If you have any other comments about the proposals, please provide them here. - Traffic-prioritisation comment

There needs to be more consideration given to where parents will park to drop off their children at the school. It seems to me that they currently park on the road opposite the school but that this will no longer be allowed.

Could I also please point out that the entrance referred to as 'the entrance of St Andrew Church' is also the shared right of way access for the property 'Redlands', as identified in terms and conditions set out when land was obtained by compulsory purchase for the extension of the adjacent school. Could you please amend your communication going forward to include this detail to avoid any confusion

As a parent at the pre school I think this is extremely important for the safety of the children at the school. Although I know it will slightly impact parking, however I feel that is a small price to pay for children's safety and parents peace of mind crossing a very busy road twice a day.

I think this is a great plan, however, I am concerned that the zigzag markings either side of the crossing may be too short: Often at school pick up times the whole of Hyde Heath Road around the school area is very busy with parked cars, and the close proximity of these to the new crossing may make it hard for drivers to see either the signals or people waiting at the crossing, and people might have to judge whether the lights will change from quite far away. If there is a longer zigzag area, cars will be able to proceed around the parked cars safely into the zigzag area with enough time to process activity at the new crossing.

In more general terms, cars travelling at above the speed limit in Hyde Heath (particularly where I live near the South Heath side of the village, but still within the 30 mph restriction) is a dangerous and problematic issue, not addressed by this new

I fully support this essential puffin crossing. My children attend the school and it is unbelievable there isn't a safe crossing to access the school already in place.

This will benefit not only the school but the entire village.

Thanks,

Emma

It's desperately needed. Before someone is hurt.

That road is especially dangerous as more often than not cars speed.

Please do something.

Fully support this proposal due to the vast amount of traffic running through the village.

I think there should also be a speed camera, as vehicles travel at high speed and I do not feel safe as an adult crossing - less so when accompanied by my 4 year old. The speed limit should be reduced to 20mph.

The safe crossing for children is incredibly important. Despite the speed restrictions in place there are often cars flying past at high speeds and it can be hair raising trying to cross with young children.

As a parent and local resident, I strongly support the introduction of a puffin crossing on Weedon Hill. This is my 6th year of walking a child to school along Weedon Hill and making the crossing. It can be very dangerous at times with lack of visibility and parked cars and I strongly believe a puffin crossing will make this so much safer for everyone

The road can be incredibly dangerous to cross with children in the morning due to the restricted visibility from parked cars and the speed at which the traffic drives through the village. This crossing would allow not only the children to cross safely, but everyone who lives in the village and would act to slow traffic to a safer speed.

This crossing will make a huge difference to ensure the children are safe getting to school.

With two young children at Hyde Heath school and pre-school, a crossing would make the area much safer. It's a busy road and also the addition of the large vehicles going in and out of the track by the school often make it a difficult crossing at school pick up and drop off times.

It's such a fast road that this is more than needed to keep the children safe

So important for the safety of our grandchildren when crossing to go to school. Such a dangerous road

My child goes to the school, we need to drive there and park. I understand it is congested but the way people park and drive is so irresponsible when little children need to cross the road for school and nursery.

Even though I know this would slow down my drive in I am 100 percent behind this. Currently children are crossing a busy road in a very unsafe way. A child is going to be seriously hurt or worse if this does not happen. I have witnessed several near misses including one which was so close it upset my children for months.

Please implement this, please do not wait for a serious accident to occur before putting this in place

Living on the same road as the school I am aware of how dangerous crossing the road is as cars go extremely fast past the school.

Absolutely ridiculously dangerous to have a school on a main road without a crossing- I can not believe one is not already in place

My child attends Hyde Heath Infant School and it is very difficult to cross the road safely.

The road is regularly used as a cut through and vehicles speed through the village despite flashing beacons warning of the school.

I believe that a puffin crossing is necessary as soon as possible, before there is a very serious accident
My son has been nearly killed on this road at the age of five. I am delighted that the puffin crossing could be installed
This puffin crossing is essential for the village. Weedon Hill is a straight road and it is a cut through from Amersham to Chesham. People speed down the road at 50/60 miles ph. It is dangerous.

In addition, many children at the school have had near misses. They could have been killed.

The preschool has two start times. At 9am and at 12pm. When I used to take my son at 12pm, it was almost impossible to cross the road. The cars were speeding.

This puffin crossing is essential so no child can be killed by

During school drop off and collection times it is a very dangerous stretch of road where there have been a number of near misses. This would be a huge positive for the village and will slow traffic along a straight and dangerous stretch of road. It will hopefully also slow cars passing the common, playground and hub as well. I fully support this application. This is so necessary outside the school and pre-school.

A puffin crossing will make a huge difference to the safety of the children at Hyde Heath Infant school. Cars regularly use this road as a cut through and speed through. I believe it will help calm traffic for residents and for school children. It is so important to ensure the safety of families and children crossing to school around parked cars etc.

Yes please. Long overdue in my opinion.
We also should have some street lights/ lamps and speed bumps as some drive like maniacs and scary very fast on Weedon Lane and on Bravs Lane in Hyde Heath.

100% needed for the safety of the children.
Long overdue, so many kids crossing that road and the traffic runs through the village straight after a 60 zone. It would make such a huge difference to the safety of crossing the road. People unfortunately speed along there and park inappropriately making it so dangerous.

I would also suggest adding some more white lines across driveways further up Weedon Hill, enabling people to enter and exit their driveways more safely with the school cars parked along the road.
I've had two kids go through the school and one going soon. I've still not forgotten the time a car stopped to let us cross only for another car to overtake it and nearly run my daughter over.
Please go ahead with this scheme.

Would provide security for parents knowing they are safe to cross the road to pick up their child. Having been a child at the school, there have been many near misses. A crossing would be brilliant.
I have witnessed near misses on this road as children and their families are crossing to get to school. I fully support a puffin crossing on Weedon Hill.
The sooner the better

It's long overdue and desperately needed to protect the children crossing to the school.
Traffic calming would also be beneficial
Other measures to slow the traffic coming through the village.
Sleeping policemen, speed cameras etc.

It feels very dangerous at that point, with the playground opposite the kids just want to run.

Hi I would highly recommend it... It's not safe for children or pedestrians to cross over the road and I would be more than happy for this to happen for safety of our children and pedestrian

I feel it absolutely necessary for this area to have better safety measures in place for our children. A puffin crossing would be an ideal solution.

I think this is a great idea to ensure the children are kept safe.

The road is getting busier and this is desperately needed.

I would like to see the proposed plans to also include double yellow lines at the junction by the village hall and shop. People regularly park there during the school run which causes an increased risk of accidents whilst crossing the road. In many instances cars park on the pavement forcing children into the road to turn right towards the school, a manoeuvre which has caused many near accidents. I believe the implementation of double yellow lines holds equal merit to the introduction of the proposed puffin crossing

Excellent news that this new crossing is planned. It has long been a point of great concern at drop-off and pick-up time for Hyde Heath: cars and lorries speeding down this road with many small children around. Thank you for sorting out this new crossing, it will make it much much safer for all the children at Hyde Heath.
