is not therefore acceptable that the PHV licensing regime may be evaded through the use for PHV bookings of drivers and vehicles which are not licensed for PHV purposes.
- 3.37 Where PHV operators also hold a PSV operator's licence, PSVs should not be used to fulfil bookings except with the informed consent of the hirer. For example, if a member of the public contacts a PHV operator and seeks a booking for a party of fewer than nine passengers, it cannot be reasonable to assume that a PSV is required unless there are other factors e.g. a large amount of baggage. If, for

example, a nine-seater minibus (a PSV) is necessary, the difference in licensing requirements should be explained and explicit consent obtained. Licensing authorities should use their existing powers to include as a condition of a PHV operator's licence that bookings received by that licence-holder must be fulfilled using a PHV licensed driver and vehicle. Authorities may then take appropriate steps to monitor and enforce compliance with the licence condition.

- 3.38 In the longer term, it will be important to consider as part of the Future of Mobility Grand Challenge what changing technologies and ways of working might mean for the differing regulatory frameworks applied to road transport in the UK, including whether the number of seats in a vehicle remains an appropriate way of deciding how to regulate.

TFG Recommendation 28

Licensing authorities must require that all drivers are able to communicate in English orally and in writing to a standard that is required to fulfil their duties, including in emergency and other challenging situations.

Government Response

- 3.39 Government supports this recommendation. Those that carry members of the public must be able to understand the needs of their passengers.
- 3.40 The draft statutory guidance which has been issued for consultation alongside this response recommends that licensing authorities require an English assessment (oral and written) for their licensees.
- 3.41 In the longer term, Governments intends that this requirement would be included in national minimum standards.

4. Accessibility

TFG Recommendation 29

All licensing authorities should use their existing powers to require that their taxi and PHV drivers undergo disability awareness and equality training. This should ultimately be mandated as part of national minimum standards.

Government Response

- 4.1 The Government supports this recommendation. Taxis and PHVs play a vital role in enabling disabled people to travel where other modes may not be available or accessible. The Department has, in previous best practice guidance, encouraged licensing authorities to use their powers to improve drivers' awareness of the needs of disabled people including by undertaking disability awareness training. This training should include awareness of less visible impairments, such as learning disabilities and dementia.
- 4.2 Licensing authorities have the powers to mandate this training. The TFG report highlights the low proportion of authorities (38% as of 31 March 2017, increasing to 41% as of 31 March 2018) which currently do so.
- 4.3 Since the Group submitted its report, Government has published the Inclusive Transport Strategy⁶ (ITS). The ITS includes a commitment to consult on updated best practice guidance which should better support licensing authorities to use their existing powers. In particular, we will recommend that authorities require taxi and PHV drivers to complete disability awareness and equality training, make it simple to report discrimination, and take robust action against drivers who have discriminated against disabled passengers.
- 4.4 In the longer term the Government intends that these training requirements will be included in national minimum standards.

TFG Recommendation 30

Licensing authorities that have low levels of Wheelchair Accessible Vehicles (WAVs) in their taxi and PHV fleet should ascertain if there is unmet demand for these vehicles. In areas with unmet demand licensing authorities should consider how existing powers could be used to address this, including making it mandatory to have a minimum number of their fleet that are WAVs. As a matter of urgency the Government's Best Practice Guidance should be revised to make appropriate recommendations to support this objective

⁶ <https://www.gov.uk/government/publications/inclusive-transport-strategy>

Government Response

- 4.5 The TFG report highlights the variation in the availability of wheelchair accessible vehicle (WAVs) across England. In over a quarter of authorities, 5% or fewer of taxis are wheelchair accessible, and this measure increases to nearly two-thirds of authorities for PHVs. It is however acknowledged that an entirely WAV fleet may not be beneficial to disabled passengers, most of whom are not wheelchair users.
- 4.6 In its comments in the annex to the TFG report, Transport for London comments on the difficulty in achieving a mixed PHV fleet as vehicles are often licensed by individuals rather than PHV operators to whom a quota might be more easily applied. The Local Government Association also noted that there may be practical barriers to mandating practicality minimum WAV numbers.
- 4.7 In the ITS Government stated a desire to see a much greater proportion of WAVs, particularly in non-urban areas, over the next 10 years. We will write to all local licensing authorities stressing the importance of supporting an inclusive taxi and PHV fleet.
- 4.8 We will continue to monitor the proportion of WAVs within overall taxi and PHV fleets, as reported in the annual DfT taxi and PHV statistics, and to seek clarification from authorities as to the steps they are taking to assess and respond to the local need for such vehicles.

TFG Recommendation 31

Licensing authorities which have not already done so should set up lists of Wheelchair Accessible Vehicles (WAVs) in compliance with s.167 of the Equality Act 2010, to ensure that passengers receive the protections which this provides.

Government Response

- 4.9 In 2017, the Government commenced sections 165 and 167 of the Equality Act 2010. Under Section 167 a licensing authority may publish a list of their licensed vehicles designated as wheelchair accessible; those vehicles are then required to apply the passenger protections in Section 165. These are to not charge more to a passenger in a wheelchair than to any other passenger, and to provide reasonable assistance (drivers may be exempted from the latter on medical grounds).
- 4.10 In the ITS, Government strongly encouraged licensing authorities to publish lists under section 167 of the Equality Act 2010 to ensure that wheelchair users are protected from discriminatory behaviour. The ITS also committed Government to:
- From autumn 2019 publish on an annual basis a list of those authorities which we know to have issued a list of taxis and PHVs designated as being wheelchair accessible in accordance with Section 167 of the Equality Act 2010;
 - Continue to encourage local licensing authorities, which have not already done so, to publish lists of taxis and PHVs designated as wheelchair accessible under Section 167 of the Equality Act 2010, and to inform the Department that they have done so.

TFG Recommendation 32

Licensing authorities should use their existing enforcement powers to take strong action where disability access refusals are reported, to deter future cases. They should also ensure their systems and processes make it as easy as possible for passengers to report disability access refusals.

Government Response

- 4.11 The TFG report notes the findings of a recent survey of guide dog owners which identified that almost half (42%) had experienced a refusal to enter a taxi or PHV in the previous year because of their dog. The Government agrees that this is unacceptable.
- 4.12 In the ITS we committed to undertake research to identify why the risk of fines and the loss of a driver's taxi or PHV licence appear insufficient in some circumstances to prevent them from discriminating against assistance dog owners. It is obvious that prevention of illegal refusals is preferable to retrospective sanctions, which do little to rebuild the confidence of assistance dog users who have been subject to illegal refusals. We will therefore use evidence from this research to inform ways in which training can play a role in preventing refusals occurring. As set out in response to recommendation 29 of the TFG report, Government intends to include disability awareness and equality training in national minimum standards.
- 4.13 The Government agrees that those that refuse to meet their legal obligation under Sections 168 and 170 of the Equality Act 2010 should be subject to enforcement action. We have stated in the ITS that licensing authorities should use the powers available to them, and take robust action against those who have discriminated illegally against disabled passengers.

5. Working conditions

TFG Recommendation 33

The low pay and exploitation of some, but not all, drivers is a source of concern. Licensing authorities should take into account any evidence of a person or business flouting employment law, and with it the integrity of the National Living Wage, as part of their test of whether that person or business is "fit and proper" to be a PHV operator.

Government Response

- 5.1 The TFG report acknowledges that the group did not have the expertise, nor was it within its scope, to determine the employment status of drivers. This is also true of licensing authorities; only the courts can make rulings on employment status.
- 5.2 However, the Government agrees that the decisions of tribunals, and whether an operator concerned is complying with a ruling in the way the law requires, should reasonably be considered by a licensing authority as part of the 'fit and proper' test for a PHV operator. It is unacceptable for business not to comply with and deny workers their statutory employment rights - such as the appropriate National Minimum Wage rate or National Living Wage - and if a business deliberately does so in disregard of what is required of them, this calls into question whether they are fit and proper to be licensed.
- 5.3 As the TFG report also notes, the current high-profile debate on employment status goes beyond the taxi and PHV sector. The Good Work Plan, published in December 2018, states Government will legislate to improve the clarity of the employment status tests, reflecting the reality of modern working relationships.

TFG Recommendation 34

Government should urgently review the evidence and case for restricting the number of hours that taxi and PHV drivers can drive, on the same safety grounds that restrict hours for bus and lorry driver.

Government Response

- 5.4 The TFG report explains that although the group did not receive independent evidence of the number of hours drivers are working (or, more specifically, driving), the current lack of regulation of working hours for taxi and PHV drivers may potentially be a cause for concern.

- 5.5 The report also acknowledges that there may be monitoring and enforcement problems to enforcing such limits. This is particularly the case in a sector where currently the majority of drivers are self-employed.
- 5.6 In the first instance, in order to assess the scale of the issue, the Government will engage informally with sector stakeholders to determine whether it is possible to more accurately assess the hours drivers are working, and whether there is a trend for working more or excessive hours. The Government is mindful not just of road safety, but also of the need to avoid burdensome, yet difficult to enforce, regulation.

