## Foreword:

This joint business plan covers the next five years, setting out the aims, priorities and objectives of the Councils. It replaces the Aims and Objectives formerly published by Chiltern District Council and the Corporate Plan formerly published by South Bucks District Council. It is reviewed annually and updated in line with priorities based on community and customer need, government strategies, targets and the results of improvement activity.

This plan complements the individual Financial Plans and the Joint Sustainable Community Strategy and should be read in conjunction with them.

The Joint Sustainable Community Strategy 2013-2026, was produced by the Chiltern and South Bucks Strategic Partnership (LSP) and sets out the long-term aspirations and vision of the communities in Chiltern and South Bucks. Our joint aims and priorities are informed by this vision.

**Bob Smith**  
Acting Chief Executive,  
Chiltern and South Bucks  
District Councils.

**Ralph Bagge**  
Leader of South Bucks  
District Council

**Isobel Darby**  
Leader of Chiltern  
District Council

## **Vision for the Chiltern and South Bucks areas by 2026:**

The Joint Strategic Partnership comprises representatives from the two districts, the County Council, parish and town councils, the voluntary and business sectors. The Partnership's joint vision for both districts is shown below.

Chiltern and South Bucks Districts to be places with:

- Prosperous and diverse economies that encourage local employers and small businesses so we can protect the areas' economy for the future and achieve a better balance between the jobs available and the people to fill them;
- High quality education and lifelong learning which improves people's lives, enabling them to make well-informed decisions and play their full part in the community;
- A wide range of high quality housing, including a good supply of affordable homes to help meet community needs and maintain our services and communities;
- Beautiful, green countryside, high quality open spaces, attractive, distinctive and vibrant towns and villages, where our heritage is protected and improved;
- Sustainable environments where people take pride in their community and embrace low carbon living;
- Effective and targeted transport solutions, including a well-maintained transport infrastructure with improved north-south and east-west links;
- Lower levels of crime and anti-social behaviour, where the police are an active presence within the community and people can live safely, being knowledgeable about how to prevent crime;
- Wide ranges of accessible leisure opportunities;
- Good health enjoyed by all, including those in deprived groups, where people take responsibility for their own well-being by making healthy lifestyle choices;
- Active communities involved in shaping decisions locally and who support the elderly and vulnerable to live full and independent lives;
- High-quality services and facilities help people from all sections of the community, particularly the young, elderly and disadvantaged, to live independent and fulfilling lives;
- Equality of opportunity and fair access to services.

The Joint Community Strategy is available as follows:

## **The Councils' areas of focus:**

Chiltern and South Bucks Councils have each published a summary outlining our respective priorities, goals and promises for 2014 – 2019. These appear overleaf. Both Councils share the same overarching three objectives; however the agreed priorities and actions being taken to deliver them have been tailored to reflect what the people of each District tell us is important.

Our shared three headline objectives are:

1. Delivering cost- effective, customer- focused services
2. Working towards safe and healthier local communities
3. Striving to conserve the environment and promote sustainability.

These provide the framework for delivery of our shared vision. Our aims and priorities within each of these three objectives are detailed further in section 6.

Our objectives link with, and are complementary to, the Joint Sustainable Community Strategy (SCS), prepared by the Chiltern and South Bucks Strategic Partnership's (LSP) Steering Group. The SCS covers broader issues than Council services.

The latest SCS was published in November 2013 and sets out the way forward for Chiltern and South Bucks to 2026. All public bodies in the districts, together with the voluntary, community and business sector representatives, have collectively agreed to work together to deliver this Strategy. The five themes for delivery of the SCS are as follows:

1. Thriving Economy (led by the Thames Valley and Buckinghamshire Local Enterprise Partnership for the LSP)
2. Sustainable Environment (led by the Councils for the LSP)
3. Safe Communities (led by Thames Valley Police for the LSP)
4. Health and Wellbeing (led by the Chiltern Clinical Commissioning Group for the LSP)
5. Cohesive and Strong Communities (led by Community Impact Bucks for the LSP)

The Councils' second objective encompasses what we can do towards delivery of the latter three SCS themes, whilst the Councils' third objective encompasses what we can do towards delivering the first two SCS themes, reflecting a realistic emphasis on what the Councils can achieve in these areas. The Councils' core area of responsibility is reflected in our first objective.

