

Holland Farm mitigation

- Holland Farm Circular Route
- Thames Path Loop
- Running Track s. 106
- Thames and Spade Oak Loop
- Spade Oak Loop
- Other routes

- 7.** Footpath leading past the Crowne Plaza Marlow and connecting the Thames Path with the area around Westhorpe House; key area for improvement as the path enables a circular trail around the LMLCP. This section of path is very narrow, overgrown with vegetation, muddy (see Figure 7) and has a littering issue. BC's proposal of constructing a new footpath here is considered a key measure for the park. It is to be noted that this will require a new Permissive Path Agreement with the landowner(s).
- 8.** Intersection of various footpaths to the north of Crowne Plaza Marlow; near residential area and the A404. This location offers an opportunity for improving signage, as it is easy to get lost here (for example heading towards the A404 or private land belonging to the angling club); a new waymarker could signpost the LMLCP circular trail.
- 9.** Current footpath / cycle path to the north of the western lakes and Westhorpe House. BC's proposal to extend / enhance the cycleway here is considered to be an effective intervention, as there currently is only a very short well surfaced (compacted gravel) cycle path section to the north of Westhorpe House. The surfacing could be improved along the entire section of this path. It is to be noted that this will require a new Permissive Path Agreement with the landowner(s).