1. Introduction

- 1.1 The Department first issued Best Practice Guidance to assist those licensing authorities in England and Wales that have responsibility for the regulation of the taxi and private hire vehicle (PHV) trades in 2006. Following consultation with stakeholders, taking into account their feedback on the original version, the Guidance was revised and updated in 2010.
- 1.2 There is evidence to support the view that taxis and PHVs are a high-risk environment. In terms of risks to passengers, this can be seen in the number of sexual crimes reported which involve taxi and PHV drivers. Data from Greater Manchester¹ and Merseyside² on reported sexual assaults suggest that, if similar offence patterns are applied across England, 623 sexual assaults per year are reported. These figures do not however account for the under reporting of crime which is estimated to be as high as 83% in the Crime Survey for England and Wales³.
- 1.3 The Policing and Crime Act 2017 enables the Secretary of State for Transport to issue Statutory Guidance on exercising taxi and PHV licensing functions to protect children and vulnerable individuals who are over 18 from harm when using these services. For the purposes of this guidance, a child is defined as anyone who has not yet reached their 18th birthday; and the term “vulnerable individual” has the same meaning as the definition of a ‘vulnerable adult’ for the purpose of section 42 of the Care Act 2014⁴, which applies where a local authority has reasonable cause to suspect that an adult in its area (whether or not ordinarily resident there):
- (a) has needs for care and support (whether or not the authority is meeting any of those needs),
 - (b) is experiencing, or is at risk of, abuse or neglect, and
 - (c) as a result of those needs is unable to protect himself or herself against the abuse or neglect or the risk of it.
- 1.4 There is consensus that common core minimum standards are required to regulate better the taxi and PHV sector, and the recommendations in this document are the result of detailed discussion and consideration. **The Department therefore expects these recommendations to be implemented unless there is compelling local reason not to.**

4 <http://www.legislation.gov.uk/ukpga/2014/23/section/42/enacted>

February 2019 – consultation version

- 1.5 It should be noted that as policing and criminal justice is not a devolved matter, the Statutory Guidance issued under the Policing and Crime Act 2017 will continue to have effect in Wales although responsibility for taxis and PHVs was devolved to the Welsh Assembly in April 2018. Should the Welsh Government introduce legislation to regulate the sector, this guidance would however cease to apply.
- 1.6 All local authorities and district councils that provide children’s and other types of services, including licensing authorities, have a statutory duty to make arrangements to ensure that their functions and any services that they contract out to others are discharged having regard to the need to safeguard and promote the welfare of children. This means that licensing authorities should have in place arrangements that reflect the importance of safeguarding and promoting the welfare of children. This includes clear whistleblowing procedures, safe recruitment practices and clear policies for dealing with allegations against people who work with children, as set out in the *Working Together to Safeguard Children*⁵ statutory guidance.
- 1.7 This new Statutory Guidance reflects the significant changes in the industry and lessons learned from experiences in local areas since the Department’s Best Practice Guidance was last updated. This includes extensive advice on checking the suitability of individuals and operators to be licensed; safeguarding children and vulnerable adults; the Immigration Act 2016 and Common Law Police Disclosure (which replaced the Notifiable Occupations Scheme).
- 1.8 This Statutory Guidance replaces relevant sections of the Best Practice Guidance issued by the Department in 2010. A consultation on revised Best Practice Guidance, which focuses on recommendations to licensing authorities to assist them in setting appropriate standards (other than those relating to passenger safety) to enable the provision of services the public demand, will be taken forward once the final Statutory Guidance has been issued.

Terminology

Taxis are referred to in legislation, regulation and common language as ‘hackney carriages’, ‘black cabs’ and ‘cabs’. The term ‘**taxi**’ is used throughout this guidance and refers to all such vehicles. Taxis are able to be hired immediately by hailing on the street or at a rank.

Private hire vehicles (PHVs) include a range of vehicles including minicabs, executive cars, chauffeur services, limousines and some school and day centre transport services. All PHV journeys must be pre-booked via a licensed PHV operator and are subject to a ‘triple licensing lock’ i.e. the operator fulfilling the booking must use vehicles and drivers licensed by the same authority as that which granted its licence. The term **PHV** is used throughout this guidance to refer to all such vehicles.

⁵ <https://www.gov.uk/government/publications/working-together-to-safeguard-children--2>

2. Statutory Guidance

Consideration of the Statutory Guidance

- 2.1 The Government set out in the Modern Crime Prevention Strategy⁶ the evidence that where Government, law enforcement, businesses and the public work together on prevention, this can deliver significant and sustained cuts in certain crimes. That is good news for victims and communities and it makes clear economic sense too.
- 2.2 The Strategy committed to protect children and young people from the risk of child sexual abuse and exploitation (CSAE), by working with local authorities to introduce rigorous taxi and PHV licensing regimes. Both the Jay⁷ and Casey⁸ reports on CSAE highlighted examples of taxi/PHV drivers being directly linked to children that were abused, including instances when children were picked up from schools, children's homes or from family homes and abused, or sexually exploited.
- 2.3 The Casey Report made clear that weak and ineffective arrangements for taxi and PHV licensing had left the children and public at risk. The Department for Transport has worked with the Home Office, Local Government Association (LGA), personal safety charities, trade unions and trade bodies, holding workshops, forums, and sharing evidence and good practice with local authorities to assist in the formulation of this Statutory Guidance.
- 2.4 This Statutory Guidance is published by the Secretary of State for Transport under section 177(1) of the Policing and Crime Act 2017 following consultation in accordance with section 177(5).
- 2.5 The Guidance sets out a framework of policies that, under section 177(4), licensing authorities “**must have regard**” to when exercising their functions. These functions include developing, implementing and reviewing their taxi and PHV licensing regimes. “Having regard” is more than having a cursory glance at a document before arriving at a preconceived conclusion.
- 2.6 “Having regard” to guidance requires public authorities, in formulating a policy, to give considerations the weight which is proportionate in the circumstances. **Given that this is statutory guidance issued directly to address the safeguarding of the public and the potential impact of failings in this area, the importance of thoroughly considering these recommendations cannot be overestimated.** It is not a question of box ticking; the recommendations must be considered rigorously and with an open mind.
- 2.7 Although it remains the case that licensing authorities must reach their own decisions, both on overall policies and on individual licensing matters in light of the relevant law, it may be that this Guidance might be drawn upon in any legal

6

7 https://www.rotherham.gov.uk/downloads/file/1407/independent_inquiry_cse_in_rotherham8 <https://www.gov.uk/government/publications/report-of-inspection-of-rotherham-metropolitan-borough-council>

February 2019 – consultation version

challenge to an authority’s practice, and that any failure to adhere to the Guidance without sufficient justification could be detrimental to the authority’s defence. **In the interest of transparency however, the Department encourages all licensing authorities to publish their consideration of the recommendations contained in this Guidance and the policies and delivery plans that stem from these. The Department has already undertaken to monitor the effectiveness of the Statutory Guidance in achieving an appropriately high level of standards in taxi and PHV licensing with regard to the protection of passengers.**

- 2.8 This Guidance does not purport to give a definitive statement of the law and any decisions made by a licensing authority remain a matter for that authority.

Licensing policy

- 2.9 The Department encourages licensing authorities to create a cohesive policy document that brings together all their procedures on taxi and PHV licensing. This should include but not be limited to policies on convictions, a ‘fit and proper’ person test, licence conditions and vehicle standards.
- 2.10 When formulating a taxi and PHV policy, the primary and overriding objective must be to protect the public. The importance of ensuring that the licensing regime protects the vulnerable cannot be overestimated. This was highlighted in the report by Dame Louise Casey CB of February 2015 on safeguarding failings⁹.

“It will be evident from this report that in many cases the activities of perpetrators take place in spheres which are regulated by the Council – taxis have been the focus of particular concern. Persistent and rigorous enforcement of the regulatory functions available to the council, including the placing of conditions on private hire taxi operator licences where appropriate, would send a strong signal that the trade is being monitored and would curtail the activities of opportunistic perpetrators whereby taxi drivers have solicited children to provide sex in return for cigarettes, alcohol or a fare free ride.”

- 2.11 The long-term devastation caused by CSAE was summarised in the same report:

“Victims suffer from suicidal feelings and often self-harm. Many become pregnant. Some have to manage the emotional consequences of miscarriages and abortions while others have children that they are unable to parent appropriately. The abuse and violence continues to affect victims into adulthood. Many enter violent and abusive relationships. Many suffer poor mental health and addiction.”

9

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/401125/46966_Report_of_Inspection_of_Rotherham_WEB.pdf

February 2019 – consultation version

- 2.12 Rotherham Metropolitan Borough Council ('Rotherham Council') provides an example of how the systematic review of policies and procedures and the implementation of a plan to drive improvements in practice can result in a well-functioning taxi and PHV sector that is rebuilding local confidence in the industry. The history of past failings here and elsewhere are well known, but it is the transparency and resolution that Rotherham Council has demonstrated and the high standards they now require that are rebuilding public confidence.
- 2.13 One of the key lessons learned is that it is vital to review policies and reflect changes in the industry both locally and nationally. It is therefore recommended that licensing authorities regularly review their licensing policies and their performance, but should also consider interim reviews should there be significant issues arising in their area.

Fit and proper test

- 2.14 Licensing authorities have a duty to ensure that any person to whom they grant a taxi or PHV driver's licence is a 'fit and proper' person to be a licensee. It may be helpful when considering whether an applicant or licensee is fit and proper to pose oneself the following question:

Without any prejudice, and based on the information before you, would you allow a person for whom you care, regardless of their condition, to travel alone in a vehicle driven by this person at any time of day or night?

- 2.15 If, on the balance of probabilities, the answer to the question is 'no', the individual should not hold a licence.
- 2.16 Licensing authorities have to make difficult decisions but (subject to the points made in paragraph 2.19 below) the safeguarding of the public is paramount. All decisions on the suitability of an applicant or licensee should be made on the balance of probability. This means that **an applicant or licensee should not be 'given the benefit of doubt'**. If the committee or delegated officer is only "50/50" as to whether the applicant or licensee is 'fit and proper', they should not hold a licence. The threshold used here is lower than for a criminal conviction (that being beyond reasonable doubt) and can therefore include information that goes beyond criminal convictions.

Administration of the licensing framework

- 2.17 A policy is only as effective as the way it is administered. The taxi and PHV licensing functions of local councils are non-executive functions i.e. they are functions of the council rather than the executive (such as the Cabinet). The functions include the determination of licence applications, reviews and renewals, along with the attachment of conditions where considered appropriate. The function may be delegated to a committee, a sub-committee or an officer – which should be set out within a clear scheme of delegation.
- 2.18 It is essential that all those involved in the determination of licensing matters have received sufficient training and are adequately resourced to allow them to discharge the function effectively and correctly. The Department for Transport

February 2019 – consultation version

supports the recommendation of the LGA that, as a minimum, training should cover licensing procedures, natural justice, understanding the risks of CSAE and disability and equality awareness in addition to any other issues deemed appropriate. Training should not simply relate to procedures, but should also cover the making of difficult and potentially controversial decisions – the use of case study material can be helpful to illustrate this. All training should be formally recorded by the licensing authority and require a signature from the person that has received the training. Training is available from a number of organisations including the Institute of Licensing and the LGA can assist in the development of training packages.

2.19 Public safety is the paramount consideration but the discharge of licensing functions must be undertaken in accordance with the following general principles:

- policies should be used as internal guidance, and should be supported by a member/officer code of conduct.
- any implications of the Human Rights Act should be considered.
- the rules of natural justice should be observed.
- decisions must be reasonable and proportionate.
- where a hearing is required it should be fairly conducted and allow for appropriate consideration of all relevant factors.
- decision makers must avoid bias (or even the appearance of bias) and predetermination.