## How our organisations are changing:

During 2011 through to early 2012, both Councils responded to the continued recession, Government spending cuts and the need to keep Council tax as low as possible by investigating the possibility of the Councils working more closely together. To ensure long-term sustainability during this difficult financial time, we agreed to implement a programme of joint working between Chiltern and South Bucks District Councils to give us the added benefits of improved service resilience and to reduce financial costs for both Councils.

In early 2012, the joint senior management team was put in place with one Chief Executive and two Directors serving both Councils, saving a total of £200,000 per year. With these appointments in place, the next level down was reviewed – senior management – with the opportunity taken to redesign the organisation structure to reduce overall senior management, whilst grouping related areas together. The structure was agreed by April 2012, with all heads of service appointed by the end of the year. By October 2012, the total savings from this project amounted to £782,000 over three years.

A transformational plan was then agreed together with a timetable so that each service unit could be reviewed individually over the next few years. An approved method was adopted for these service reviews with the aim of making the most effective use of staff, delivering services that matter, reducing duplication and improving resilience.

By the end of the financial year 2014/15, nine service units had gone through review and implementation as shared services, with a further eight reviews underway for implementation by the end of 2015. The remaining three services are planned for review by spring 2016. During 2015/16, nett savings generated will total £1,225,000.

Underpinning this work, many of the Councils' individual policies, strategies and procedures have been reviewed and, where feasible, joint policies, standards and strategies have been put in place. The ICT infrastructure underwent change to support the shared services, with a shared platform for each individual web site to reduce duplication and a shared intranet platform. Joint document management systems and telephony systems are also being rolled out with many shared systems becoming less costly than when separate systems were in place.

As Council staff move into shared service areas, they move onto a new contract of employment with harmonised terms and conditions. This means that all staff employed by either Council will, by mid-2016, be on the same terms and conditions.

## Roles and Responsibilities:

Chiltern and South Bucks District Councils share one Chief Executive, currently Bob Smith as acting chief executive. Two joint Directors complete the executive team, Jim Burness, Director of Resources and an interim Director of Services. This team is ultimately responsible for delivering statutory services and agreed functions through the Councils' employees and contractors.

The Chief Executive has responsibility for corporate functions such as human resources, policy, performance and communications. The Director of Resources has responsibility for business support, electoral and democratic services, finance, legal and customer services. The Director of Services has responsibility for services relating to sustainable development, environment and healthier communities. Services falling under each of the Directors' remit are listed below.

Our joint Heads of Service lead the following services run by the councils:

Role:	Delivering services related to:
Head of Sustainable Development	Planning policy, development management, conservation & tree preservation, enforcement, building control, economic development, strategic transportation issues
Head of Environment	Waste collection, street cleaning, property, asset and facilities management, parking, cemeteries, crematorium, memorial gardens, public conveniences, street naming, engineering services, grounds maintenance, operational transport issues, landscape advice
Head of Healthy Communities	Environmental health, community safety, housing, licensing, emergency planning, health and safety, business continuity, carbon management, community development & cohesion, grants, safeguarding, leisure services, sports development
Head of Business Support	Transformation programme management and support, all information and computer services, freedom of information requests and data protection
Head of Finance	Management & statutory accountancy, financial administration, internal audit, external audit liaison
Head of Legal & Democratic Services	Legal, democratic services, electoral registration, elections, land charges
Head of Customer Services	Customer services, revenues & benefits, fraud & welfare

The Heads of Service are responsible for the day to day running and long term planning of their services. They answer to both the Executive Team and elected Councillors in this respect. They propose the most effective performance measures for their services and work with their teams to produce a service plan each year which will link to this business plan, the financial plan and budget, and will clearly set out the actions to be taken within the services they are responsible for over the next year, as well as planned actions for the medium and longer term. These plans are first reviewed and approved or amended by the Executive team, before review by elected Members.

In addition, South Bucks District Council have responsibility for the Farnham Park Trust which is overseen and managed by a panel of Members, and Chiltern District Council lead on the Chilterns Crematorium Joint Committee, which was established by Aylesbury Vale, Chiltern and Wycombe District Councils to jointly manage the crematorium at Whielden Street, Amersham.

