Tech Lab Project

enda Item 7

Aylesbury Youth Survey

Are you a young person interested in sharing thoughts about your community?

**Cloudy
Foundation**

Community Board
Aylesbury

This survey has been designed and developed by young people to provide young people of Aylesbury a unique opportunity to share their views and answer questions that will directly help to shape the future plans for your town.

Project Aims

We aim to work with educational and community business partners to identify young people who can help give clarity to what young people need in a post Covid19 society.

This will inform Buckinghamshire Council's plans for how to create better opportunities in the community and in the employment market in future.

Day's 1 to 4

Investing In Young People's Digital Education For Business & Community

Page 33

Our Inspiration

- We are seeking to help address the skills gap and provide young people with practical opportunities to engage with employers and digital technology
- Our work aims to combine skills development with a social return on investment by connecting young people, schools, and businesses for mutual benefits
- We are using our corporate partner, Cloudy Group's CSR competence and experience in digital education to create an offer that builds digital inclusion and positively impacts local economies and communities

Prospective Projects Subject to Funding

Page 15

Oasis Partnership

NHS Hospital & Outreach Education

Red Kite Housing Virtual Youth Project

- In-school online team challenges find digital solutions for businesses
- Supported by business mentors
- Graduation into the Enterprise Academy