2.20 It is recommended that councils operate with a Regulatory Committee or Board that is convened at periodic intervals to determine licensing matters, with individual cases being considered by a panel of elected and suitably trained councillors drawn from a larger Regulatory Committee or Board. This model is similar to that frequently adopted in relation to other licensing matters. To facilitate the effective discharge of the functions, less contentious matters can be delegated to appropriately authorised council officers via a transparent scheme of delegation.

2.21 It is considered that this approach also ensures the appropriate level of separation between decision makers and those that investigate complaints against licensees, and is the most effective method in allowing the discharge of the functions in accordance with the general principles referred to in 2.19. In particular, the Committee/Board model allows for:

- Each case to be considered on its own merits. It is rare for the same councillors to be involved in frequent hearings – therefore the councillors involved in the decision making process will have less knowledge of previous decisions and therefore are less likely to be influenced by them. Oversight and scrutiny can be provided in relation to the licensing service

February 2019 – consultation version

generally, which can provide independent and impartial oversight of the way that the functions are being discharged within the authority.

- Clear separation between investigator and the decision maker – this demonstrates independence, and ensures that senior officers can attempt to resolve disputes in relation to service actions without the perception that this involvement will affect their judgement in relation to decisions made at a later date.

2.22 Avoidance of bias or even the appearance of bias is vital to ensuring good decisions are made and instilling and/or maintaining confidence in the licensing regime by passengers and licensees. Unlike officers, elected members are not usually involved in the day to day operation of the service and as such do not have relationships with licence holders that may give the impression that the discharge of a function is affected by the relationship between the decision maker and the licence holder.

2.23 Some licensing authorities may decide to operate a system whereby all matters are delegated to a panel of officers, however this approach is not recommended and caution should be exercised. Decisions must be, and be seen to be, made objectively, avoiding any bias. In addition, it may be more difficult to demonstrate compliance with the principles referred to above due to the close connection between the officers on the panel, and those involved in the operational discharge of the licensing functions.

2.24 Regardless of which approach is adopted, all councils should consider arrangements for dealing with serious matters that may require the immediate revocation of a licence. It is recommended that this role is delegated to a senior officer/manager with responsibility for the licensing service.

Whistleblowing

2.25 The past failings of licensing regimes must never be repeated. The Department has carefully considered the measures contained in this Guidance and believe that these should be put in to practice and administered appropriately to mitigate the risk posed to the public. The purpose of this Guidance is to protect children and vulnerable adults, and by extension the wider public, when using taxis and PHVs. However, it is in the application of these policies (and the training and raising of awareness among those applying them) that protection will be provided. Where there are concerns that policies are not being applied correctly, it is vital that these can be raised, investigated

February 2019 – consultation version

and remedial action taken if required. It is therefore recommended that licensing authorities have effective internal procedures for staff to raise concerns and procedures in place for any concerns to be dealt with openly and fairly.

A report into the licensing of drivers by South Ribble Borough Council highlights the implications of not applying the agreed policies. In early August 2015, concerns were raised regarding decisions to renew the licences of drivers where there were potential incidents of child sexual exploitation. An internal review concluded that there had been failings in local investigatory procedures which might have affected the ability of the General Licensing Committee to make proper decisions, and information sharing with the police and data recording was not satisfactory.

- 2.26 The external investigation in South Ribble concluded “*that there had been a lack of awareness and priority given to safeguarding and the safety of taxi [and PHV] passengers in the manner in which licensing issues were addressed*”. We are pleased to note that the report concludes¹⁰, “*The Council have been active at every stage in responding to issues and concerns identified. It has taken steps to address operational issues in the licensing function and has engaged fully with other agencies in so doing. In the light of the above, it is not necessary to make any further recommendations.*”
- 2.27 It is hoped that all licensing authorities will have learnt from these mistakes but to prevent a repeat, local authorities should ensure they have an effective ‘whistleblowing’ policy and that all staff are aware of it. If a worker is aware of, and has access to, effective internal procedures for raising concerns then ‘whistleblowing’ is unlikely to be needed.
- 2.28 The Public Interest Disclosure Act 1998 (PIDA), commonly referred to as whistleblowing legislation, provides protection for those that have a reasonable belief of serious wrongdoing, including failure to comply with professional standards, council policies or codes of practice/conduct. The PIDA is part of employment law. In the normal course of events, if a worker reveals information that his employer does not want revealed it may be a disciplinary offence. If someone leaked their employer’s confidential information to the press, they might expect to be dismissed for that. The PIDA enables workers who ‘blow the whistle’ about wrongdoing to complain to an employment tribunal if they are dismissed or suffer any other form of detriment for doing so. It is a qualified protection and certain conditions would have to be met for the worker to be protected.

Implementing changes to licensing policy and requirements

- 2.29 It is important to remember that any changes in licensing requirements should be followed by a review of the licences already issued. If the need to change licensing requirements has been identified, this same need is applicable to those already in possession of a licence. That is not however to suggest that licences should be automatically revoked overnight, for example if a vehicle specification is changed it is proportionate to allow those that would not meet

¹⁰ http://www.southribble.gov.uk/sites/default/files/FINAL_REPORT_JUNE_2016.pdf

February 2019 – consultation version

the criteria to have the opportunity to adapt or change their vehicle. The same pragmatic approach should be taken to driver licence changes - if requirements are changed to include a training course or qualification, a reasonable time should be allowed for this to be undertaken or gained. The implementation schedule of any changes that affect current licence holders must be transparent and communicated promptly and clearly.

- 2.30 Where a more subjective change has been introduced, for example an amended policy on previous convictions, licensing authority must still consider each case on its own merits. Where there are exceptional, clear and compelling reasons to deviate from a policy, licensing authorities are able to do so. Licensing authorities should record the reasons for any deviation from the policies in place.

The Disclosure and Barring Service

- 2.31 The Disclosure and Barring Service (DBS) provides access to criminal record information through its disclosure service for England and Wales. The DBS also maintains the lists of individuals barred from working in regulated activity with children or adults. The DBS makes independent barring decisions about people who have harmed, or where they are considered to pose a risk of harm to a child or vulnerable person within the workplace. The DBS enables organisations in the public, private and voluntary sectors to make safer employment decisions by identifying candidates who may be unsuitable for certain work, especially that which involves vulnerable groups including children. Licensing authorities are entitled to request an enhanced criminal record certificate with check of the barred lists from the DBS for all driver licence holders or applicants.
- 2.32 The DfT's 2018 survey of taxi and PHV licensing authorities¹¹ shows that all licensing authorities in England and Wales have a requirement that an enhanced DBS check is undertaken at first application or renewal. The Department considers that all licensing authorities should also request a check of the barred lists in addition to the enhanced DBS check, for individuals applying for or renewing taxi and PHV driver licences.
- 2.33 Enhanced certificates with check of the barred lists include details of spent and unspent convictions recorded on the Police National Computer (PNC), any additional information which a chief officer of police believes to be relevant and ought to be disclosed, as well as indicating whether the individual is barred from working in regulated activity with children or adults. The filtering rules allow for certain old and minor convictions to be removed from a DBS certificate after an appropriate period has passed, but they do not allow filtering where an individual has more than one conviction, has received a custodial sentence or has committed a specified serious offence such as those involving child sexual abuse. Full details of the filtering rules, and those offences which may never be filtered, are available from the DBS¹². As well as convictions and cautions, an

¹¹ <https://www.gov.uk/government/statistics/taxi-and-private-hire-vehicle-statistics-england-2018>

¹² <https://www.gov.uk/government/collections/dbs-filtering-guidance>

February 2019 – consultation version

enhanced certificate may include additional information which a chief police officer reasonably believes is relevant and ought to be disclosed. Chief police officers must have regard to the detailed statutory guidance¹³ when considering disclosure. The information provided at each level of DBS checks is summarised in table 1.

- 2.34 It should be noted that licensing authorities must not seek to circumvent the legitimate filtering of previous criminal convictions and other information held by the DBS. The appropriate way of accessing an individual's criminal records is through an enhanced DBS and barred lists check.
- 2.35 Whilst data protection legislation¹⁴ gives individuals (or data subjects) a 'right of access' to the personal data that an organisation holds about them, you must not require an individual to exercise their subject access rights so as to gain information about any convictions and cautions. This is an offence under data protection legislation.
- 2.36 Driving a taxi or PHV is not, in itself, a regulated activity. This means that an individual subject to barring would not be legally prevented from being a taxi or PHV driver but the licensing authority should take an individual's barred status into account alongside other information available. It is the Department's opinion that, in the interests of public safety, licensing authorities should not, as part of their policies, issue a licence to any individual that appears on either barred list. Should a licensing authority consider there to be exceptional circumstances which means that, based on the balance of probabilities they consider an individual named on a barred list to be 'fit and proper', the reasons for reaching this conclusion should be recorded.
- 2.37 Drivers working under an arrangement to transport children may be working in 'regulated activity' as defined by the Safeguarding Vulnerable Groups Act 2006¹⁵. It is an offence to knowingly allow a barred individual to work in regulated activity. The guidance on home-to school travel and transport¹⁶ issued by the Department for Education should be considered alongside this document. Please see DBS guidance on driver eligibility and how to apply.

INFORMATION INCLUDED IN CRIMINAL RECORD CHECKS				
Information included	Type of check			
	Basic	Standard DBS	Enhanced DBS	Enhanced DBS (including barred list check)
Unspent convictions	Yes	Yes	Yes	Yes
Unspent cautions ¹	Yes	Yes	Yes	Yes
Spent convictions ²	No	Yes	Yes	Yes
Spent cautions ^{1&2}	No	No	Yes	Yes
Additional police Information ³	No	No	Yes	Yes
Barred list(s) Information ⁴	No	No	No	Yes

Table 1

1. Cautions include reprimands and warnings, but not fixed penalty notices, penalty notices for disorder or any other police or other out-of-court disposals.
2. Spent convictions and cautions that have become protected under the Rehabilitation of Offenders Act 1974 (Exceptions Order) 1975, as amended, are not disclosed on any level of certificate. Further guidance is available at <https://www.gov.uk/government/publications/dbs-filtering-guidance/dbs-filtering-guide>.
3. This is any additional information held by the police which a chief police officer reasonably believes to be relevant and considers ought to be disclosed.
4. This is information as to whether the individual concerned is included in the children's or adults' barred lists maintained by the Disclosure and Barring Service (DBS).