Streamlining and maintaining each Council's Constitution is included within our values as part of robust governance and accountability. Greater detail can be found in either Council's Constitution, however the key Cabinet areas of responsibility are:

## Performance Management

Performance management is about how we consistently plan and manage improvements to our services and involves making the best use of the resources (financial, personnel, skills) and information to drive improvement. We must continue to focus on our customers and communities to deliver improvements to services that benefit users, particularly those who are most vulnerable.

Continuous improvement is driven by regular consultation and analysis of customer needs feeding into the service planning process. This helps to identify actions to drive improvement and measures to monitor if the desired improvements are delivered.

Several systems link to underpin performance improvement. At the centre of this is the performance and improvement framework, which links the Joint Business Plan, the individual financial plans, Joint Sustainable Community Strategy, service plans, staff appraisals and training plans with performance, risks and budget monitoring. This framework appears in full in appendix E.

## Strategic Risks

Each Head of Service identifies and monitors key operational service risks. Some of these may become so concerning that they become strategic risks. In addition, the Risk Management Group meets regularly to review the key operational risks and to identify current strategic risks.

Strategic risks are identified as those that could prevent the Councils from achieving their key objectives as set out in this Business Plan. The strategic risks are reviewed across both South Bucks and Chiltern. Strategic risks are reported to Members as part of reporting on risk management and the development of each Council's financial strategy. The latest available strategic risks prior to publication are attached as Appendix D.

## Appendix E: Joint Performance Management Framework

This Performance Management Framework is a clear statement that Chiltern and South Bucks District Councils are committed to providing value for money services that meet the needs of users and improve the quality of life for residents. Rising public expectation alongside reducing budgets require the Councils to embed a culture of performance improvement so that we can continue to deliver quality services to our customers at the correct cost.

Performance and improvement is about how we consistently plan and manage improvements to our services and involves making the best use of the resources (financial, personnel, skills) and available information to drive improvement. We must continue to focus on our customers and communities to deliver improvements to services that benefit them, particularly those who are most vulnerable.

Everyone has a part to play in improving our services and improving quality of life for residents of Chiltern and South Bucks. The challenge is to continuously improve by identifying ways to deliver services more effectively. All of us need to understand the principles of performance and improvement and how they are applied at Chiltern and South Bucks District Councils. This guide aims to do that. It explains our Performance Management Framework to staff, councillors, and anyone else interested in how we measure and manage performance.

### What is performance and improvement all about?

Effective performance and improvement is vital to ensuring a strong sense of focus and direction throughout the organisation. It helps us to achieve both Councils' priorities and service improvements.

Performance and improvement is about practical ways of improving how we do things in both Councils in order to achieve our aims and most importantly, deliver better outcomes for local people.

Performance and improvement does not have to be complicated. It is what we do to improve and maintain good performance. It involves each member of staff clearly understanding how achieving their individual objectives will directly link to both Councils achieving their corporate aims and priorities. We gather reliable information about our performance to help us understand and address any performance issues.

With effective performance and improvement management:

- you know what your objectives are;
- you know what you have to do to meet your objectives;
- you know how to measure progress towards your objectives;
- you can detect performance problems and remedy them.

There are two main elements of performance and improvement management which are:

**Systems**– these are the framework of co-ordinated planning and review mechanisms, enabling our performance to be effectively and efficiently monitored in an open and transparent way. These systems and processes are set up with the aim of achieving continuous improvement in the delivery of both Councils’ priorities. This is outlined in the Corporate Framework Diagram on page 4.

**Culture**– this is the need for our people to continually want to improve. Effective performance and improvement management happens when the management systems are complemented by an organisational culture that focuses on delivering high quality services to customers and encourages performance improvement through innovation.

