

WYCOMBE DISTRICT COUNCIL

Decision taken by Cllr John Gibbs Cabinet Member for Community

The Member has taken the following decision.

The decision will take effect on 23 May 2014.

Title

2014 Community Facilities Strategy Update

Decision Taken

That the Community Facilities Strategy update and the recommendations in the report be approved.

Date of Publication

23 May 2014

Reasons for Decision

The approval of the update to the 2011 Community Facilities Strategy will benefit the District in that it provides up to date information about the availability of community facilities in the District which in turn gives evidence to support seeking developer contributions to improve the provision of community facilities in areas of deficiency. This will mean improved community sustainability as residents benefit from good neighbourhood infrastructure, specifically places for meetings, and a range of other activities at local level.

Consultation Undertaken

All community facilities in the district were sent an audit form to complete which included questions about the availability of their facilities and potential improvements to the buildings.