DBS update service

- 2.38 Licensing authorities should make use of the DBS update service. This subscription service allows licensees to keep their DBS certificates up to date online and, with the individual's consent, allows licensing authorities (as a nominee) to check the status of a certificate online at any time. Subscription to the service removes the need for repeat checks, reduces the administrative burden and mitigates potential delays in relicensing. Licensees should be required to evidence continuous registration and nomination throughout the period of the licence.
- 2.39 The DBS will search regularly to see if any relevant new information has been received since the certificate was issued. The frequency varies depending on the level and type of DBS certificate. For criminal conviction and barring information, the DBS will search for updates on a weekly basis. For non-conviction information, the DBS will search for updates every nine months. Licensing Authorities should therefore consider routinely checking the DBS certificates of their licence holders, for example every six months.
- 2.40 Licensing authorities are able to request large numbers of status checks on a daily basis. The DBS has developed a Multiple Status Check facility that can be accessed via a web service. The Multiple Status Check facility enables organisations to make an almost unlimited number of Status Checks simultaneously. Further information on the Multiple Status Check facility is available from the DBS.¹⁷ As discussed above, for taxi and PHV driver licensing purposes the recommended level of check is always the enhanced level with check of the adult and children Barred lists. Other Workforce should always be entered at X61 line 1 and Taxi Licensing should be entered at X61 line 2.

Licensee self-reporting

- 2.41 As discussed above, the DBS update service is a valuable tool in discharging a licensing authority's duty to ensure that licence holders are fit to hold a licence. However, the routine checking of the DBS record should be in addition to a requirement that licence holders notify the issuing authority within 48 hours of an arrest and release, charge or conviction of any motoring offence, or any offence involving dishonesty, indecency or violence. An arrest for any of the offences within this scope should result in a review by the issuing authority as to whether the licence holder is fit to continue to do so. This must not however be seen as a direction that a licence should be withdrawn; it is for the licensing authority to consider what, if any, action in terms of the licence should be taken based on the balance of probabilities.
- 2.42 Importantly, a failure by a licence holder to disclose an arrest that the issuing authority is subsequently advised of, would be a breach of a licence condition and might therefore be seen as behaviour that questions honesty and

¹⁷ <https://www.gov.uk/government/publications/dbs-update-service-multiple-status-checking-guide>

February 2019 – consultation version

therefore the suitability of the licence holder regardless of the outcome of the initial allegation.

Referrals to DBS and the police

2.43 In some circumstances it may be appropriate under the Safeguarding Vulnerable Groups Act 2006 for licensing authorities to make referrals to the DBS; for example, a decision to refuse or revoke a licence as the individual is thought to present a risk of harm to a child or vulnerable adult, should be referred to the DBS. The power for the licensing authority to in this context arises from the undertaking of a safeguarding role. Further guidance has been provided by the DBS¹⁸.

2.44 The Department recommends that licensing authorities should make a referral to the DBS when it is thought that:

- an individual has harmed or poses a risk of harm to a child or vulnerable adult;
- an individual has satisfied the ‘harm test’; or
- received a caution or conviction for a relevant offence and;
- the person they are referring is, has or might in future be working in regulated activity;
- the DBS may consider it appropriate for the person to be added to a barred list.

2.45 These referrals may result in the person being added to a barred list and enable other licensing authorities to consider this should further applications to other authorities be made. Further information on referrals to DBS is available¹⁹.

2.46 To aid further the quality of the information available to all parties that have a safeguarding duty, a revocation or refusal on public safety grounds should also be advised to the police.

Overseas convictions

2.47 **The DBS cannot access criminal records held overseas.** Therefore, a DBS check may not provide a complete picture of an individual’s criminal record where there have been periods living or working overseas. A licensing authority should ensure they have access to all the information available to them when making a decision whether to grant a licence, particularly when an applicant has previously lived outside the UK. It should be noted that it is the character of the applicant as an adult that is of interest, therefore a period outside the UK before

¹⁸ <https://www.gov.uk/government/publications/dbs-barring-referrals-local-authority-referral-duty-and-power/referral-duty-and-power-for-local-authorities-and-regulatory-bodies#local-authorities-as-regulated-activity-providers>

¹⁹ <https://www.gov.uk/guidance/making-barring-referrals-to-the-dbs>

February 2019 – consultation version

the age of 18 may not be relevant. For information on applying for overseas criminal record checks or ‘Certificates of Good Character’ please see the Home Office guidance²⁰. Licensing authorities should seek criminal records information from overseas when an applicant has previously lived outside the UK for a period of more than three continuous months to properly assess risk and support the decision making process.

- 2.48 Where an individual is aware that they have committed an offence overseas which may be equivalent to those listed, they should seek independent expert or legal advice to ensure that they provide information that is truthful and accurate.

Conviction policy

- 2.49 In considering an individual’s criminal record, licensing authorities must consider each case on its merits, but they should take a particularly cautious view of any offences against individuals with special needs, children and other vulnerable groups, particularly those involving violence, those of a sexual nature and those linked to organised crime. In order to achieve consistency, and to mitigate the risk of successful legal challenge, licensing authorities should have a clear policy for the consideration of criminal records. This should include, for example, which offences would prevent an applicant from being licenced regardless of the period elapsed in all but truly exceptional circumstances. In the case of lesser offences, a policy should consider the number of years the authority will require to have elapsed since the commission of particular kinds of offences before they will grant a licence.

- 2.50 Engagement with licensing authorities identified that greater direction from the Department was sought and in some cases required. The Department did not make specific recommendations regarding the assessment of convictions in the 2010 update of the Best Practice Guidance. In response to concerns raised by stakeholders and to assist in greater consistency in licensing, Annex A provides the Department’s recommendations on this issue. This draws on the work of the Institute of Licensing, in partnership with the LGA, the National Association of Licensing Enforcement Officers (NALEO) and Lawyers in Local Government, in publishing its guidance on determining the suitability of taxi and PHV licensees²¹. These periods should be taken as a minimum before a licence should be granted or renewed in all but truly exceptional circumstance. The Department’s view is that this places passenger safety as the priority while enabling past offenders to sufficiently evidence that they have been successfully rehabilitated so that they might obtain a licence. Authorities are however reminded that each case must be considered on its own merits, and applicants are entitled to a fair and impartial public hearing of their application if required.

Common Law Police Disclosure

- 2.51 The DBS is not the only source of information that should be considered as part of a fit and proper assessment for the licensing of taxi and PHV drivers.

²⁰ <https://www.gov.uk/government/publications/criminal-records-checks-for-overseas-applicants>

²¹ [https://instituteoflicensing.org/documents/Guidance_on_Suitability_Web_Version_\(16_May_2018\).pdf](https://instituteoflicensing.org/documents/Guidance_on_Suitability_Web_Version_(16_May_2018).pdf)

February 2019 – consultation version

Common Law Police Disclosure ensures that where there is a public protection risk, the police will pass information to the employer or regulatory body to allow them to act swiftly to mitigate any danger.

- 2.52 Common Law Police Disclosure replaced the Notifiable Occupations Scheme (NOS) in March 2015 and focuses on providing timely and relevant information which might indicate a public protection risk. Information is passed on at arrest or charge, rather than on conviction which may be some time after, allowing any measures to mitigate risk to be put in place immediately.
- 2.53 The new procedure provides robust safeguarding arrangements while ensuring only relevant information is passed on to employers or regulatory bodies. We would therefore strongly recommend that licensing authorities maintain close links with the police to ensure effective and efficient information sharing procedures and protocols are in place and are being used.

Other information

- 2.54 The LGA's Councillors' Handbook on taxi and private hire vehicle (PHV) licensing²² advises that those responsible for licensing should "*communicate regularly with licensing committees and officers in neighbouring councils to ensure critical information is shared and that there is a consistency and robustness in decision-making. By working together, local government can make sure that this vital service is safe, respected, and delivering for local communities.*"
- 2.55 The police are an invaluable source of intelligence when assessing whether a licensing applicant is a 'fit and proper' person. It is vital that licensing authorities have a partnership with the police service to ensure that appropriate information is shared as quickly as possible. As part of building an effective working relationship between the licensing authority and the police we strongly recommend that action taken as a result of information received is fed-back to the police. Increasing the awareness among police forces of the value licensing authorities place on the information received, particularly on non-conviction intelligence, will assist furthering these relationships and reinforce the benefits of greater sharing of information.
- 2.56 This relationship can be mutually beneficial, assisting the police to prevent crime. The police can gain valuable intelligence from drivers and operators, for example, the identification of establishments that are selling alcohol to minors or drunks, or the frequent transportation of substance abusers to premises.
- 2.57 As has been stated elsewhere in this guidance, obtaining the fullest information minimises the doubt as to whether an applicant or licensee is 'fit and proper'. An obvious source of relevant information is any previous licensing history. Applicants should therefore be required to disclose if they hold or have previously held a licence with another authority. An applicant should also be required to disclose if they have had an application for a licence refused, or a licence revoked or suspended by any other licensing authority. For this process

²² <https://www.local.gov.uk/councillor-handbook-taxi-and-phv-licensing>

February 2019 – consultation version

to be beneficial, all licensing authorities must keep a complete and accurate record as to the reasons for refusal, suspension or revocation of a licence in order that this might be shared if requested and appropriate to do so.

- 2.58 The LGA's Taxi and PHV licensing Councillors' handbook²³ advises that Councils should meet or communicate regularly with licensing committees and officers in neighbouring councils to ensure critical information is shared. While this approach may aid consistency and robustness in decision-making within regions, it has obvious inherent limitations as it is unlikely such protocols could be established between all licensing authorities. The LGA commissioned the National Anti-Fraud Network to develop a national register of taxi and PHV driver licence refusals and revocations (the register is known as 'NR3'). The use of tools such as NR3 by licensing authorities to share information on a more consistent basis would mitigate the risk of non-disclosure of relevant information by applicants.
- 2.59 Data protection legislation provides exemption from the rights of data subjects for the processing of personal data in connection with regulatory activities. This includes taxi and PHV driver licensing. The exemption applies only to information processed for the core regulatory activities of appropriate organisations; it may not be used in a blanket manner. The exemption applies only to the extent that the application of the rights of data subjects to the information in question would be likely to prejudice the proper discharge of the regulatory functions. The Information Commissioner's Office has published guidance to assist organisations to fully understand their obligations and suggest good practice²⁴.
- 2.60 If notification under paragraph 2.57 or 2.58 of a refused or revoked license is disclosed, the relevant licensing authority should be contacted to establish when the licence was refused, suspended or revoked and the reasons why. The information disclosed can then be taken into account in determining the applicant's fitness to be licensed. The relevance of the reason for refusing/revoking a licence must be considered. For example, if any individual was refused a licence for failing a local knowledge test, it does not have any safeguarding implications. Conversely, a revocation or refusal connected to indecency would.
- 2.61 Should a licensing authority receive information that a licence holder did not disclose the information referred to in paragraph 2.57, for example by checking the NR3 register, the authority should consider whether the non-disclosure represents dishonesty and should therefore review whether the licence holder remains 'fit and proper'.