We need to manage performance effectively to make sure we are doing the right things well and to look for ways to do improve further. Key questions to ask include:

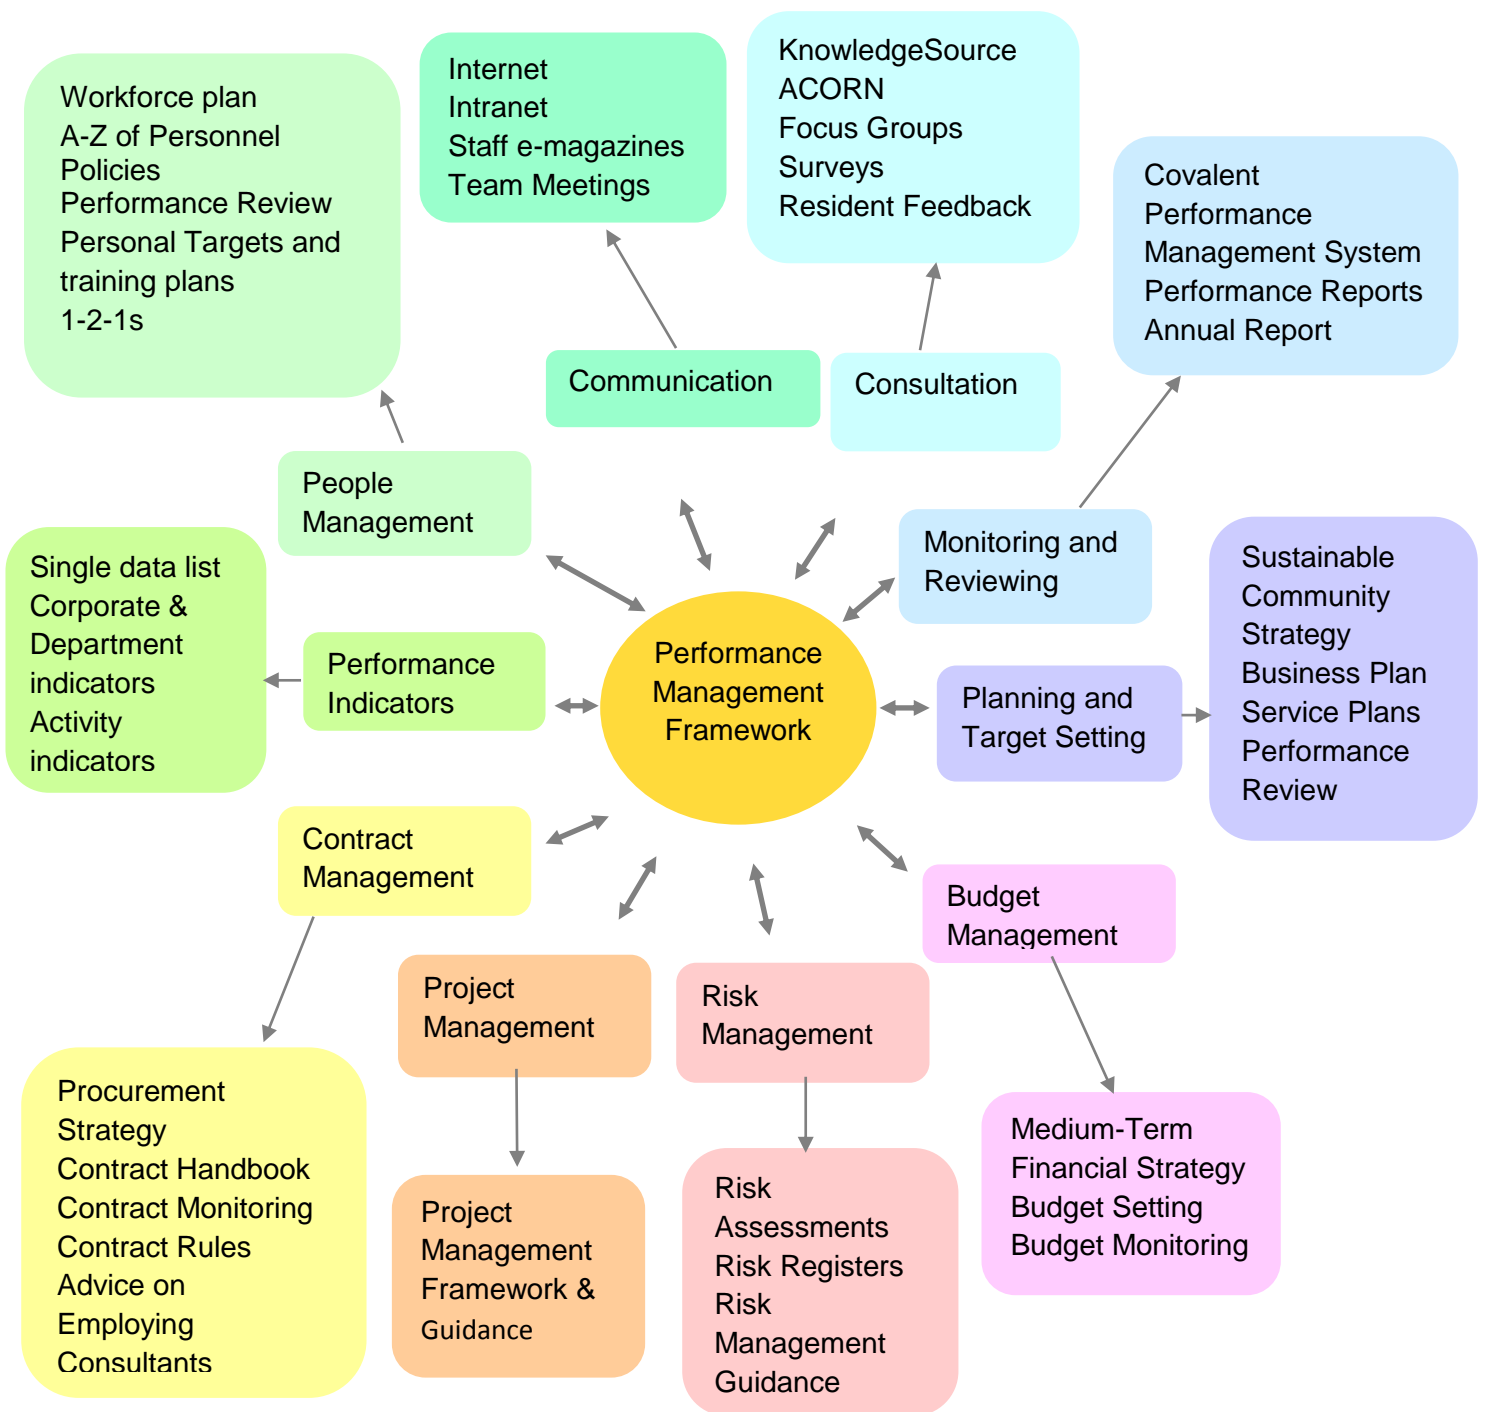

- ◆ Community – are we delivering priorities important to local people?
- ◆ Partnerships – are we contributing to our full potential?
- ◆ What corporate priorities should we focus on?
- ◆ Are we providing value for money?
- ◆ Are we maintaining high quality services and improving them where possible?
- ◆ Are we meeting performance indicator targets? If not, what is preventing us and how can these be overcome?
- ◆ Are we providing high quality information to Members to review performance and agree future priorities?

#### **Key drivers to improving performance at Chiltern and South Bucks District Councils:**

- Clear, shared vision, based on Community aspirations, linked to the needs of all diversity groups.
- Staff motivated to achieve stretching goals and targets.
- Service managers leading value for money improvements in
  - customer satisfaction,
  - cost,
  - process improvement, and
  - delivering improved outcomes for local people.
- Timely, high-quality information which informs decision-making.
- A culture of innovation and continuous improvement.

These drivers for improving performance are explained in more detail in subsequent sections.

An effective performance and improvement framework depends on a number of different systems linking together. These systems are shown below. This framework does not plan to go into each of the different elements separately, because other best practice guidance already exists in these areas.

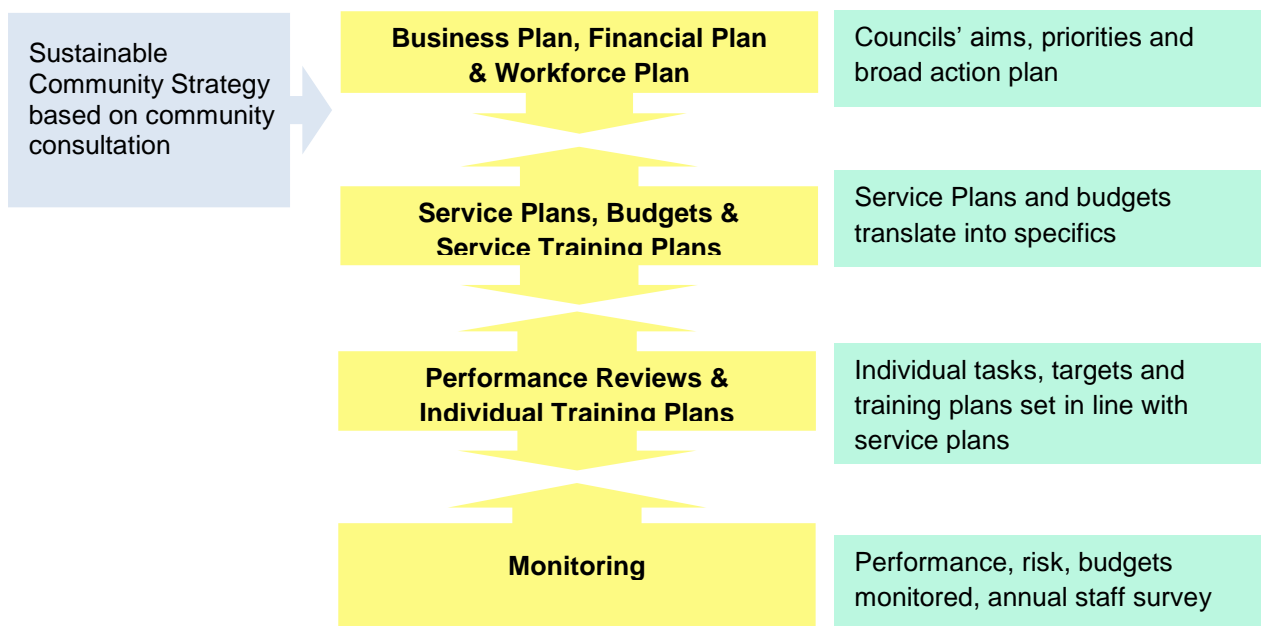

**Clear, shared vision, based on Community aspirations, linked to the needs of all diversity groups**

Members agree a clear vision of what each Council aims to achieve. This enables Members and managers to lead service improvements and allocate resources in line with each Council's aims and priorities. The Joint Business Plan sets out what the Councils aim to achieve in the short to medium term, it contains clear aims, priorities and improvement objectives. It is the key document for communicating the Councils' objectives to officers, members and interested members of the public, and is supplemented by a one-page aims and objectives flyer for publication.

The Joint Business Plan links with and is complementary to, the Joint Sustainable Community Strategy which is prepared by the Chiltern and South Bucks Strategic Partnership (LSP). The LSP is made up of local authorities, parishes, health, the police and representatives from the education, business, youth, faith and voluntary sectors. The Joint Sustainable Community Strategy covers broader issues than just the services covered by the Councils. We consult widely on the strategy to get partners and residents' views and buy-in. This ensures the Joint Sustainable Community Strategy is focused on what is important for local people. The latest Joint Sustainable Community Strategy was published in November 2013 and sets out the way forward for Chiltern and South Bucks to 2026.

To achieve the Councils' Aims as set out in the Joint Business Plan, we link them to the activity of each service and the role of each member of staff. We do this through the Councils' Corporate Framework, which includes all stages from setting corporate aims and priorities, to service planning, to individual performance reviews. This ensures there are sufficient resources, staff, skills and finances to achieve Council aims and that all staff understand their responsibility in achieving their objectives. The diagram of the Corporate Framework shows the 'line of sight' between those delivering services and the Council's aims.

### Chiltern and South Bucks District Councils' Corporate Framework

The **Joint Business Plan** links closely to the **Medium-Term Financial Strategy** and the **Workforce Plan** and is at the heart of both Councils' work each year. They form the basis for **service planning** and **budget setting** undertaken by each Service Unit. It is important the Councils clearly set out our aims and priorities together with ways of measuring achievements and managing risks. The Joint Business Plan includes improvement objectives as well as the Strategic Risk Register, which is linked to the achievement of medium-term priorities.