Multi-agency Safeguarding Hub (MASH)

- 2.62 Multi-Agency Safeguarding Hubs are a way to improve the safeguarding response for children and vulnerable adults through better information sharing and high quality and timely safeguarding responses. MASHs (or similar models)

²³ <https://www.local.gov.uk/councillor-handbook-taxi-and-phv-licensing>

²⁴ <https://ico.org.uk/for-organisations/guide-to-the-general-data-protection-regulation-gdpr/lawful-basis-for-processing/>

February 2019 – consultation version

should operate on three common principles: information sharing, joint decision making and coordinated intervention.

- 2.63 The Home Office report on Multi Agency Working and Information Sharing²⁵ recommended that effective multi-agency working still needs to become more widespread. The Children’s Commissioner’s 2013 Inquiry into Child Sexual Exploitation in Gangs and Groups²⁶ found that both police and local authorities still identified the inability to share information as a key barrier to safeguarding children from sexual abuse and exploitation.
- 2.64 The Department recommends all licensing authorities should establish a means to facilitate the objectives of a MASH. As has been emphasised throughout this guidance, one of the most effective ways to minimise the risk to children and vulnerable adults when using taxis and PHVs is to ensure that decisions on licensing individuals are made with the fullest knowledge possible.

Complaints against licensees

- 2.65 The LGA recommends that all councils should have a robust system for recording complaints, including analysing trends across the whole system as well as complaints against individual licensees²⁷. Licensees with a high number of complaints made against them should be contacted by the licensing authority and concerns raised with the driver and operator (if appropriate). Further action in terms of the licence holder must be determined by the licensing authority, which could include no further action, the offer of training, a formal review of the licence, or formal enforcement action.
- 2.66 Licensing authorities should produce guidance for passengers on making complaints directly to the licensing authority that **must** be available on their website and displayed in licensed vehicles. This is likely to result in additional work for the licensing authority but has the advantage of ensuring consistency in the handling of complaints. Currently, it is more likely that a complaint against a taxi driver would be made directly to the licensing authority whereas a complaint against a PHV driver is more likely to be made to the operator. An effective partnership in which operators can share concerns regarding drivers is also encouraged. A systematic recording of complaints will provide a further source of information to consider when renewing a licence for a driver or operator or identify problems during the period of the licence.
- 2.67 Importantly, this approach will assist in the directing of complaints and information regarding the behaviour of drivers who may be carrying a passenger outside of the area in which the driver is licensed to the authority that issued the licence. In order for this to be effective licensing authorities must ensure that drivers are aware of a requirement to display information on how to complain and take appropriate sanctions against those that do not comply with this requirement.

25 https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/338875/MASH.pdf

26 https://www.childrenscommissioner.gov.uk/wp-content/uploads/2017/07/If_only_someone_had_listened.pdf

27 <https://www.local.gov.uk/councillor-handbook-taxi-and-phv-licensing>

February 2019 – consultation version

- 2.68 CCTV footage of an incident can provide an invaluable insight, providing an ‘independent witness’ to an event. This can assist in the decision whether to suspend or revoke a licence. The potential benefits of mandating CCTV in vehicles is discussed in paragraphs 2.104 - 2.106.

Duration of licences

- 2.69 The Local Government (Miscellaneous Provisions) Act 1976 (as amended) sets a standard length at three years for taxi and PHV drivers and five years for PHV operators. Any shorter duration should only be issued when the licensing authority thinks it is appropriate in the specific circumstances of the case. Such circumstances could include where the licensing authority considers that a probationary period is necessary or where required (e.g. when the licence holder’s leave to remain in the UK is time-limited) or when the licence is only required to meet a short-term demand.
- 2.70 A previous argument against this length of licence was that a criminal offence might be committed, and not notified, during this period; this can of course also be the case during the duration of a shorter licence. This risk can be mitigated by requiring licensees to subscribe to the DBS update service as discussed in paragraphs 2.38 – 2.40 and authorities to undertake regular interim checks. To help authorities monitor licensees’ suitability, police forces should inform licensing authorities when they believe a licensee presents a risk to the travelling public. Paragraphs 2.51 - 2.53 provide further information about this process.

Safeguarding awareness

- 2.71 Licensing authorities should consider the role that those in the taxi and PHV industry can play in spotting and reporting the abuse, exploitation or neglect of children and vulnerable adults. As with any group of people, it is overwhelmingly the case that those within the industry can be an asset in the detection and prevention of abuse or neglect of children and vulnerable adults. However, this is only the case if they are aware of and alert to the signs of potential abuse and know where to turn to if they suspect that a child or vulnerable adult is at risk of harm or is in immediate danger.
- 2.72 It is the Department’s recommendation that licensing authorities provide safeguarding advice and guidance to the trade and that taxi and PHV drivers are required to undertake safeguarding training. This is often produced in conjunction with the police and other agencies. These programmes have been developed to help drivers and operators:
- provide a safe and suitable service to vulnerable passengers of all ages;
 - recognise what makes a person vulnerable; and
 - understand how to respond, including how to report safeguarding concerns and where to get advice.

2.73 In February 2018, the Department for Education (DFE) launched phase 3 of its nationwide campaign – ‘Together we can tackle child abuse’. Building on phases 1 and 2, which ran in 2016 and 2017, it aims to increase public understanding of how to recognise and report child abuse and neglect. The DfE has developed an online toolkit²⁸ of material for local authorities, charities and other organisations to use to support the campaign.

Other forms of exploitation – ‘County lines’ drug trafficking

2.74 Victims of exploitation may not appear as such at first sight. 74% of police forces noted the exploitation of vulnerable people (including children) by gangs and organised criminal networks involved in trafficking illegal drugs within the UK²⁹ to move and store drugs and money across the country, often from urban areas to regional locations. They will frequently use coercion, intimidation, violence (including sexual violence) and weapons. This gang activity (known as county lines), and the associated violence, drug dealing and exploitation has a devastating impact on young people, vulnerable adults and local communities.

2.75 The National Crime Agency’s updated annual threat assessment of county lines reported that county lines groups are using taxis and PHVs as a method of transportation. In that assessment, 33% of police forces in England and Wales (14 forces) reported use of taxis and PHVs to transport drug couriers between markets. These couriers are often young people who have been exploited and may be victims of trafficking; the typical age range is 15-17 years old, but may be much younger. They may have vulnerabilities besides their age, such as broader mental health issues, disrupted or chaotic homes, substance misuse issues or reported as missing.

2.76 Safeguarding awareness training should include the ways in which drivers can help to identify county lines exploitation. Firstly, they should be aware of the following warning signs:

- young people, sometimes as young as 12, travelling in taxis alone;
- travelling at unusual hours (during school time, early in the morning or late at night);
- travelling long distances ;
- unfamiliar with the local area or do not have a local accent;
- paying for journeys in cash or prepaid.

²⁸ <https://tacklechildabuse.campaign.gov.uk/>

²⁹ <http://www.nationalcrimeagency.gov.uk/news/1247-latest-threat-update-estimates-at-least-720-county-lines-drug-dealing-lines>

February 2019 – consultation version

- 2.77 The Home Office is working with partners to raise awareness of county lines and has produced promotional material that can be used by taxi and PHV companies.³⁰
- 2.78 Drivers (or any person) should be aware of what to do if they believe a child or vulnerable person is at risk of harm. If the risk is immediate they should contact the police otherwise they should:
- use the local safeguarding process, the first step of which is usually to contact the safeguarding lead within the local authority;
 - call Crime Stoppers on 0800 555 111.

Language proficiency

- 2.79 Authorities should consider whether an applicant would have any problems in communicating with customers because of language difficulties. Licensing authorities have the freedom to specify the level of proficiency, but it is recommended to cover both oral and written English language skills necessary to fulfil their duties, including in emergency and other challenging situations. This should include:
- conversing with passengers to demonstrate an understanding of the desired destination, an estimation of the time taken to get there and other common passenger requests;
 - providing a customer with correct change from a note or notes of higher value than the given fare, and doing so with relative simplicity;
 - providing a legibly written receipt upon request.

Enforcement

- 2.80 Implementing an effective framework for licensing authorities is essential to a well-functioning taxi and PHV sector. These steps will help prevent the licensing of drivers that are not deemed ‘fit and proper’ but does not ensure that those already licensed continue to display the behaviours and standards expected.
- 2.81 We have discussed the benefits of licensing authorities working collaboratively in regard to the sharing of information, and this can equally apply to enforcement powers. An agreement between licensing authorities to jointly authorise officers enables the use of enforcement powers regardless of which authority within the agreement the officer is employed by and which issued the licence. Together with increased clarity for the public on complaining, these measures will mitigate the opportunities for drivers to evade regulation. Such an agreement will enable those authorities to take action against vehicles and

³⁰https://www.gov.uk/government/publications/county-lines-posters-for-taxi-and-private-vehicle-hire-staff?utm_source=HO&utm_campaign=LA

February 2019 – consultation version

drivers that are licensed by the other authority when they cross over boundaries. A model for agreeing joint authorisation is contained in the LGA Councillors' handbook³¹.

2.82 It is not reasonable to expect drivers to adhere to a policy unless they are properly informed of what is expected of them and the repercussions for failing to do so. Some licensing authorities operate a points-based system, which allows minor breaches to be recorded and considered in context while referring those with persistent or serious breaches to the licensing committee. This has the benefit of consistency in enforcement and makes better use of the licensing committee's time.

2.83 The Department suggest that there should be a clear, simple and well-publicised process for the public to make complaints about drivers and operators. This will provide a further source of intelligence when considering the renewal of licences and of any additional training that may be required. It is then for the licensing authority to consider if any intelligence indicates a need to suspend or revoke a licence in the interests of public safety.