Service plans and budgets are based directly on the Councils' Joint Business Plan and provide a route map to outcomes prioritised by the community. The **Service Planning Workbook** sets out the Councils' joint approach to developing comprehensive service plans. Managers are encouraged to involve all staff in the preparation of service plans and

identifying areas for improvement. Service plans identify achievements, customer needs, equalities, sustainability and value for money improvements, set performance targets and actions as well as reviewing key areas of risk. They are scrutinised by the relevant Director and the Policy and Performance team and form the basis of staff performance reviews and training plans.

The achievement of both Councils' priorities is monitored through the joint **Covalent Performance Management System**, with regular reports being reviewed by Management Team and Cabinet. It is important to keep residents informed of progress. We publish an annual review of our performance in the **Annual Report** which is published at the end of June each year and made available on each Council's website. Quarterly performance reports providing regular performance and activity updates are also accessible to the public through the website.

### Staff motivated to achieve stretching goals and targets

There is strong commitment to achieving improvement at all levels of the Councils. The **Joint Business Plan, Service Plans, Performance Review Process, A-Z of Personnel Policies** and the Councils' **Management Principles** are used to drive change and increase motivation. **Effective communication** of the Joint Sustainable Community Strategy Vision and Council aims and priorities takes place between partners, Members, management and staff, both upwards and downwards, to ensure objectives are understood. Regular Senior Managers' meetings provide a forum for discussing best practice and new initiatives.

Everyone meets with their manager each year for their **performance review**. It includes a review of performance over the last 12 months and sets objectives for the future. Staff reviews consider all staff against the Skills and Competency Framework to ensure that they are equipped to fulfil their function. All staff have a responsibility to achieve individual objectives and understand how their actions and work contribute to team, service and each Council's aims. Managers ensure all staff have regular team and individual review meetings to review progress, develop ideas and cascade information about performance and improvements to their staff.

**Performance measurement** ensures goals and targets are met. Performance measures and indicators focus on the **outcomes** you are trying to achieve and describe how well a service is performing against these outcomes. They also help identify good practice, areas for improvement and opportunities to learn from others. It helps all staff and members to stay focused on key priorities and to ensure areas of poor performance are investigated. **Targets** define levels of performance for a particular performance measure or indicator. In setting targets, consideration should be given to what is important locally as well as nationally. Achievement of these targets is the responsibility of the Portfolio Holder and Service Manager. The diagram below shows when all staff meet their targets, service, corporate and community outcomes are achieved improving quality of life for local people.

**Service managers leading value for money improvements in customer satisfaction, cost, process improvement and improved outcomes for local people**

It is important that the Councils can demonstrate they are delivering **value for money** (VFM) within each service area and across all corporate activities. Services must be provided at the right quality, level and cost to meet the diverse needs of our customers and the local community. To do this, VFM needs to be considered as part of the service planning and budget setting processes.

The service planning and budget setting processes include improvements in VFM, and as part of this process, each service should review VFM by assessing:

We are always looking to improve VFM in all aspects of service delivery. As part of the service planning process, Service Managers should identify **VFM improvements** and set objectives to **improve the quality of data** used to assess VFM.

### Timely, high-quality information which informs decision making

It is important both Councils have clear evidence of **residents' needs** and systematically use information about views and preferences to drive improvements to deliver better outcomes for all residents, particularly the most disadvantaged. The Councils are committed to involving residents in shaping services and has focused on improving its information management systems to help managers, officers and Members take action based on knowledgeable decisions.

These include:

- **Website** – communicates information about all Council Services;
- **Intranet** – contains key strategies, plans and policies;
- **Have Your Say** – dedicated resource to lead engagement activities and focus groups;
- **KnowledgeSource** – resource library accessed via the intranet of statistical information about different diversity groups, wards, district-wide information;
- **ACORN** – customer targeting tool. It combines demographic and lifestyle information and enables those marketing services to target services to areas of need;
- **Covalent Performance Management System** – web-based system which links performance indicators, risk registers and improvement actions. Traffic-light functionality enables quick review of areas doing well and areas to focus on;
- **Geographic Information System (GIS)** - a wide range of geographic information is now available to officers on GIS.

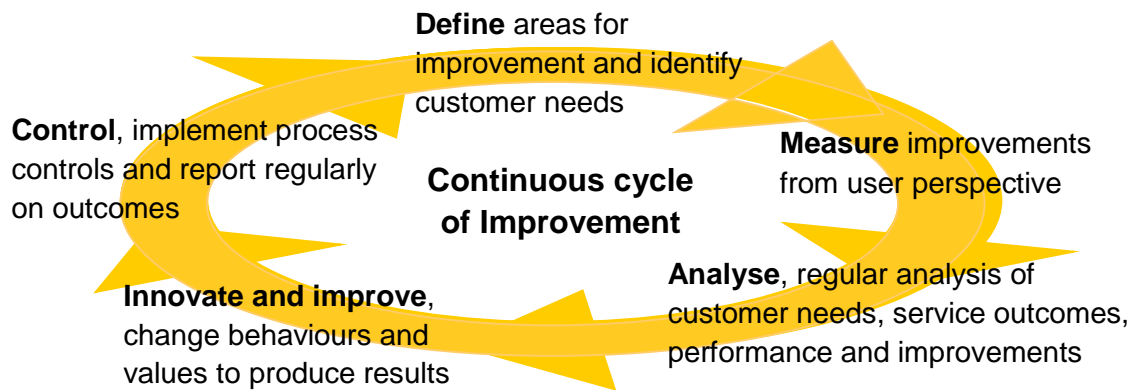

Much more **quantitative information** is available to officers at their desktops. This has enabled both Councils to establish corporate approaches in areas including equalities, sustainability, project management and risk and has helped services have a better understanding of the diverse needs of different customer groups and to deliver improved value for money.

Effective **monitoring** processes and being able to take action when areas are under-performing are essential aspects of managing services and delivering improvements. Systems need to present the right information to the right person at the right time and managers need to be clear how they can act on the information provided to ensure they remain on track. The traffic light functionality on Covalent helps members and managers to quickly see actions or projects that are overrunning and performance indicators that are under-performing. This allows for fast, corrective action to be taken. All services are active in reviewing achievements against performance targets, service plan actions and risks and are pro-active in keeping the information on Covalent up-to-date.

A series of **performance reports** are reviewed by Management Team, Cabinet, Council, Resources and Services Overview Committees (CDC) and Overview and Scrutiny Committee (SBDC). Priority performance indicators are monitored monthly and progress against all indicators and actions is monitored quarterly. **Risks** are reviewed quarterly by the Director of Resources and are reported to the Risk Management Group. The **Chief Executive** and **Leaders of each Council** are very active in championing performance improvements and closely scrutinise any performance issues. **Portfolio holders** take responsibility for performance of their portfolio areas and present updates at Cabinet. **Overview and Scrutiny Committee** (SBDC) challenge managers where services are under-performing and Portfolio Holders and Managers may be asked to attend meetings until performance has improved.

## A culture of innovation and continuous improvement

In order to encourage a culture of **continuous improvement** and innovation, all staff are supported to suggest improvements to the way they work. This Performance and Improvement Framework invites staff to suggest innovative improvements and managers are encouraged to get staff to continually question the way they work to look for improvements in economy, efficiency and effectiveness.

Underpinning this cycle are the 4C's (consult, challenge, compare and competition) which are an intrinsic part of the improvement process:

- effectively **consult** local people;
- **challenge** the current pattern of service provision and who provides the service;
- **compare** the performance and competitiveness of services;
- use fair and open **competition** to secure effective and efficient services.

Learning from best practice is a key improvement activity. Many services are part of **benchmarking groups** with other Councils that meet on a regular basis to share ideas. Services are encouraged to improve the comparative information used to evaluate VFM, in particular obtaining improved process, performance and financial comparative data.

Members and managers are vital to instil a **culture of continuous improvement**. The Leaders of each Council take a keen interest in performance and improvement and together with the Chief Executive, discuss performance improvements with Service Managers where they feel there is a need for additional focus or improvement. Service managers are encouraged to set all staff stretching goals and targets through the performance review process to achieve the Councils' and Service's outcomes. The competency based performance review system includes drawing up a training and development plan for all staff. Each Council, as an IIP (Investors in People) organisation, places a high priority on ongoing training and development. Through the service planning process managers are encouraged to take a medium-term view of the skills required to meet medium-term service objectives. This helps ensure that teams have the skills required to achieve Councils' priorities and continually improve service delivery.