Suspension and revocation of driver licences

2.84 Section 61 of the Local Government (Miscellaneous Provisions) Act 1976 provides a licensing authority with the ability to suspend or revoke a driver's licence on the following grounds:-

(a) that he has since the grant of the licence—

(i) been convicted of an offence involving dishonesty, indecency or violence; or

(ii) been convicted of an offence under or has failed to comply with the provisions of the Act of 1847 or of this Part of this Act;

(aa) that he has since the grant of the licence been convicted of an immigration offence or required to pay an immigration penalty; or

(b) any other reasonable cause

2.85 Licensing authorities have the option to suspend or revoke a licence should information be received that causes concern over whether a driver is a fit and proper person. Where the licence holder has been served an immigration penalty or convicted of an immigration offence the licence should be revoked immediately. Guidance for licensing authorities to prevent illegal working in the taxi and PHV sector has been issued by the Home Office³². As with the initial decision to license a driver, this determination must be reached based on the balance of probabilities, not on the burden of beyond reasonable doubt.

2.86 Before any decision is made, the licensing authority must give full consideration to the available evidence and the driver should be given the

³¹ <https://www.local.gov.uk/councillor-handbook-taxi-and-phv-licensing>

³² https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/613415/A_Licensing_Authority_guide_to_right_to_work_checks_-_England_and_Wales.pdf

February 2019 – consultation version

opportunity to state his or her case. If a period of suspension is imposed, it cannot be extended or changed to revocation at a later date.

- 2.87 A decision to revoke a licence does not however prevent the reissuing of a licence should further information be received that alters the balance of probability decision previously made. The decision to suspend or revoke was based on the evidence available at the time the determination was made. New evidence may, of course, become available later.
- 2.88 New evidence may be produced at an appeal hearing that may result in the court reaching a different decision to that reached by the council or an appeal may be settled by agreement between the licensing authority and the driver on terms which, in the light of new evidence, becomes the appropriate course. If, for example, the allegations against a driver were now, on the balance of probability, considered to be unfounded, a suspension could be lifted or, if the licence was revoked, an expedited re-licensing process used.
- 2.89 A suspension may still be appropriate if it is believed that a minor issue can be addressed through additional training. In this instance the licence would be returned to the driver once the training has been completed without further consideration. This approach is clearly not appropriate where the licensing authority believes that, based on the information available at that time, on the balance of probability it is considered that the driver presents a risk to public safety.

Criminal record checks for PHV operators

- 2.90 As with driver licensing, the objective in licensing PHV operators is to protect the public, who may be using operators' premises and trusting that the drivers and vehicles they dispatch are above all else safe. It is important therefore that licensing authorities are assured that the operators they license also pose no threat to the public and have no links to serious criminal activity. Although an operator may not have direct contact with passengers, they are still entrusted to ensure that the drivers and vehicles used to fulfil a booking are appropriately licensed and so 'fit and proper'. PHV operators are also frequently provided with sensitive information such as periods when a home may be vacated as the residents are on holiday. Those making licensing decisions should consider whether they would be content for an applicant to hold sensitive information and are confident that this would not be misused.
- 2.91 PHV operators (as opposed to PHV drivers) are not eligible for standard or enhanced criminal records checks. We recommend that licensing authorities request a criminal conviction certificate (Basic disclosure) from the DBS. Any individual may apply for a Basic check and the certificate will disclose any unspent convictions recorded on the PNC. Licensing authorities should consider whether an applicant or licence holder with a conviction for offences detailed in Annex A (other than those relating to driving) meet the 'fit and proper' threshold.
- 2.92 PHV operator licences may be applied for by a company or partnership; licensing authorities should apply the 'fit and proper' test to each of the directors or partners in that company or partnership. For this to be effective PHV

February 2019 – consultation version

operators should be required to advise the licensing authority of any changes to the directors or partners.

- 2.93 Individuals, directors or partners granted a PHV operator licence should be required to subscribe to the DBS update service as a condition of licensing and licensing authorities should consider routinely checking the DBS certificates of their licence holders, for example every six months
- 2.94 As explained earlier in the context of driver licensing, the **DBS cannot access criminal records held overseas**. Therefore, a DBS check may not provide a complete picture of an individual's criminal record where there have been periods living or working overseas. A licensing authority should ensure they have access to all the information available to them when making a decision whether to grant a licence, particularly when an applicant has previously lived outside the UK. It should be noted that it is the character of the applicant as an adult that is of interest, therefore a period outside the UK before the age of 18 may not be relevant. For information on applying for overseas criminal record checks or a 'Certificate of Good Character' please see the Home Office guidance³³ on criminal record checks for overseas applicants. Licensing authorities should seek criminal records information from overseas when an applicant has previously lived outside the UK for a period of more than three continuous months to properly assess risk and support the decision making process.
- 2.95 Where an individual is aware that they have committed an offence overseas which may be equivalent to those listed in Annex A, they should seek independent expert or legal advice to ensure that they provide information that is truthful and accurate.

PHV Operators - ancillary staff

- 2.96 PHV drivers are not the only direct contact that PHV users have with PHV operators' staff, for example a person taking bookings (be it by phone or in person). A vehicle controller decides which driver to send to a user, a position that could be exploited by criminals. It is therefore appropriate that all staff that have contact with PHV users and the dispatching of vehicles should not present an undue risk to the public or the safeguarding of children and vulnerable adults.
- 2.97 Licensing authorities should be satisfied that PHV operators can demonstrate that all staff that have contact with the public and/or oversee the dispatching of vehicles do not pose a risk to the public. Licensing authorities should request that, as a condition of granting an operator licence, a register of all staff that will take bookings or dispatch vehicles is kept. The operator should be required to evidence that they have had sight of a Basic DBS check on all individuals listed.
- 2.98 Operators or applicants for a licence should also be required to provide their policy on employing ex-offenders in roles that would be on the register as above. As with the threshold to obtaining a PHV operators' licence, those with a

³³ <https://www.gov.uk/government/publications/criminal-records-checks-for-overseas-applicants>

February 2019 – consultation version

conviction for offences detailed in Annex A (other than those relating to driving) may not be suitable to handle the sensitive information the public may provide (e.g. that their home is likely to be empty between certain dates) or to decide who is sent to carry a child or vulnerable adult unaccompanied in a car.

- 2.99 Those granted an operator licence should be required to maintain a register of staff that take bookings and/or control vehicles and ensure that Basic DBS checks are conducted on any individuals added to the register and that this is compatible with their policy on employing ex-offenders.

PHV Operators – Use of passenger carrying vehicles (PCV) licensed drivers

- 2.100 Members of the public are entitled to expect when making a booking with a PHV operator that they will receive a PHV licensed vehicle and driver. The use of a driver who holds a PCV licence and the use of a public service vehicle (PSV) such as a minibus to undertake a PHV booking should not be permitted as a condition of the PHV operator's licence. Drivers of PSVs who are PCV licence holders are not subject to the same checks as PHV drivers, as the work normally undertaken, i.e. driving a bus or coach, does not present the same risk to passengers.

PHV Operators - record keeping

- 2.101 Section 56 of the Local Government (Miscellaneous Provisions) Act 1976³⁴ requires PHV operators to keep records of the particulars of every booking invited or accepted, whether it is from the passenger or at the request of another operator. The particulars to be recorded may be specified by the licensing authority as a condition of the operator licence. The Department recommend that this information should include:

- the name of the passenger;
- the time of the request;
- the pick-up point;
- the destination;
- the name of the driver;
- the driver's licence number;
- the vehicle registration number of the vehicle.

- 2.102 This information will enable the passenger to be traced if this becomes necessary and should improve driver security and facilitate enforcement. It is suggested that six months is generally appropriate as the length of time that records should be kept.

³⁴ <http://www.legislation.gov.uk/ukpga/1976/57>

February 2019 – consultation version

2.103 PHV operators have a duty under data protection legislation to protect the information they record. The Information Commissioner's Office provides comprehensive on-line guidance on registering as a data controller and how to meet their obligations.

In-vehicle visual and audio recording – CCTV

2.104 Government has acknowledged the potential risk to public safety when passengers travel in taxis and PHVs. In 2012 the Government enabled licensing authorities to undertake enhanced DBS checks. The Department appreciates that all licensing authorities have recognised the risk posed by the very small minority of licensed drivers and undertake this level of check. It is unfortunately the case that no matter how complete the information available to licensing authorities is, nor how robust the policies in place are and the rigor with which they are applied, it will never remove the possibility of harm to passengers by drivers. The Department's view is that CCTV can provide additional deterrence to prevent this and investigative value when it does. The use of CCTV can provide a safer environment for the benefit of taxi/PHV passengers and drivers by:

- deterring and preventing the occurrence of crime;
- reducing the fear of crime;
- assisting the police in investigating incidents of crime;
- assisting insurance companies in investigating motor vehicle accidents.

2.105 While only a small minority of licensing authorities have so far mandated all vehicles to be fitted with CCTV systems, the experience of those authorities that have has been positive for both passengers and drivers. In addition, the evidential benefits of CCTV may increase the level of reporting of sexual offences. According to the Crime Survey for England and Wales³⁵ only 17% of victims report their experiences to the police, 28% of rape or sexual assault victims indicated that a fear they would not be believed as a factor in them not reporting the crime. The evidential benefits CCTV could provide are therefore an important factor when considering CCTV in vehicles.

2.106 The mandatory installation of CCTV in vehicles may deter people from seeking a taxi or PHV licence with the intent of causing harm. Those that gain a licence and consider perpetrating an opportunistic attack against a vulnerable unaccompanied passenger may be deterred from doing so. It is however unfortunately the case that offences may still occur even with CCTV operating.

2.107 CCTV systems that are able to record audio as well as visual data may also help the early identification of drivers that exhibit inappropriate behaviour toward passengers. Audio recording should be both overt and targeted i.e. only when

35

<https://www.ons.gov.uk/peoplepopulationandcommunity/crimeandjustice/articles/sexualoffencesinenglandandwales/yearendingmarch2017#main-points>

February 2019 – consultation version

passengers (or drivers) consider it necessary and all parties should be made aware that a recording is being made. The recording of audio should be used to provide an objective record of events such as disputes or inappropriate behaviour and must not be continuously active by default and should recognise the need for privacy of passengers' private conversations between themselves. Activation of the audio recording capability of a system might be instigated when either the passenger or driver operates a switch or button.

- 2.108 It is important to note that, in most circumstances, a licensing authority which mandates the installation of CCTV systems in taxis and PHV will be responsible for the data – the data controller. It is important that data controllers fully consider concerns regarding privacy and licensing authorities should consider how systems are configured, should they mandate CCTV (with or without audio recording). For example, vehicles may not be exclusively used for business, also serving as a car for personal use - it should therefore be possible to manually switch the system off (both audio and visual recording) when not being used for hire.
- 2.109 Imposition of a blanket requirement to attach CCTV as a condition to a licence is likely to give rise to concerns about the proportionality of such an approach and will therefore require an appropriately strong justification and must be kept under regular review.
- 2.110 The Home Office '*Surveillance Camera Code of Practice*'³⁶ advises that government is fully supportive of the use of overt surveillance cameras in a public place whenever that use is:
- in pursuit of a legitimate aim;
 - necessary to meet a pressing need;
 - proportionate;
 - effective, and;
 - compliant with any relevant legal obligations
- 2.111 The Code also sets out 12 guiding principles which, as a 'relevant authority' under the Protection of Freedoms Act 2012³⁷, licensing authorities must have regard to. It must be noted that, where a licence is granted subject to CCTV system conditions, the licensing authority assumes the role and responsibility of 'System Operator'. The role requires consideration of all guiding principles in this code. The failure to comply with these principles may be detrimental to the use of CCTV evidence in court as this may be raised within disclosure to the Crown Prosecution Service and may be taken into account.

³⁶ <https://www.gov.uk/government/publications/surveillance-camera-code-of-practice>

³⁷ [Section 33\(5\) of the Protection of Freedoms Act 2012](#)

- 2.112 The Surveillance Camera Commissioner (SCC) has provided guidance on the Surveillance Camera Code of Practice in its '*Passport to Compliance*'³⁸ which provides guidance on the necessary stages when planning, implementing and operating a surveillance camera system to ensure it complies with the code. The Information Commissioner's Office³⁹ (ICO) has also published a code of practice which, in this context, focuses on the data governance requirement associated with the use of CCTV such as data retention and disposal, which it is important to follow in order to comply with the data protection principles. The SCC provides a self-assessment tool⁴⁰ to assist operators to ensure compliance with the principles set of in the Surveillance Camera Code of Practice. The SCC also operate a certification scheme⁴¹; authorities that obtain this accreditation are able to clearly demonstrate that their systems conform to the SCC's best practice and are fully compliant with the Code and increase public confidence that any risks to their privacy have been fully considered and mitigated.
- 2.113 The Data Protection Act 2018⁴² regulates the use of personal data. Part 2 of the Data Protection Act applies to the general processing of personal data, and references and supplements the General Data Protection Regulation. Licensing authorities, as data controllers, must comply with all relevant aspects of data protection law. Particular attention should be paid to the rights of individuals which include the right to be informed, of access and to erasure. The ICO has provided detailed guidance⁴³ on how data controllers can ensure compliance with these.
- 2.114 It is a further requirement of data protection law that before implementing a proposal that is likely to result in a high risk to the rights and freedoms of people, an impact assessment on the protection of personal data shall be carried out. The ICO recommends in guidance⁴⁴ that if there is any doubt as to whether a Data Protection Impact Assessment (DPIA) is required one should be conducted to ensure compliance and encourage best practice. A DPIA will also help to assess properly the anticipated benefits of installing CCTV (to passengers and drivers) and the associated privacy risks; these risks might be mitigated by having appropriate privacy information and signage, secure storage and access controls, retention policies, training for staff how to use the system, etc. Licensing authorities should consult on this issue to identify if there are local circumstances which indicate that the installation of CCTV in vehicles would have either a positive or an adverse net effect on the safety of taxi and PHV users, including children or vulnerable adults.
- 2.115 It is essential to ensure that all recordings made are secure and can only be accessed by those with legitimate grounds to do so. This would normally be the police if investigating an alleged crime or the licensing authority if investigating a complaint or data access request. Encryption of the recording to which the

44 <https://ico.org.uk/for-organisations/guide-to-data-protection/guide-to-the-general-data-protection-regulation-gdpr/security/>

February 2019 – consultation version

licensing authority, acting as the data controller, holds the key, mitigates this issue and protects against theft of the vehicle or device. It is one of the guiding principles of data protection legislation, that personal data (including in this context, CCTV recordings and other potentially sensitive passenger information) is handled securely in a way that 'ensures appropriate security', including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures.

- 2.116 All passengers must be made aware if CCTV is operating in a vehicle. As well as clear signage in vehicles, information on booking systems should be introduced. This might be text on a website, scripts or automated messages on telephone systems.

Stretched Limousines

- 2.117 Licensing authorities are sometimes asked to license small (those constructed or adapted to carry fewer than nine passengers) limousines as PHVs. It is suggested that licensing authorities should approach such requests on the basis that these vehicles – where they have fewer than nine passenger seats - have a legitimate role to play in the private hire trade, meeting a public demand. Indeed, the Department's view is that it is not a legitimate course of action for licensing authorities to adopt policies that exclude limousines as a matter of principle thereby excluding service from the scope of the PHV regime and the safety benefits this provides. A blanket policy of excluding limousines may create an unacceptable risk to the travelling public, as it may lead to higher levels of unsupervised operation. Public safety considerations are best supported by policies that allow respectable, safe operators to obtain licences on the same basis as other private hire vehicle operators.
- 2.118 Stretched large limousines which clearly have more than eight passenger seats should not in most circumstance be licensed as PHVs because they are outside the licensing regime for PHVs. However, under some circumstances the Individual Vehicle Approval (IVA) regime accepts vehicles with space for more than eight passengers, particularly where the precise number of passenger seats is hard to determine. In these circumstances, if the vehicle has obtained an IVA certificate, the authority should consider the case on its merits in deciding whether to license the vehicle under the strict condition that the vehicle will not be used to carry more than eight passengers, bearing in mind that refusal may encourage illegal private hire operation.

Consultation at the local level

- 2.119 It is good practice for licensing authorities to consult on any significant proposed changes in licensing rules. Such consultation should include not only the taxi and PHV trades but also groups likely to be the trades' customers. Examples are groups representing disabled people, Chambers of Commerce, organisations with a wider transport interest (e.g. the Campaign for Better Transport and other transport providers), women's groups, local traders, and the local multi-agency safeguarding arrangements. It may also be helpful to consult

February 2019 – consultation version

with night-time economy groups (such as Pubwatch) if the trade is an important element of dispersal from the local night-time economy's activities.

- 2.120 Any decision taken to alter the licensing regime is likely to have an impact on the operation of the taxi and PHV sector in neighbouring areas; it would therefore be good practice to engage with these to identify any concerns and issue that might arise from a proposed change. Many areas convene regional officer consultation groups or, more formally, councillor liaison meetings; the Department considers this approach to be good practice.

Annex A – Previous convictions guidance

Legislation specifically identifies offences involving dishonesty, indecency or violence as a concern when assessing whether an individual is 'fit and proper' to hold a taxi or PHV licence. The following recommendations to licensing authorities on previous convictions reflect this.

Authorities must consider each case on its own merits, and applicants/licensees are entitled to a fair and impartial public hearing of their application if required. The periods given below should be taken as a minimum before a licence should be granted or renewed in all but truly exceptional circumstance. The Department's view is that this places passenger safety as the priority while enabling past offenders to sufficiently evidence that they have been successfully rehabilitated so that they might obtain or retain a licence.

Crimes resulting in death

Where an applicant or licensee has been convicted of a crime which resulted in the death of another person or was intended to cause the death or serious injury of another person they will not be licensed.

Exploitation

Where an applicant or licensee has been convicted of a crime involving, related to, or has any connection with abuse, exploitation, use or treatment of another individual irrespective of whether the victim or victims were adults or children, they will not be licensed. This includes slavery, child sexual abuse, exploitation, grooming, psychological, emotional or financial abuse, but this is not an exhaustive list.

Offences involving violence

Where an applicant has a conviction for an offence of violence, or connected with any offence of violence, a licence will not be granted until at least 10 years have elapsed since the completion of any sentence imposed.

Possession of a weapon

Where an applicant has a conviction for possession of a weapon or any other weapon related offence, a licence will not be granted until at least 7 years have elapsed since the completion of any sentence imposed.

Sex and indecency offences

Where an applicant has a conviction for any offence involving or connected with illegal sexual activity or any form of indecency, a licence will not be granted.

In addition to the above, the licensing authority will not grant a licence to any applicant who is currently on the Sex Offenders Register or on any barred list.

Dishonesty

Where an applicant has a conviction for any offence of dishonesty, or any offence where dishonesty is an element of the offence, a licence will not be granted until at least 7 years have elapsed since the completion of any sentence imposed.

Drugs

Where an applicant has any conviction for, or related to, the supply of drugs, or possession with intent to supply or connected with possession with intent to supply, a

February 2019 – consultation version

licence will not be granted until at least 10 years have elapsed since the completion of any sentence imposed.

Where an applicant has a conviction for possession of drugs, or related to the possession of drugs, a licence will not be granted until at least 5 years have elapsed since the completion of any sentence imposed. In these circumstances, any applicant will also have to undergo drugs testing at their own expense to demonstrate that they are not using controlled drugs.

Discrimination

Where an applicant has a conviction involving or connected with discrimination in any form, a licence will not be granted until at least 7 years have elapsed since the completion of any sentence imposed.

Motoring convictions

Hackney carriage and private hire drivers are professional drivers charged with the responsibility of carrying the public. It is accepted that offences can be committed unintentionally, and a single occurrence of a minor traffic offence would not prohibit the granting of a licence. However, applicants with multiple motoring convictions may indicate that an applicant does not exhibit the behaviours of a safe road user and one that is suitable to drive professionally.

Any motoring conviction of a licensed driver demonstrates that the licensee may not take their professional responsibilities seriously. However, it is accepted that offences can be committed unintentionally, and a single occurrence of a minor traffic offence may not necessitate the revocation of a taxi or PHV driver licence providing the authority considers that the licensee remains a fit and proper person to retain a licence.

Drink driving/driving under the influence of drugs/using a hand-held telephone or hand held device whilst driving

Where an applicant has a conviction for drink driving or driving under the influence of drugs, a licence will not be granted until at least 7 years have elapsed since the completion of any sentence or driving ban imposed. In the case of driving under the influence of drugs, any applicant will also have to undergo drugs testing at their own expense to demonstrate that they are not using controlled drugs.

Where an applicant has a conviction for using a held-hand mobile telephone or a hand-held device whilst driving, a licence will not be granted until at least 5 years have elapsed since the conviction or completion of any sentence or driving ban imposed, whichever is the later.

Annex B - Staying safe: guidance for passengers

Licensing authorities should provide guidance to assist passengers in identifying licensed vehicles and the increased risks of using unlicensed vehicles. The guidance might include advice on:

- how to tell if a taxi or private hire vehicle is licensed.

Educate the public in the differences between taxis and PHVs e.g.:

- a taxi can be flagged down or pre-booked.
- a PHV that has not been pre-booked should not be used as it will not be insured and may not be licensed.
- what a PHV should look like e.g. colour, signage, licence plates etc.
- the benefit of pre-booking a return vehicle before going out.
- arrange to be picked up from a safe meeting point.
- requesting at the time of booking what the fare is likely to be.

When using a private hire vehicle, passengers should always:

- book with a licensed operator.
- confirm their booking with the driver when s/he arrives.
- note the licence number.
- sit in the back, behind the driver.
- let a third party know details of their journey.

When using a taxi, passengers should where possible:

- use a taxi rank and choose one staffed by taxi marshals if available.

Taxi and private hire vehicle licensing: protecting users

0%

Introduction

Thank you for taking the time to read the consultation document and to respond to the questions. Your answers will help us to firm up statutory guidance to taxi and private hire vehicle (PHV) licensing authorities on how their licensing powers can be exercised in order to safeguard children and vulnerable adults.

Print or save a copy of your response

When you get to the end of this questionnaire, you will be offered the chance to either print or save a copy of your response for your records. This option appears after you press 'Submit your response'.

Save and continue option

You have an option to 'save and continue' your response at any time. If you do that you will be sent a link via email to allow you to continue your response where you left off.

It's very important that you enter your correct email address if you choose to save and continue. If you make a mistake in the email address you won't receive the link you need to complete your response.

Confidentiality and data protection

The Department for Transport (DfT) is carrying out this consultation to gather views and evidence on measures for inclusion within the statutory guidance issued to taxi and PHV licensing authorities. This consultation and the processing of personal data that it entails is necessary for the exercise of our functions as a government department. If your answers contain any information that allows you to be identified, DfT will, under data protection law, be the Controller for this information.

As part of this consultation we're asking for your name and email address. This is in case we need to ask you follow-up questions about any of your responses. You do not have to give us this personal information. If you do provide it, we will use it only for the purpose of asking follow-up questions.

We may contract a third party to analyse the responses we receive to the consultation. If you provide your contact details, we may share this information with a contractor in case they need to contact you regarding your consultation response.

DfT's privacy policy has more information about your rights in relation to your personal data, how to complain and how to contact the Data Protection Officer. You can view it at <https://www.gov.uk/government/organisations/department-for-transport/about/personal-information-charter>.

Your information will be kept securely and destroyed within 12 months after the consultation has been completed. Any information provided through the online questionnaire will be moved from their system to our internal systems within 2 months of the consultation end date.

1. Your name and email address. We will only use this if we need to contact you to ask about any of your responses.

Your name

Your email

2. Are you responding: *

- as an individual?
- as a taxi driver?
- as a PHV driver?
- as a taxi intermediary?
- as a PHV operator?
- a licensing authority
- the police
- other (specify)?

Administration of the licensing framework

3. The draft statutory guidance recommends that all those involved in the determination of licensing matters should receive training covering licensing procedures, natural justice, child sexual abuse and exploitation, disability and equality in addition to any other issues deemed locally appropriate (paragraph 2.18). Do you agree with the recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

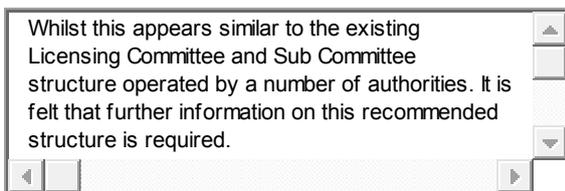

4. The draft statutory guidance recommends a council structure for dealing with licensing matters (paragraphs 2.20-2.24). Do you agree with this proposed structure?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

Whilst this appears similar to the existing Licensing Committee and Sub Committee structure operated by a number of authorities. It is felt that further information on this recommended structure is required.

Implementing changes to the licensing policy and requirements

5. The draft statutory guidance recommends that all issued licences should be reviewed following changes in licensing policy (paragraph 2.29). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

The Disclosure and Barring Service

6. The draft statutory guidance recommends that all drivers should be subject to an enhanced Disclosure and Barring Service (DBS) with barred lists check for individuals applying for or renewing taxi and PHV driver licences (paragraph 2.32). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

7. The draft statutory guidance recommends that all licence holders should be required to subscribe to the DBS update service (paragraph 2.38). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

8. The draft statutory guidance recommends that appropriate DBS checks are conducted every 6 months (paragraph 2.39). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

This would only be a practical requirement if the subscription to the DBS update service is mandated.

Licensee self-reporting

9. The draft statutory guidance recommends that drivers and operators should be required to notify the issuing authority within 48 hours upon arrest and release, charge or conviction of any motoring offence or any offence involving dishonesty, indecency or violence (paragraph 2.41). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

10. The draft statutory guidance recommends that licensing authorities should make referrals to the DBS when it considers that an applicant or licence holder is thought to present a potential risk of harm to the public (paragraph 2.43). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

11. The draft statutory guidance recommends that a check of overseas criminality information or ‘Certificate of Good Character’ should be required, when an individual has spent a period of more than 3 continuous months outside the UK when over the age of 18 (paragraph 2.47). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

12. The draft statutory guidance recommends that licensing authorities should require applicants / licensees to disclose if they have been licensed elsewhere, or have had an application for a licence refused, or have had a licence revoked or suspended by any other licencing authority (paragraph 2.57). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

13. The draft statutory guidance recommends that licensing authorities should use tools such as the national register of taxi and PHV driver licence refusals and revocations (NR3) to improve information sharing (paragraph 2.58). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

14. The draft statutory guidance recommends that the authority considering an application for or renewal of a licence should consult and consider other licensing decisions in its assessment, when an applicant / licensee discloses they have had an application refused, or had a licence revoked or suspended elsewhere (paragraph 2.60). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

Multi-agency safeguarding hub (MASH)

15. The draft statutory guidance recommends that multi-agency safeguarding hubs (or similar) should be established by licensing authorities to improve the sharing of relevant information (paragraph 2.64). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

Complaints against drivers and operators

16. The draft statutory guidance recommends that licensing authorities should produce guidance for passengers on making complaints directly to the licensing authority that must be displayed in licensed vehicles (paragraph 2.66). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

The displaying component of this requirement may prove impractical. Further work and/or guidance would be required for this to be implemented.

Safeguarding awareness

17. The draft statutory guidance recommends that all licensing authorities should, as a condition of licensing, require drivers to undertake safeguarding training (paragraph 2.72). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

18. The draft statutory guidance recommends that all licensing authorities should consider whether an applicant for a licence is able to communicate in English orally and in writing with customers (paragraph 2.79). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

Enforcement

19. The draft statutory guidance recommends that licensing authorities should, where the need arises, jointly authorise officers from other authorities so that compliance and enforcement action can be taken against licensees from outside their area (paragraph 2.81). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

Criminal record checks for PHV operators

20. The draft statutory guidance recommends that PHV operators (applicants or licensees) should be subject to a basic DBS check (paragraph 2.91). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

PHV operators - ancillary staff

21. The draft statutory guidance recommends that PHV operators should, as a condition of licensing, be required to keep a register of all staff that will take bookings or dispatch vehicles (paragraph 2.97). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

22. The draft statutory guidance recommends that PHV operators should be required to evidence that they have had sight of a basic DBS check on all individuals listed on the above register (paragraph 2.97). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

23. The draft statutory guidance recommends that PHV operators should, as a condition of licensing, be required to provide to the licensing authority their policy on employing ex-offenders that will take bookings or dispatch vehicles (2.98). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

PHV operators - use of passenger carrying vehicles (PCV)
licensed drivers

24. The draft statutory guidance recommends that, as a condition of the licensing, a PHV operator may not use a driver who does not hold a PHV licence (but may hold a PCV licence) to use a public service vehicle to carry out a PHV booking (paragraph 2.100). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

PHV operators – record keeping requirements

25. The draft statutory guidance recommends that PHV operators should, as a condition of licensing, be required to record the information detailed in paragraph 2.101. Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

In-vehicle visual and audio recording - CCTV

26. The draft statutory guidance recommends that licensing authorities should carefully consider potential public safety benefits and potential privacy issues when considering a policy mandating that taxis and PHVs have CCTV installed (paragraphs 2.104 to 2.109). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

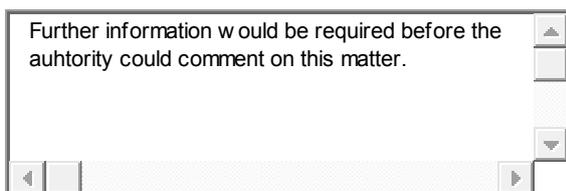

Stretched limousines

27. The draft statutory guidance recommends that licensing authorities should consider licensing vehicles with an Individual Vehicle Approval certificate, even if the passenger capacity is unclear, but under the strict condition that the vehicle will not be used to carry more than 8 passengers (paragraph 2.118). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

Previous convictions guidance

28. The draft statutory guidance proposes that the Department for Transport issue guidance on the assessment of previous convictions (paragraph 2.50). Do you agree with this recommendation?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

29. Annex A of the draft statutory guidance provides a list of offences to aid consistency in the 'fit and proper' assessment for licences. Do you think that the list provides enough detail to do this?

- Yes
- No
- No opinion

Comment below if you want to explain your answer.

30. Are there any offences that should be added to the list in Annex A of the statutory guidance?

- Yes
- No
- No opinion

Other offences

31. If you answered yes, please list the offence(s) and the period you consider appropriate to prevent the granting of a licence under most circumstances.

Impact assessment

32. Do you have data relating to alleged offences committed in licensed vehicles either against or by passengers? If you have and are prepared to share this with us please add to your response.

33. If you have any comments or other data that may be relevant to the Impact Assessment please provide this.
